# About this manual

This manual contains service and reference information for the following ThinkPad® products.

ThinkPad products	Machine type
ThinkPad Edge E330	3354
ThinkPad Edge E335	3355

Use this manual along with the advanced diagnostic tests to troubleshoot problems.

### Important:

This manual is intended only for trained service technicians who are familiar with ThinkPad products. Use this manual along with the advanced diagnostic tests to troubleshoot problems effectively. Before servicing a ThinkPad product, be sure to read all the information under Chapter 1 "Safety information" on page 1 and Chapter 2 "Important service information" on page 19.

# Chapter 1. Safety information

This chapter presents following safety information that you need to be familiar with before you service a ThinkPad notebook computer.

- "General safety" on page 1
- "Electrical safety" on page 2
- "Safety inspection guide" on page 3
- "Handling devices that are sensitive to electrostatic discharge" on page 3
- "Grounding requirements" on page 4
- "Safety notices (multilingual translations)" on page 4

### **General safety**

Follow these rules to ensure general safety:

- Observe good housekeeping in the area of the machines during and after maintenance.
- When lifting any heavy object:
  - 1. Make sure that you can stand safely without slipping.
  - 2. Distribute the weight of the object equally between your feet.
  - 3. Use a slow lifting force. Never move suddenly or twist when you attempt to lift.
  - 4. Lift by standing or by pushing up with your leg muscles; this action removes the strain from the muscles in your back. Do not attempt to lift any object that weighs more than 16 kg (35 lb) or that you think is too heavy for you.
- Do not perform any action that causes hazards to the customer, or that makes the equipment unsafe.
- Before you start the machine, make sure that other service technicians and the customer's personnel are not in a hazardous position.
- Place removed covers and other parts in a safe place, away from all personnel, while you are servicing the machine.
- Keep your toolcase away from walk areas so that other people will not trip over it.
- Do not wear loose clothing that can be trapped in the moving parts of a machine. Make sure that your sleeves are fastened or rolled up above your elbows. If your hair is long, fasten it.
- Insert the ends of your necktie or scarf inside clothing or fasten it with a nonconductive clip, about 8 centimeters (3 inches) from the end.
- Do not wear jewelry, chains, metal-frame eyeglasses, or metal fasteners for your clothing.

Attention: Metal objects are good electrical conductors.

- Wear safety glasses when you are hammering, drilling, soldering, cutting wire, attaching springs, using solvents, or working in any other conditions that might be hazardous to your eyes.
- After service, reinstall all safety shields, guards, labels, and ground wires. Replace any safety device that is worn or defective.
- · Reinstall all covers correctly before returning the machine to the customer.
- Fan louvers on the machine help to prevent overheating of internal components. Do not obstruct fan louvers or cover them with labels or stickers.

# **Electrical safety**

Observe the following rules when working on electrical equipment.

### Important:

Use only approved tools and test equipment. Some hand tools have handles covered with a soft material that does not insulate you when working with live electrical currents.

Many customers have, near their equipment, rubber floor mats that contain small conductive fibers to decrease electrostatic discharges. Do not use this type of mat to protect yourself from electrical shock.

- Find the room emergency power-off (EPO) switch, disconnecting switch, or electrical outlet. If an electrical accident occurs, you can then operate the switch or unplug the power cord quickly.
- Do not work alone under hazardous conditions or near equipment that has hazardous voltages.
- Disconnect all power before:
  - Performing a mechanical inspection
  - Working near power supplies
  - Removing or installing main units
- Before you start to work on the machine, unplug the power cord. If you cannot unplug it, ask the customer to power-off the wall box that supplies power to the machine, and to lock the wall box in the off position.
- If you need to work on a machine that has *exposed* electrical circuits, observe the following precautions:
  - Ensure that another person, familiar with the power-off controls, is near you.

Attention: Another person must be there to switch off the power, if necessary.

- Use only one hand when working with powered-on electrical equipment; keep the other hand in your pocket or behind your back.

**Attention:** An electrical shock can occur only when there is a complete circuit. By observing the above rule, you may prevent a current from passing through your body.

- When using testers, set the controls correctly and use the approved probe leads and accessories for that tester.
- Stand on suitable rubber mats (obtained locally, if necessary) to insulate you from grounds such as metal floor strips and machine frames.

Observe the special safety precautions when you work with very high voltages; Instructions for these precautions are in the safety sections of maintenance information. Use extreme care when measuring high voltages.

- Regularly inspect and maintain your electrical hand tools for safe operational condition.
- Do not use worn or broken tools and testers.
- Never assume that power has been disconnected from a circuit. First, check that it has been powered off.
- Always look carefully for possible hazards in your work area. Examples of these hazards are moist floors, nongrounded power extension cables, power surges, and missing safety grounds.
- Do not touch live electrical circuits with the reflective surface of a plastic dental mirror. The surface is conductive; such touching can cause personal injury and machine damage.
- Do not service the following parts *with the power on* when they are removed from their normal operating places in a machine:
  - Power supply units
  - Pumps
  - Blowers and fans
  - Motor generators
  - Similar units to listed above
  - This practice ensures correct grounding of the units.
- If an electrical accident occurs:

- Use caution; do not become a victim yourself.
- Switch off power.
- Send another person to get medical aid.

# Safety inspection guide

The purpose of this inspection guide is to assist you in identifying potentially unsafe conditions. As each machine was designed and built, required safety items were installed to protect users and service technicians from injury. This guide addresses only those items. You should use good judgment to identify potential safety hazards due to attachment of non-ThinkPad features or options not covered by this inspection guide.

If any unsafe conditions are present, you must determine how serious the apparent hazard could be and whether you can continue without first correcting the problem.

Consider these conditions and the safety hazards they present:

- Electrical hazards, especially primary power (primary voltage on the frame can cause serious or fatal electrical shock)
- · Explosive hazards, such as a damaged CRT face or a bulging capacitor
- · Mechanical hazards, such as loose or missing hardware

To determine whether there are any potentially unsafe conditions, use the following checklist at the beginning of every service task. Begin the checks with the power off, and the power cord disconnected.

### Checklist:

- 1. Check exterior covers for damage (loose, broken, or sharp edges).
- 2. Power off the computer. Disconnect the power cord.
- 3. Check the power cord for:
  - a. A third-wire ground connector in good condition. Use a meter to measure third-wire ground continuity for 0.1 ohm or less between the external ground pin and the frame ground.
  - b. The power cord should be the authorized type specified for your computer. Go to: http://www.lenovo.com/serviceparts-lookup
  - c. Insulation must not be frayed or worn.
- 4. Check for cracked or bulging batteries.
- 5. Remove the cover.
- 6. Check for any obvious non-ThinkPad alterations. Use good judgment as to the safety of any non-ThinkPad alterations.
- 7. Check inside the unit for any obvious unsafe conditions, such as metal filings, contamination, water or other liquids, or signs of fire or smoke damage.
- 8. Check for worn, frayed, or pinched cables.
- 9. Check that the power-supply cover fasteners (screws or rivets) have not been removed or tampered with.

### Handling devices that are sensitive to electrostatic discharge

Any computer part containing transistors or integrated circuits (ICs) should be considered sensitive to electrostatic discharge (ESD.) ESD damage can occur when there is a difference in charge between objects. Protect against ESD damage by equalizing the charge so that the machine, the part, the work mat, and the person handling the part are all at the same charge.

Notes:

- 1. Use product-specific ESD procedures when they exceed the requirements noted here.
- 2. Make sure that the ESD protective devices you use have been certified (ISO 9000) as fully effective.

When handling ESD-sensitive parts:

- Keep the parts in protective packages until they are inserted into the product.
- Avoid contact with other people.
- Wear a grounded wrist strap against your skin to eliminate static on your body.
- Prevent the part from touching your clothing. Most clothing is insulative and retains a charge even when you are wearing a wrist strap.
- Use a grounded work mat to provide a static-free work surface. The mat is especially useful when handling ESD-sensitive devices.
- Select a grounding system, such as those listed below, to provide protection that meets the specific service requirement.

Note: The use of a grounding system to guard against ESD damage is desirable but not necessary.

- Attach the ESD ground clip to any frame ground, ground braid, or green-wire ground.
- When working on a double-insulated or battery-operated system, use an ESD common ground or reference point. You can use coax or connector-outside shells on these systems.
- Use the round ground prong of the ac plug on ac-operated computers.

# **Grounding requirements**

Electrical grounding of the computer is required for operator safety and correct system function. Proper grounding of the electrical outlet can be verified by a certified electrician.

# Safety notices (multilingual translations)

The safety notices in this section are provided in the following languages:

- English
- Arabic
- Brazilian Portuguese
- French
- German
- Hebrew
- Japanese
- Korean
- Spanish
- Traditional Chinese

### DANGER

Before the computer is powered on after FRU replacement, make sure that all screws, springs, and other small parts are in place and are not left loose inside the computer. Verify this by shaking the computer and listening for rattling sounds. Metallic parts or metal flakes can cause electrical short circuits.

### DANGER

Some standby batteries contain a small amount of nickel and cadmium. Do not disassemble a standby battery, recharge it, throw it into fire or water, or short-circuit it. Dispose of the battery as required by local ordinances or regulations. Use only the battery in the appropriate parts listing. Use of an incorrect battery can result in ignition or explosion of the battery.

### DANGER

The battery pack contains small amounts of nickel. Do not disassemble it, throw it into fire or water, or short-circuit it. Dispose of the battery pack as required by local ordinances or regulations. Use only the battery in the appropriate parts listing when replacing the battery pack. Use of an incorrect battery can result in ignition or explosion of the battery.

### DANGER

The lithium battery can cause a fire, an explosion, or a severe burn. Do not recharge it, remove its polarized connector, disassemble it, heat it above 100°C (212°F), incinerate it, or expose its cell contents to water. Dispose of the battery as required by local ordinances or regulations. Use only the battery in the appropriate parts listing. Use of an incorrect battery can result in ignition or explosion of the battery.

### DANGER

If the LCD breaks and the fluid from inside the LCD gets into your eyes or on your hands, immediately wash the affected areas with water for at least 15 minutes. Seek medical care if any symptoms from the fluid are present after washing.

#### DANGER

To avoid shock, do not remove the plastic cover that protects the lower part of the inverter card.

#### DANGER

Though the main batteries have low voltage, a short-circuited or grounded battery can produce enough current to burn personnel or combustible materials.

### DANGER

Unless hot swap is allowed for the FRU being replaced, do as follows before removing it: power off the computer, unplug all power cords from electrical outlets, remove the battery pack, and disconnect any interconnecting cables.

قبل اعادة تشغيل الحاسب بعد الانتهاء من استبدال FRU، تلكد من أنه قد تم اعادة كل من المسامير و السوست وكل الأجزاء الصغيرة الأخرى في أماكنهم ولم يتم فقدهم داخل الحاسب. ويمكن التحقق من ذلك عن طريق هز الحاسب والاستماع لأي صوت صاخب يصدر منه. قد تؤدي الأجزاء أو الرقائق المعدنية الى حدوث دائرة قصر.

تحتوي بعض البطاريات الاحتياطية على كمية صغيرة من مادتي النيكل والكادميوم. لا تقم بفك أو اعادة شحن البطارية الاحتياطية ولا تقم أيضا بالقاءها في النار أو الماء ولا تتسبب في احداث دائرة قصر بها. قم بالتخلص من البطارية كما هو موضح في القوانين المحلية. استخدم نوع البطارية المحدد والذي يوصى باستخدامه. حيث أنه قد يؤدي استخدام نوع بطارية غير صحيح الى اشتعالها أو انفجارها.

تحتوي حزمة البطارية على كمية صغيرة من مادة النيكل. لا تقم بفكها أو القاءها في النار أو الماء ولا تتسبب في احداث دائرة قصر بها. تخلص من حزمة البطارية وفقا لما هو موضح في القوانين المحلية. قم، عند استبدال حزمة البطارية، باستخدام الأنواع المحددة فقط والتي يوصى باستخدامها. حيث أنه قد يؤدي استخدام نوع بطارية غير صحيح الى اشتعالها أو انفجارها.

قد تتسبب بطارية الليثيوم في حدوث حريق أو انفجار أو حدوث حروق شديدة. لا تقم باعادة شحن البطارية أو ازالة موصل الاستقطاب الخاص بها ولا تحاول أيضا فكها أو تسخينها لأكثر من ١٠٠ درجة منوية (٢١٢ فهرنهايت) أو حرقها أو تعريض محتويات الخانة الخاصة بها للماء. قم بالتخلص من البطارية وفقا لما هو موضح في القوانين المحلية. استخدم نوع البطارية المحدد والذي يوصى باستخدامه. حيث أنه قد يؤدي استخدام نوع بطارية غير صحيح الى اشتعالها أو انفجارها.

```
اذا ما انكسرت شاشة LCD ولامس السائل الداخلي عينيك أو يديك، قم في الحال بغسلهما
بالماء لمدة لا تقل عن ١٥ دقيقة. اذا ما وجدت أي أعراض بعد الغسل اطلب عندنذ المساعدة
الطبية.
```

لتجنب التعرض لأي صدمات، لا تقم بازالة الغطاء البلاستيكي الذي يحمي الجزء الأسفل من بطاقة العاكس.

على الرغم من أن البطاريات الرئيسية يكون لها جهد منخفض، الا أنه قد تقوم البطاريات التي حدث قصور بها أو التي تم توصيلها أرضيا باصدار تيار يكفي لحدوث حروق للأفراد أو تعرض المواد القابلة للاشتعال للحريق.

ما لم يتم السماح بالتبديل الفوري لأي FRU الجاري استبداله بدون ضرورة اغلاق النظام، قم بتنفيذ ما يلي قبل از الته. قم بايقاف تشغيل الحاسب ونزع كل أسلاك الطاقة من المخارج الكهرياتية وقم أيضا باز الة حزمة البطارية ثم قم بفصل أي كابلات متصلة.

### PERIGO

Antes de ligar o computador após a substituição da FRU, certifique-se de que todos os parafusos, molas e outras peças pequenas estejam no lugar e não estejam soltos dentro do computador. Verifique isso sacudindo o computador e procurando ouvir sons de peças soltas. Peças metálicas ou lascas de metal podem causar curto-circuito.

### PERIGO

Algumas baterias reserva contêm uma pequena quantidade de níquel e cádmio. Não desmonte uma bateria reserva, recarregue-a, jogue-a no fogo ou na água, ou deixe-a entrar em curto-circuito. Descarte a bateria conforme requerido pelas leis ou regulamentos locais. Use somente a bateria nas partes listadas apropriadas. O uso de uma bateria incorreta pode resultar em combustão ou explosão da bateria.

PERIGO

O pacote da bateria contém uma pequena quantidade de níquel. Não o desmonte, jogue-o no fogo ou na água, ou deixe-o entrar em curto-circuito. Descarte o pacote da bateria conforme requerido pelas leis ou regulamentos locais. Use somente a bateria nas partes listadas apropriadas ao substituir o pacote da bateria. O uso de uma bateria incorreta pode resultar em combustão ou explosão da bateria.

### PERIGO

A bateria de lítio pode causar incêndio, explosão ou graves queimaduras. Não a recarregue, remova seu conector polarizado, desmonte-a, aqueça-a acima de 100°C (212°F), incinere-a, ou exponha o conteúdo de sua célula à água. Descarte a bateria conforme requerido pelas leis ou regulamentos locais. Use somente a bateria nas partes listadas apropriadas. O uso de uma bateria incorreta pode resultar em combustão ou explosão da bateria.

### PERIGO

Se o LCD quebrar e o fluido de dentro dele entrar em contato com seus olhos ou com suas mãos, lave as áreas afetadas imediatamente com água durante pelo menos 15 minutos. Procure cuidados médicos se algum sintoma causado pelo fluido surgir após a lavagem.

### PERIGO

Para evitar choque elétrico, não remova a capa plástica que protege a parte inferior da placa inversora.

### PERIGO

Embora as principais baterias possuam baixa voltagem, uma bateria em curto-circuito ou aterrada pode produzir corrente o bastante para queimar materiais de pessoal ou inflamáveis.

### PERIGO

A menos que uma hot swap seja permitida para a FRU que está sendo substituída, faça o seguinte antes de removê-la: desligue o computador, desconecte todos os cabos de energia das tomadas, remova o pacote de baterias e desconecte quaisquer cabos de interconexão.

### DANGER

Avant de remettre l'ordinateur sous tension après remplacement d'une unité en clientèle, vérifiez que tous les ressorts, vis et autres pièces sont bien en place et bien fixées. Pour ce faire, secouez l'unité et assurez-vous qu'aucun bruit suspect ne se produit. Des pièces métalliques ou des copeaux de métal pourraient causer un court-circuit.

### DANGER

Certaines batteries de secours contiennent du nickel et du cadmium. Ne les démontez pas, ne les rechargez pas, ne les exposez ni au feu ni à l'eau. Ne les mettez pas en court-circuit. Pour les mettre au rebut, conformez-vous à la réglementation en vigueur. Lorsque vous remplacez la pile de sauvegarde ou celle de l'horloge temps réel, veillez à n'utiliser que les modèles cités dans la liste de pièces détachées adéquate. Une batterie ou une pile inappropriée risque de prendre feu ou d'exploser.

### DANGER

La batterie contient du nickel. Ne la démontez pas, ne l'exposez ni au feu ni à l'eau. Ne la mettez pas en court-circuit. Pour la mettre au rebut, conformez-vous à la réglementation en vigueur. Lorsque vous remplacez la batterie, veillez à n'utiliser que les modèles cités dans la liste de pièces détachées adéquate. En effet, une batterie inappropriée risque de prendre feu ou d'exploser.

### DANGER

La pile de sauvegarde contient du lithium. Elle présente des risques d'incendie, d'explosion ou de brûlures graves. Ne la rechargez pas, ne retirez pas son connecteur polarisé et ne la démontez pas. Ne l'exposez pas à une temperature supérieure à 100°C, ne la faites pas brûler et n'en exposez pas le contenu à l'eau. Mettez la pile au rebut conformément à la réglementation en vigueur. Une pile inappropriée risque de prendre feu ou d'exploser.

### DANGER

Si le panneau d'affichage à cristaux liquides se brise et que vous recevez dans les yeux ou sur les mains une partie du fluide, rincez-les abondamment pendant au moins quinze minutes. Consultez un médecin si des symptômes persistent après le lavage.

### DANGER

Afin d'éviter tout risque de choc électrique, ne retirez pas le cache en plastique protégeant la partie inférieure de la carte d'alimentation.

### DANGER

Bien que le voltage des batteries principales soit peu élevé, le court-circuit ou la mise à la masse d'une batterie peut produire suffisamment de courant pour brûler des matériaux combustibles ou causer des brûlures corporelles graves.

### DANGER

Si le remplacement à chaud n'est pas autorisé pour l'unité remplaçable sur site que vous remplacez, procédez comme suit avant de retirer l'unité : mettez l'ordinateur hors tension, débranchez tous les cordons d'alimentation des prises de courant, retirez le bloc de batterie et déconnectez tous les câbles d'interconnexion.

### VORSICHT

Bevor nach einem FRU-Austausch der Computer wieder angeschlossen wird, muß sichergestellt werden, daß keine Schrauben, Federn oder andere Kleinteile fehlen oder im Gehäuse vergessen wurden. Der Computer muß geschüttelt und auf Klappergeräusche geprüft werden. Metallteile oder-splitter können Kurzschlüsse erzeugen.

### VORSICHT

Die Bereitschaftsbatterie, die sich unter dem Diskettenlaufwerk befindet, kann geringe Mengen Nickel und Cadmium enthalten. Sie darf nur durch die Verkaufsstelle oder den IBM Kundendienst ausgetauscht werden. Sie darf nicht zerlegt, wiederaufgeladen, kurzgeschlossen, oder Feuer oder Wasser ausgesetzt werden. Die Batterie kann schwere Verbrennungen oder Verätzungen verursachen. Bei der Entsorgung die örtlichen Bestimmungen für Sondermüll beachten. Beim Ersetzen der Bereitschafts-oder Systembatterie nur Batterien des Typs verwenden, der in der Ersatzteilliste aufgeführt ist. Der Einsatz falscher Batterien kann zu Entzündung oder Explosion führen.

### VORSICHT

Akkus enthalten geringe Mengen von Nickel. Sie dürfen nicht zerlegt, wiederaufgeladen, kurzgeschlossen, oder Feuer oder Wasser ausgesetzt werden. Bei der Entsorgung die örtlichen Bestimmungen für Sondermüll beachten. Beim Ersetzen der Batterie nur Batterien des Typs verwenden, der in der Ersatzteilliste aufgeführt ist. Der Einsatz falscher Batterien kann zu Entzündung oder Explosion führen.

### VORSICHT

Die Systembatterie ist eine Lithiumbatterie. Sie kann sich entzünden, explodieren oder schwere Verbrennungen hervorrufen. Batterien dieses Typs dürfen nicht aufgeladen, zerlegt, über 100°C erhitzt oder verbrannt werden. Auch darf ihr Inhalt nicht mit Wasser in Verbindung gebracht oder der zur richtigen Polung angebrachte Verbindungsstecker entfernt werden. Bei der Entsorgung die örtlichen Bestimmungen für Sondermüll beachten. Beim Ersetzen der Batterie nur Batterien des Typs verwenden, der in der Ersatzteilliste aufgeführt ist. Der Einsatz falscher Batterien kann zu Entzündung oder Explosion führen.

### VORSICHT

Die Leuchtstoffröhre im LCD-Bildschirm enthält Quecksilber. Bei der Entsorgung die örtlichen Bestimmungen für Sondermüll beachten. Der LCD-Bildschirm besteht aus Glas und kann zerbrechen, wenn er unsachgemäß behandelt wird oder der Computer auf den Boden fällt. Wenn der Bildschirm beschädigt ist und die darin befindliche Flüssigkeit in Kontakt mit Haut und Augen gerät, sollten die betroffenen Stellen mindestens 15 Minuten mit Wasser abgespült und bei Beschwerden anschließend ein Arzt aufgesucht werden.

### VORSICHT

Aus Sicherheitsgründen die Kunststoffabdeckung, die den unteren Teil der Spannungswandlerplatine umgibt, nicht entfernen.

### VORSICHT

Obwohl Hauptbatterien eine niedrige Spannung haben, können sie doch bei Kurzschluß oder Erdung genug Strom abgeben, um brennbare Materialien zu entzünden oder Verletzungen bei Personen hervorzurufen.

VORSICHT

Wenn ein Austausch der FRU bei laufendem Betrieb nicht erlaubt ist, gehen Sie beim Austausch der FRU wie folgt vor: Schalten Sie den Computer aus, ziehen Sie alle Netzkabel von den Netzsteckdosen ab, entfernen Sie den Akku und ziehen Sie alle miteinander verbundenen Kabel ab.

לפני הפעלת המחשב לאחר החלפת FRU יש לוודא שכל הברגים, חקפיצים, וחלקים קטנים אחרים נמצאים במקומם ואינם חופשיים לזוז בתוך המחשב. כדי לוודא זאת, יש לטלטל את המחשב ולחקשיב לגילוי קולות שקשוק. חלקי או שבבי מתכת עלולים לגרום לקצרים חשמליים.

סוללות המתנה מסוימות מכילות כמות קטנה של ניקל וקדמיום. אין לפרק סוללת המתנה, לטעון אותה מחדש, להשליך אותה לאש או למים או לקצר אותה. יש לסלק את הסוללה כנודרש על ידי התקנות והחוקים המקומיים. יש להשתמש רק בסוללה המופיעה ברשימת החלקים המתאימה. שימוש בסוללה לא מתאימה עלול לגרום להצתה או התמוצצות של הסוללה.

מארז הסוללה מכיל כמות קטנה של ניקל וקדמיום. אין לפרק את מארז הסוללה, להשליך אותו לאש או למים או לקצר אותו. יש לסלק את מארז הסוללה הסוללה כנדרש על ידי התקנות והחוקים המקומיים. יש להשתמש רק בסוללה המופיעה ברשימת החלקים המוטאימה בזמן החלפת מארז הסוללה. שימוש בסוללה לא מתאימה עלול לגרום להצתה או התפוצצות של הסוללה.

סוללת הליתיום עלולה לגרום לשריפה, להתפוצצות או לכוויות קשות. אין לטעון אותה מחדש, לסלק את המהבר המקוטב שלה, לפרק אותה או לחמם אותה לטמפרטורה העולה על 100 מעלות צלזיוס. אין לשרוף את הסוללה ואין לחשוף את תוכן התא למים. יש לסלק את הסוללה כנדרש בתקנות ובחוקים המקומיים. יש להשתמש רק בסוללה המופניעה ברשימת החלקים המתאימים. שימוש בסוללה אחרת עלול לגרום לסכנת שריפה או התפוצצות.

אם מסך הגביש הנוזלי (LCD) נשבר והנוזל מתוך המסך בא במגע עם עיניכם או ידיכם, שטפו את האזורים הנגועים מיד במים במשך 15 דקות לפחות. פנו לקבלת עזרח רפואית אם תסמינים הנובעים מהמגע עם הנוזל נמשכים לאחר השטיפה.

כדי למנוע התחשמלות, אין להסיר את מכסה הפלסטיק המגן על חלקו התחתון של הכרטיס ההפוך.

אף שהסוללות הראשיות הן בעלות מתח נמוך, סוללה מקוצרת או מוארקת עלולה להפיק זרם מספיק לגרימת כוויות או להצתת חומרים ויליקים.

אלא אם כן מותרת יהחלפה חמהי של ה-FRU המוחלף, פעלו כדלחלן לפני הסרתו : כבו את המחשב, נתקו את כל כבלי החשמל מהשקעים, הוציאו את מארז הסוללות ונתקו את כל הכבלים המחוברים.

FRU の交換後、 ThinkPad の電源を入れる前に、ねじ、バネ、その他の小さな部 品がすべて正しい位置にあり、また ThinkPad の内部で緩んでいないことを確認し てください。 これを確認するには、 ThinkPad を振って、カチャカチャと音がしないか確かめま す。金属部品や金属破片はショートの原因になることがあります。

予備バッテリーの中には少量のニッケルとカドミウムが含まれているものがあり ます。したがって、予備バッテリーの分解、再充電、火または水の中への投棄、 またはショートさせることは決して行わないでください。バッテリーを廃棄する 場合は地方自治体の条例に従ってください。適切なパーツ・リストにあるバッテ リーだけを使用してください。誤ったバッテリーを使用すると、バッテリーが発 火したり、爆発したりすることがあります。

バッテリー・パックには少量のニッケルが含まれています。バッテリー・パック を分解したり、火または水の中に投げ込んだり、ショートさせないでください。 バッテリー・パックの廃棄にあたっては、地方自治体の条例または規則に従って ください。バッテリー・パックを交換するときは、適切なパーツ・リストにある バッテリーだけを使用してください。誤ったバッテリーを使用すると、バッテ リーが発火したり、爆発したりすることがあります。

リチウム・バッテリーは、火災、爆発、または重症のやけどを引き起こすことが あります。バックアップ・バッテリーの充電、その極性コネクターの取り外し、 バッテリー本体の分解、 100 ℃ (212°F)以上への加熱、焼却、電池の中身を水に浸すことはしないでくださ い。バッテリーを廃棄する場合は地方自治体の条例に従ってください。適切な パーツ・リストにあるバッテリーだけを使用してください。誤ったバッテリーを 使用すると、バッテリーが発火したり、爆発したりすることがあります。

LCD が破損し、 LCD の中の液体が目に入ったり、手に触れたりした場合は、液体が触れた部分を少なくとも15 分間洗い流してください。洗い流した後に、液体によって何らかの症状が現れた場合は、医師の治療を受けてください。

感電を防ぐため、インバーター・カードの下部を保護しているプラスチック・カ バーを外さないでください。

メイン・バッテリーの電圧は低くても、ショートしたり、接地したバッテ リーが、作業者にやけどを負わせたり、可燃物を燃やすだけの電流を発生さ せる場合があります。

交換しようとしている FRU がホット・スワップに対応していない場合、それを 取り外す前に、コンピューターの電源をオフにし、すべての電源コードを コンセントから抜き、バッテリー・パックを取り外して、相互接続している ケーブルをすべて切り離してください。

FRU를 교체하고 나서 컴퓨터 전원을 켜기 전에 모든 나사, 스프링 및 기타 작은 부품들이 올바른 위치에 있는지, 컴퓨터 내부에 단단하게 연결되어 있 는지 확인하십시오. 컴퓨터를 흔들어 달깍거리는 소리가 나지 않는지 확인하 십시오. 금속 부품 또는 금속 조각은 누전을 일으킬 수 있습니다.

일부 보조 배터리에는 소량의 니켈 및 카트뮴이 포함되어 있습니다. 보조 배 터리를 분해하거나, 다시 충전하거나, 불 또는 물에 던지거나, 단락시키지 마 십시오. 배터리 팩을 폐기할 때에는 해당 지역의 법률 규정을 따르십시오. 배 터리 팩을 교체할 때에는 올바른 배터리만 사용하십시오. 올바르지 않은 배터 리를 사용하면 배터리가 발화되거나 폭발할 수 있습니다.

배터리 팩에는 소량의 니켈이 포함되어 있습니다. 배터리 팩을 분해하거나, 불 또는 물에 던지거나, 단락시키지 마십시오. 배터리 팩을 폐기할 때에는 해 당 지역의 법률 규정을 따르십시오. 배터리 팩을 교체할 때에는 올바른 배터 리만 사용하십시오. 올바르지 않은 배터리를 사용하면 배터리가 발화되거나 폭발할 수 있습니다.

리튬 배터리는 화재, 폭발 또는 심각한 화상을 일으킬 수 있습니다. 리튬 배터 리를 다시 충전하거나, 극성 커넥터를 제거하거나, 분해하거나, 100C(212F) 이상으로 가열하거나, 소각하거나, 전지 내용물을 물에 노출시키지 마십시오. 배터리를 폐기할 때에는 해당 지역을 법률 규정을 따르십시오. 올바른 배터리 만 사용하십시오. 올바르지 않은 배터리를 사용하면 배터리가 발화되거나 폭 발할 수 있습니다.

LCD가 파손되어 LCD 내부의 액체가 눈에 들어가거나 손에 묻으면 즉시 깨끗한 물로 15분 이상 닦아 내십시오. 씻은 후에 조금이라도 이상을 느끼면 즉시 병원에 가서 의사의 진찰을 받아야 합니다.

# 

기본 배터리의 전압은 낮지만, 단락되거나 접지된 배터리는 화상을 입히기에 충분한 전류와 가연성 물질을 발생시킬 수 있습니다.

# 

FRU 교체 시 Hot Swap이 지원되지 않는 경우, FRU를 제거하기 전에 컴퓨터의 전원을 끄고, 전기 콘센트에서 전원 코드를 분리하고, 배터리를 제거한 후, 연결된 모든 케이블을 분리하십시오.

Antes de encender el sistema despues de sustituir una FRU, compruebe que todos los tornillos, muelles y demás piezas pequeñas se encuentran en su sitio y no se encuentran sueltas dentro del sistema. Compruébelo agitando el sistema y escuchando los posibles ruidos que provocarían. Las piezas metálicas pueden causar cortocircuitos eléctricos.

Algunas baterías de reserva contienen una pequeña cantidad de níquel y cadmio. No las desmonte, ni recargue, ni las eche al fuego o al agua ni las cortocircuite. Deséchelas tal como dispone la normativa local. Utilice sólo baterías que se encuentren en la lista de piezas. La utilización de una batería no apropiada puede provocar la ignición o explosión de la misma.

Las baterías contienen pequeñas cantidades de níquel. No las desmonte, ni recargue, ni las eche al fuego o al agua ni las cortocircuite. Deséchelas tal como dispone la normativa local. Utilice sólo baterías que se encuentren en la lista de piezas al sustituir la batería. La utilización de una batería no apropiada puede provocar la ignición o explosión de la misma.

La batería de repuesto es una batería de litio y puede provocar incendios, explosiones o quemaduras graves. No la recargue, ni quite el conector polarizado, ni la desmonte, ni caliente por encima de los 100°C (212°F), ni la incinere ni exponga el contenido de sus celdas al agua. Deséchela tal como dispone la normativa local.

Si la LCD se rompe y el fluido de su interior entra en contacto con sus ojos o sus manos, lave inmediatamente las áreas afectadas con agua durante 15 minutos como mínimo. Obtenga atención medica si se presenta algún síntoma del fluido despues de lavarse.

Para evitar descargas, no quite la cubierta de plástico que rodea la parte baja de la tarjeta invertida.

Aunque las baterías principales tienen un voltaje bajo, una batería cortocircuitada o con contacto a tierra puede producir la corriente suficiente como para quemar material combustible o provocar quemaduras en el personal.

Salvo que se permita el intercambio en caliente para la unidad sustituible localmente, realice lo siguiente antes de extraerla: apague el sistema, desconecte todos los cables de alimentación de las tomas de alimentación eléctrica, extraiga la batería y desconecte los cables de interconexión.

完成 FRU 更換之後,在開啟電腦的電源之前,請確定所有螺絲、彈簧及其 他小零件都已歸位,沒有遺留在電腦內部。 若要確認這一點,請搖晃電腦,聽聽看是否有卡嗒的聲響。 金屬零件或儀錶的火花會造成電線短路。

部分備用電池含有微量的鎳和鎘。請勿拆開備用電池、再充電、丟入火或水中, 或使其形成短路。請按照當地法令或規定來棄置電池。 僅限使用零件清單中的電池。使用不適當的電池會導致電池起火或爆炸。

電池套件含有微量的錄。請勿拆開電池套件、丟入火或水中,或使其形成短路。 請按照當地法令或規定來棄置電池套件。 更換電池套件時,僅限使用零件清單中的電池。使用不適當的電池會導致電池

起火或爆炸。

鋰電池會導致起火、爆炸或嚴重燒傷。請勿再充電、拔除其電極接頭、拆開、 加熱超過 100°C (212°F)、焚燒,或讓電池組成物浸到水。請按照當地法 令或規定來棄置電池。 僅限使用零件清單中的電池。使用不適當的電池會導致電池起火或爆炸。

如果 LCD 破裂導致 LCD 流出的液體沾到您的眼睛或手,請立即以清水沖洗沾 染部位至少 15 分鐘。如果在清洗後出現該液體所造成的任何症狀,請就醫治 療。

為避免電擊,請勿拆下轉換卡下面的塑膠護蓋。

雖然主電池的電壓很低,但短路或接地電池所產生的電流,仍足以使人燒傷或 使可燃物質起火。

除非 FRU 允許以熱抽換來替換,否則請依下列方式將其移除:將電腦關機,拔除插座上所有電源線,移除電池包,並拔開任何交互連接的線材。

# Chapter 2. Important service information

This chapter introduces following important service information that applies to all machine types supported by this manual:

- "Strategy for replacing FRUs" on page 19
  - "Strategy for replacing a hard disk drive" on page 20
  - "Important notice for replacing a system board" on page 20
  - "How to use error message" on page 20
- "Strategy for replacing FRUs for CTO, CMV, and GAV" on page 20
- "Product definition" on page 20
- "FRU identification for CTO, CMV, and GAV products" on page 21

### Important:

- If the computer is equipped with both a hard disk drive and an mSATA solid-state drive, do not use the mSATA solid-state drive as a bootable device. The mSATA solid-state drive is designed and developed for "cache" function purpose only.
- Advise customers to contact the Lenovo<sup>®</sup> Customer Support Center if they need any assistance in obtaining or installing any software fixes, drivers, and UEFI BIOS downloads. Telephone numbers for Lenovo Support are available at:

http://www.lenovo.com/support/phone

 System Disassembly/Reassembly videos that show the FRU removals or replacements for the Lenovo authorized service technicians are available in the following support site: http://www.lenovoservicetraining.com/ion/

# Strategy for replacing FRUs

### Before replacing parts:

Make sure that all software fixes, drivers, and UEFI BIOS downloads are installed before replacing any FRUs listed in this manual.

After a system board is replaced, ensure that the latest UEFI BIOS is loaded to the system board before completing the service action.

To download software fixes, drivers, and UEFI BIOS, do the following:

- 1. Go to http://www.lenovo.com/support.
- 2. Enter the product number of the computer or press Auto-detect button on the screen.
- 3. Select **Downloads & Drivers**.
- 4. Follow the directions on the screen and install the necessary software.

Use the following strategy to prevent unnecessary expense for replacing and servicing FRUs:

- If you are instructed to replace a FRU but the replacement does not correct the problem, reinstall the original FRU before you continue.
- Some computers have both a processor board and a system board. If you are instructed to replace either the processor board or the system board, and replacing one of them does not correct the problem, reinstall that board, and then replace the other one.

 If an adapter or a device consists of more than one FRU, any of the FRUs might be the cause of the error. Before replacing the adapter or device, remove the FRUs, one by one, to see if the symptoms change. Replace only the FRU that changed the symptoms.

# Strategy for replacing a hard disk drive

Always try to run a low-level format before replacing a hard disk drive. This will cause all customer data on the hard disk to be lost. Be sure that the customer has a current backup of the data before doing this task.

**Attention:** The drive startup sequence in the computer you are servicing might have been changed. Be extremely careful during write operations such as copying, saving, or formatting. If you select an incorrect drive, data or programs can be overwritten.

If the computer is shipped with an mSATA solid-state drive and a hard disk drive, the mSATA solid-state drive is used for the "cache" function only to support and the Intel<sup>®</sup> Rapid Start Technology. Users are not recommended to replace the mSATA solid-state drive by themselves. Otherwise, the "cache" function will not work and the Intel Rapid Start Technology cannot be used any more.

# Important notice for replacing a system board

Some components mounted on a system board are very sensitive. Improper handling of a system board can cause damage to those components, and might cause a system malfunction.

Attention: When handling a system board:

- Do not drop a system board or apply any excessive force to it.
- Avoid rough handling of any kind.
- Avoid bending a system board and hard pushing to prevent cracking at each BGA (Ball Grid Array) chipset.

### How to use error message

Use the error codes displayed on the screen to diagnose failures. If more than one error code is displayed, begin the diagnosis with the first error code. Whatever causes the first error code might also cause false error codes. If no error code is displayed, see whether the error symptom is listed in the Symptom-to-FRU Index for the computer you are servicing.

# Strategy for replacing FRUs for CTO, CMV, and GAV

### **Product definition**

### **Dynamic Configure To Order (CTO)**

This provides the ability for a customer to configure a Lenovo solution from an eSite, and have this configuration sent to fulfillment, where it is built and shipped directly to the customer. The machine label, Product Entitlement Warehouse (PEW), and eSupport will load these products as the 4-digit MT and 3-digit model, where model = "CTO" (Example: 1829-CTO).

### **Custom Model Variant (CMV)**

This is a unique configuration that has been negotiated between Lenovo and the customer. A unique 4-digit MT and 3-digit model is provided to the customer to place orders (Example: 1829-W15). A CMV is a special bid offering. Therefore, it is not generally announced.

 The MTM portion of the machine label is the 4-digit MT and 3-digit model, where model = "CTO" (Example: 1829-CTO). The PRODUCT ID portion of the machine label is the 4-digit MT and 3-digit CMV model (Example: 1829-W15).

- The PEW record is the 4-digit MT and 3-digit model, where model = "CTO" (Example: 1829-CTO).
- eSupport will show both the CTO and CMV machine type models (Example: 1829-CTO and 1829-W15 will be found on the eSupport site.)

### **General Announce Variant (GAV)**

This is a standard model (fixed configuration). GAVs are announced and offered to all customers. The MTM portion of the machine label is a 4-digit MT and 3-digit model, where model = a "fixed part number", not "CTO" (Example: 1829-F1U). Also, PEW and eSupport will list these products under the same fixed model number.

# FRU identification for CTO, CMV, and GAV products

There are three information resources to identify which FRUs are used to support CTO, CMV, and GAV products. These sources are PEW and eSupport.

### **Using PEW**

- **PEW** is the primary source for identifying FRU part numbers and FRU descriptions for the key commodities for CTO, CMV and GAV products at a MT serial number level. An example of key commodities are system boards and Liquid Crystal Displays (LCDs).
- Remember, all CTO and CMV products are loaded in PEW under the 4-digit MT and 3-digit model, where model = "CTO" (Example: 1829-CTO). GAVs are loaded in PEW under the 4-digit MT and 3-digit model, where model = a "fixed part number", not "CTO" (Example: 1829-F1U).
- PEW can be accessed at the following Web site: http://www.lenovo.com/support/site.wss/document.do?Indocid=LOOK-WARNTY Select Warranty lookup. Input the MT and the Serial number and the list of key commodities will be returned in the PEW record under COMPONENT INFORMATION.

### Using eSupport

### For Key Commodities (Examples - system board and LCD)

- eSupport can be used to view the list of key commodities built in a particular machine serial (this is the same record found in PEW).
- eSupport can be accessed at the following Web site: http://www.lenovo.com/support
- To view the key commodities, do the following:
  - 1. Click Warranty.
  - 2. Click Check Warranty Status.
  - 3. On the Warranty Status Lookup page, click **Parts Lookup**.
  - 4. Type your machine type and serial number, and then click **Submit**. The key commodities will be displayed.

### For the Remaining FRUs (the complete list of FRUs at the MT Model level)

- eSupport can be used to view the complete list of FRUs for a machine type and model.
- eSupport can be accessed at the following Web site: http://www.lenovo.com/support
- To view the complete list of FRUs, do the following:
  - 1. Click **Product & Parts Detail** and then follow the instructions on the screen to reach the Product and Parts Details page.
  - 2. Click the Parts Detail tab to view the list of service parts.

# Chapter 3. General checkout

This chapter presents following information:

- "Checkout guide" on page 24
- "Checkout guide" on page 24
  - "Lenovo Solution Center" on page 24
  - "Quick test programs" on page 24
  - "UEFI diagnostic program" on page 25
  - "Bootable diagnostic programs" on page 25
- "Power system checkout" on page 26

Before you go to the checkout guide, be sure to read the following important notes.

#### Important notes:

- Only certified trained personnel should service the computer.
- Before replacing any FRU, read the entire page on removing and replacing FRUs.
- When you replace FRUs, it is recommended use new nylon-coated screws.
- Be extremely careful during such write operations as copying, saving, or formatting. The sequence of the drives in the computer that you are servicing might have been altered. If you select an incorrect drive, data or programs might be overwritten.
- Replace a FRU only with another FRU of the correct model. When you replace a FRU, make sure that the model of the machine and the FRU part number are correct.
- A FRU should not be replaced because of a single, unreproducible failure. Single failures can occur for a variety of reasons that have nothing to do with a hardware defect, such as cosmic radiation, electrostatic discharge, or software errors. Consider replacing a FRU only when a problem recurs. If you suspect that a FRU is defective, clear the error log and run the test again. If the error does not recur, do not replace the FRU.
- Be careful not to replace a nondefective FRU.

# What to do first

When you return a FRU, you must include the following information in the parts exchange form or parts return form that you attach to it:

- 1. Name and phone number of service technician
- 2. Date of service
- 3. Date on which the machine failed
- 4. Date of purchase
- 5. Failure symptoms, error codes appearing on the display, and beep symptoms
- 6. Procedure index and page number in which the failing FRU was detected
- 7. Failing FRU name and part number
- 8. Machine type, model number, and serial number
- 9. Customer's name and address

**Note:** During the warranty period, the customer might be responsible for repair costs if the computer damage was caused by misuse, accident, modification, unsuitable physical or operating environment, or improper maintenance by the customer. Following is a list of some common items that are not covered under warranty and some symptoms that might indicate that the system was subjected to stress beyond normal use.

Before checking problems with the computer, determine whether the damage is covered under the warranty by referring to the following list:

### The following are not covered under warranty:

- LCD panel cracked from the application of excessive force or from being dropped
- Scratched (cosmetic) parts
- Distortion, deformation, or discoloration of the cosmetic parts
- Plastic parts, latches, pins, or connectors that have been cracked or broken by excessive force
- · Damage caused by liquid spilled into the system
- Damage caused by the improper insertion of a PC card or the installation of an incompatible card
- · Improper disc insertion or use of an optical drive
- · Fuses blown by attachment of a nonsupported device
- · Forgotten computer password (making the computer unusable)
- · Sticky keys caused by spilling a liquid onto the keyboard
- Use of an incorrect ac power adapter on laptop products

### The following symptoms might indicate damage caused by nonwarranted activities:

- Missing parts might be a symptom of unauthorized service or modification.
- If the spindle of a hard disk drive becomes noisy, it might have been subjected to excessive force, or dropped.

# **Checkout guide**

Use the following procedures as a guide in identifying and correcting problems with the ThinkPad notebook computers.

**Note:** The diagnostic tests are intended to test only ThinkPad products. The use of non-ThinkPad products, prototype cards, or modified options can lead to false indications of errors and invalid system responses.

- 1. Identify the failing symptoms in as much detail as possible.
- 2. Verify the symptoms. Try to re-create the failure by running the diagnostic test or by repeating the operation.

# **Lenovo Solution Center**

The Lenovo Solution Center program enables you to troubleshoot and resolve computer problems. It combines diagnostic tests, system information collection, security status, and support information, along with hints and tips for maximum system performance.

**Note:** The Lenovo Solution Center program is available only on models preinstalled with the Windows 7 operating system. It also can be downloaded from http://www.lenovo.com/diags.

To run the Lenovo Solution Center program, click Start  $\rightarrow$  Control Panel  $\rightarrow$  System and Security  $\rightarrow$  Lenovo - System Health and Diagnostics, and then follow the instructions on the screen.

For additional information about this program, see the help information system.

# Quick test programs

Lenovo Hard Drive Quick Test and Lenovo Memory Quick Test are two quick test programs that enable you to troubleshoot and resolve computer internal storage and memory problems.

### Notes:

- If the computer you are servicing is not installed with the Lenovo Solution Center program, you can download the quick test programs from the Lenovo Support Web site.
- The two programs are applicable to computers installed with the Windows 7, Windows XP, Windows Server 2003, or Windows Server 2008 operating system.

To download and install a quick test program, go to http://www.lenovo.com/diags, and follow the instructions on the Web site.

To run a quick test using the downloaded program, do the following:

- 1. Go to the C:\SWTOOLS\Idiag folder.
- 2. Double-click the gui\_lsc\_lite.exe file.
- 3. When the User Account Control window opens, click Yes.
- 4. Select the device class to be tested.
- 5. Select the devices to be tested.
- 6. Select the tests to be performed.
- 7. Follow the instructions on the screen to start the test. When a problem is detected, information messages will be displayed. Refer to the messages to troubleshoot the problem.

# **UEFI** diagnostic program

A UEFI diagnostic program is preinstalled on the computer. It enables you to test memory and internal storage problems, view system information, and check and recover bad sectors on internal storage devices.

To run the UEFI diagnostic program, do the following:

- 1. Turn on the computer. If the computer cannot be turned on, go to "Power system checkout" on page 26, and check the power sources. If an error code is displayed, go to "Symptom-to-FRU index" on page 34 for error code descriptions and troubleshooting hints.
- 2. When the ThinkPad logo is displayed, repeatedly press and release the F12 key. When the Boot Menu window opens, release the F12 key.
- 3. Press the Tab key to switch to the Application Menu window.
- 4. Use the arrow keys to select **Lenovo Diagnostics** and then press Enter. The main screen of the UEFI diagnostic program is displayed.
- 5. Follow the instructions on the screen to use the diagnostic program.

The options on the main screen are as follows:

Tests	Tools
<ul><li>Quick Memory Test</li><li>Quick Storage Device Test</li><li>Exit Application</li></ul>	<ul><li>System Information</li><li>Recover Bad Sectors Tool</li></ul>

# Bootable diagnostic programs

If the computer you are servicing is not installed with the UEFI diagnostic program, you can download a bootable diagnostic program from the Lenovo Support Web site. The bootable diagnostic programs enable you to test computer memory and internal storage devices, view system information, and check and recover the internal storage devices. To use the bootable diagnostic programs, you can create a bootable diagnostic medium on a USB device or CD.

To create a bootable diagnostic medium, do the following:

- 1. Go to http://www.lenovo.com/diags.
- 2. Click Lenovo Bootable Diagnostics.
- 3. Follow the instructions on the Web site to create a bootable diagnostic medium on a USB device or CD.

To use the diagnostic medium you have created, do one of the following:

- If you have created the bootable diagnostic medium on a USB device, do the following:
  - 1. Attach the USB device to the computer.
  - 2. Turn on the computer. If the computer cannot be turned on, go to "Power system checkout" on page 26, and check the power sources. If an error code is displayed, go to "Symptom-to-FRU index" on page 34 for error code descriptions and troubleshooting hints.
  - 3. When the ThinkPad logo is displayed, repeatedly press and release the F12 key. When the Boot Menu window opens, release the F12 key.
  - 4. Use the arrow keys to select **USB HDD** and then press Enter. The diagnostic program will be launched automatically.
  - 5. Follow the instructions on the screen to use the diagnostic program.
- If you have created the bootable diagnostic medium on a CD, do the following:
  - 1. Turn on the computer. If the computer cannot be turned on, go to "Power system checkout" on page 26, and check the power sources. If an error code is displayed, go to "Symptom-to-FRU index" on page 34 for error code descriptions and troubleshooting hints.
  - 2. Insert the CD into the optical drive.
  - 3. Restart the computer.
  - 4. When the ThinkPad logo is displayed, repeatedly press and release the F12 key. When the Boot Menu window opens, release the F12 key.
  - 5. Use the arrow keys to select **ATAPI CDx** (x: 0, 1, ...) and then press Enter. The diagnostic program will be launched automatically.
  - 6. Follow the instructions on the screen to use the diagnostic program.

### Power system checkout

To verify a symptom, do the following:

- 1. Turn off the computer.
- 2. Remove the battery pack.
- 3. Connect the ac power adapter.
- 4. Check that power is supplied when you turn on the computer.
- 5. Turn off the computer.
- 6. Disconnect the ac power adapter and install the charged battery pack.
- 7. Check that the battery pack supplies power when you turn on the computer.

If you suspect a power problem, see the appropriate one of the following power supply checkouts:

- "Checking the ac power adapter" on page 26
- "Checking operational charging" on page 27
- "Checking the battery pack" on page 27
- "Checking the backup battery" on page 28

# Checking the ac power adapter

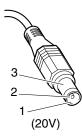

The computer fails only when the ac power adapter is used.

• If the power-on indicator does not turn on, check the power cord of the ac power adapter for correct continuity and installation.

• If the computer does not charge during operation, go to "Checking operational charging" on page 27.

To check the ac power adapter, do the following:

- 1. Unplug the ac power adapter cable from the computer.
- 2. Measure the output voltage at the plug of the ac power adapter cable. See the following illustration:

Pin	Voltage (V dc)
1	+20
2	0
3	Ground

Note: Output voltage across pin 2 of the ac power adapter might differ from the one you are servicing.

- 3. If the voltage is not correct, replace the ac power adapter.
- 4. If the voltage is acceptable, replace the system board.

Note: Noise from the ac power adapter does not always indicate a defect.

# **Checking operational charging**

To check whether the battery charges properly during operation, use a discharged battery pack or a battery pack that has less than 50% of the total power remaining when installed in the computer.

Perform operational charging. If the battery status indicator or icon does not turn on, remove the battery pack and let it return to room temperature. Reinstall the battery pack. If the charge indicator or icon still does not turn on, replace the battery pack.

If the charge indicator still does not turn on, replace the system board. Then reinstall the battery pack. If it is still not charged, go to the next section.

# Checking the battery pack

This system supports only batteries specially designed for this specific system and manufactured by Lenovo or an authorized builder. The system does not support unauthorized batteries or batteries designed for other systems. If an unauthorized battery or a battery designed for another system is installed, the system will not charge.

**Attention:** Lenovo has no responsibility for the performance or safety of unauthorized batteries, and provides no warranties for failures or damage arising out of their use.

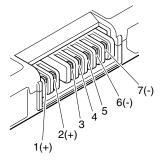

Battery charging does not start until the Power Manager Battery Gauge shows that less than 96% of the total power remains; under this condition the battery pack can charge to 100% of its capacity. This protects the battery pack from being overcharged or from having a shortened life.

To check your battery, move your cursor to the Power Manager Battery Gauge icon in the icon tray of the Windows taskbar and wait for a moment (but do not click), and the percentage of battery power remaining is displayed. To get detailed information about the battery, double-click the Power Manager Battery Gauge icon.

**Note:** If the battery pack becomes hot, it might not be able to charge. Remove it from the computer and leave it at room temperature for a while. After it cools down, reinstall and recharge it.

To check the battery pack, do the following:

- 1. Power off the computer.
- 2. Remove the battery pack and measure the voltage between battery terminals 1 (+) and 7 (-). See the following illustration:

Terminal	Voltage (V dc)
1	+ 0 to + 12.6
7	Ground (-)

3. If the voltage is less than +11.0 V dc, the battery pack has been discharged.

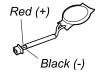

Note: Recharging will take at least 3 hours, even if the indicator does not turn on.

- If the voltage is still less than +11.0 V dc after recharging, replace the battery.
- 4. If the voltage is more than +11.0 V dc, measure the resistance between battery terminals 5 and 7. The resistance must be 4 to 30 K  $\Omega$ . If the resistance is not correct, replace the battery pack. If the resistance is correct, replace the system board.

# Checking the backup battery

Do the following:

- 1. Turn off the computer, and unplug the ac power adapter from it.
- 2. Turn the computer upside down.
- 3. Remove the battery pack. See "1010 Battery pack" on page 54.
- 4. Remove the backup battery. See "1070 Backup battery" on page 64.
- 5. Measure the voltage of the backup battery. See the following illustration.

Wire	Voltage (V dc)
Red	+2.5 to +3.2
Black	Ground

- If the voltage is correct, replace the system board.
- If the voltage is not correct, replace the backup battery.
- If the backup battery discharges quickly after replacement, replace the system board.

# Chapter 4. Related service information

This chapter presents following information:

- "Restoring the factory contents by using Recovery Disc Set" on page 29
- "Passwords" on page 31
- "Power management" on page 32
- "Symptom-to-FRU index" on page 34

### Service Web site:

When the latest maintenance diskette and the system program service diskette become available, they will be posted on http://www.lenovo.com/support.

## **Restoring the factory contents by using Product Recovery discs**

When the hard disk drive or solid-state drive is replaced because of a failure, no Product Recovery program is on the new drive. In this case, you must use the recovery discs for the computer. Order the recovery discs and the drive at the same time so that you can recover the new drive with the pre-installed software when they arrive. For information on which discs to order, see http://www.lenovo.com/serviceparts-lookup.

To install the factory contents by using Product Recovery discs, do the following:

**Note:** Recovery takes several hours. The length of time depends on the method you use. If you use recovery discs, recovery takes at least five hours.

- 1. Insert the bootable Start Recovery Disc into the DVD drive.
- 2. Select your language and click Next.
- 3. Read the license. If you agree with the terms, select I accept these terms and conditions and then click Next.
- 4. Insert the *Operating System Recovery Disc*, when prompted and click **Yes** to begin the operating system recovery process.
- 5. Insert the Product Recovery Disc, when prompted and click OK.
- 6. If you have a *Supplemental Recovery Disc*, insert it when prompted and click **Yes**. If you do not have a *Supplemental Recovery Disc*, click **No**.

**Note:** Not all recovery disc sets come with a *Supplemental Recovery Disc*. If there is a *Supplemental Recovery Disc*, it will be clearly marked as such.

7. When all of the data has been copied from the last disc in the set, a message is displayed prompting you to restart the computer. Remove the disc and then click **Yes**.

**Note:** The remainder of the recovery process is fully automated and no action is required by you. The computer will restart into the Windows desktop several times and you might experience periods when no activity is apparent on the screen for several minutes at a time. This is normal.

8. When the recovery process is complete, the Welcome to Microsoft Windows screen is displayed. Follow the instructions on the screen to complete the Windows setup.

# Restoring the factory contents by using Recovery Disc Set

When the hard disk drive or solid-state drive is replaced because of a failure, no product recovery program is on the new drive. In this case, you must use the Recovery Disc Set for the computer. Order the Recovery Disc Set and the drive at the same time so that you can recover the new drive with the pre-installed software when they arrive. For information on which discs to order, see http://www.lenovo.com/serviceparts-lookup.

The recovery disc set consists of the user instructions and the following set of DVDs to restore the computer to the original factory configuration.

Operating System Recovery Disc (one disc)	This disc restores the Microsoft <sup>®</sup> Windows operating system. Use this disc to start the recovery process.
Applications and Drivers Recovery Disc (one or more discs)	This disc restores the preinstalled applications and drivers on the computer.
Supplemental Recovery Disc	This disc contains additional content, such as updates to the software that was preinstalled on the computer. Not all recovery disc sets come with a <i>Supplemental Recovery Disc</i> .

### Notes:

- You must have a DVD drive to use the recovery discs. If you do not have an internal DVD drive, you can use an external USB DVD drive.
- During the recovery process, all data on the drive will be deleted. If possible, copy any important data or personal files that you want to keep onto removable media or a network drive before you start the recovery process.

To restore the computer to the original factory configuration using the recovery disc set, do the following:

**Note:** Recovery can take one to two hours to complete. The length of time depends on the method you use. If you use recovery discs, the recovery process will take about two hours.

- 1. Make the CD/DVD drive the first startup device in the startup sequence using the following procedure:
  - a. Press and hold down the F1 key, and then turn on the computer. When the logo screen is displayed or if you hear repeating beeps, release the F1 key. The ThinkPad Setup program opens.
  - b. Use the arrow keys to select **Startup**  $\rightarrow$  **Boot**.
  - c. Select the CD/DVD drive as the **1st Boot Device**.
- 2. Insert the Operating System Recovery Disc into the DVD drive.
- 3. Press F10 to save the ThinkPad Setup configuration changes. Follow the instructions on the screen to begin the recovery process.
- 4. Select your language and click Next.
- 5. Read the license. If you agree with the terms and conditions, select **I accept these terms and conditions** and then click **Next**. If you do not agree with the terms and conditions, follow the instructions on the screen.
- 6. Click Yes in the displayed window to begin the operating system recovery process.
- 7. Insert the *Applications and Drivers Recovery Disc*, when prompted and then click **OK** to begin the applications and drivers recovery process.
- 8. If you have a *Supplemental Recovery Disc*, insert it when prompted and click **Yes**. If you do not have a *Supplemental Recovery Disc*, click **No**.
- 9. When all of the data has been copied from the last disc in the set and has been processed, remove the disc and restart the computer.

**Note:** The rest of the recovery process is fully automated and no action is required by you. The computer will restart into the Microsoft Windows desktop several times and you might experience periods when no activity is apparent on the screen for several minutes at a time. This is normal.

- 10. When the recovery process is complete, the Set Up Windows screen is displayed. Follow the instructions on the screen to complete the Windows setup.
- 11. After you have completed the Windows setup, you might want to restore the original startup sequence. Start ThinkPad Setup and then press F9 to restore the default settings. Press F10 to save and exit ThinkPad Setup.

Note: After restoring a drive to the factory default settings, you might need to reinstall some device drivers.

#### Passwords

As many as three passwords might be needed for a ThinkPad notebook computer: the power-on password, the hard disk password, and the supervisor password.

If any of these passwords has been set, a prompt for it will be displayed on the screen whenever the computer is turned on. The computer does not start until the password is entered.

**Note:** If only a supervisor password is set, the password prompt will not be displayed when the operating system is started.

#### **Power-on password**

A power-on password protects the system from being turned on by an unauthorized person. The password must be entered before the operating system can be started. For instructions on how to remove the power-on password, see "How to remove the power-on password" on page 31.

## Hard disk password

There are two hard disk passwords:

- User hard disk password for the user
- Master hard disk password for the system administrator, who can use it to get access to the hard disk even if the user has changed the user hard disk password.

**Note:** There are two modes for the hard disk password: **User only** and **Master + User**. The **Master + User** mode requires two hard disk passwords; the system administrator enters both in the same operation. The system administrator then provides the user hard disk password to the system user.

**Attention:** If the user hard disk password has been forgotten, check whether a master hard disk password has been set. If a master hard disk password has been set, it can be used to access the hard disk drive. If no master hard disk password is available, neither Lenovo nor Lenovo authorized service technicians provide any services to reset either the user hard disk password or the master hard disk password, or to recover data from the hard disk drive. The hard disk drive can be replaced for a scheduled fee.

For instructions on how to remove the hard disk password, see "How to remove the hard disk password" on page 32.

## Supervisor password

A supervisor password protects the system information stored in the ThinkPad Setup program. The user must enter the supervisor password in order to get access to the ThinkPad Setup program and change the system configuration.

**Attention:** If the supervisor password has been forgotten and cannot be made available to the service technician, there is no service procedure to reset the password. The system board must be replaced for a scheduled fee.

#### How to remove the power-on password

To remove the power-on password, do one of the following:

If no supervisor password has been set, do the following to remove the power-on password:

1. Turn off the computer.

- 2. Remove the battery pack. For instructions on how to remove the battery pack, see "1010 Battery pack" on page 54.
- 3. Remove the backup battery. For instructions on how to remove the backup battery, see "1070 Backup battery" on page 64.
- 4. Turn on the computer and wait until the POST ends. After the POST ends, the password prompt will not be displayed. The power-on password has been removed.
- 5. Reinstall the backup battery and the battery pack.

If a supervisor password has been set and is known to the service technician, do the following to remove the power-on password:

- 1. Turn on the computer.
- 2. When the ThinkPad logo is displayed, immediately press F1.
- 3. Type the supervisor password to enter the ThinkPad Setup program.
- 4. Select Security.
- 5. Select Password.
- 6. Select Power-On Password.
- 7. Type the current supervisor password in the **Enter Current Password** field. Then, leave the **Enter New Password** field blank, and press Enter twice.
- 8. In the Changes have been saved window, press Enter.
- 9. Press Fn+F10 to save changes and exit the ThinkPad Setup program.

## How to remove the hard disk password

**Attention:** If **User only** mode is selected and the user hard disk password has been forgotten and cannot be made available to the service technician, neither Lenovo nor Lenovo authorized service technicians provide any services to reset the user hard disk password, or to recover data from the hard disk drive. The hard disk drive can be replaced for a scheduled fee.

To remove a user hard disk password that has been forgotten, when the supervisor password and the master hard disk password are known, do the following:

- 1. Turn on the computer.
- 2. When the ThinkPad logo is displayed, immediately press F1 to enter the ThinkPad Setup program.
- 3. Select Security.
- 4. Select **Password**.
- 5. Select **Hard-disk** *x* **password**, where *x* is the letter of the hard disk drive. A pop-up window opens.
- 6. Select Master HDP, where HDP stands for hard disk password.
- 7. Type the current master hard disk password in the Enter Current Password field. Then, leave the Enter New Password field blank, and press Enter twice.
- 8. Press Fn+F10 to save changes and exit the ThinkPad Setup program. The user hard disk password and the master hard disk password have been removed.

#### **Power management**

To reduce power consumption, the computer has three power management modes: screen blank, sleep, and hibernation.

## Screen blank mode

To put the computer into screen blank mode, do as follows:

1. Right-click the Power Manager Battery Gauge in the task bar.

2. Select Power off display (keep current power plan).

To end screen blank mode and resume normal operation, press any key.

## Sleep mode

When the computer enters sleep mode, the following events occur in addition to what occurs in screen blank mode:

- The LCD is powered off.
- The hard disk drive is powered off.
- The microprocessor stops.

In certain circumstances, the computer goes into sleep mode automatically:

• If a "suspend time" has been set on the timer, and the user does not do any operation with the keyboard, the TrackPoint, the hard disk, the parallel connector, or the diskette drive within that time.

**Note:** Even if you do not set the low-battery alarm, the charge indicator notifies you when the battery is low, and then the computer enters the power-saving mode automatically.

To cause the computer to return from sleep mode and resume operation, do one of the following:

- Press the Fn key.
- Open the LCD cover.
- Turn on the power switch.

Also, in either of the following events, the computer automatically returns from sleep mode and resumes operation:

- The ring indicator (RI) is signaled by a serial device or a PC Card device.
- The time set on the resume timer elapses.

**Note:** The computer does not accept any input immediately after it enters sleep mode. Wait a few seconds before taking any action to reenter operation mode.

## **Hibernation mode**

In hibernation mode, the following occurs:

- The system status, RAM, VRAM, and setup data are stored on the hard disk.
- The system is powered off.

To cause the computer to enter hibernation mode, do the following:

If you have defined one of the following actions as the event that causes the system to go into hibernation mode, perform that action.

- Closing the lid.
- Pressing the power button.

Also, the computer goes into hibernation mode automatically in either of the following conditions:

- If a "hibernation time" has been set on the timer, and if the user does not do any operation with the keyboard, the TrackPoint, the hard disk drive, the parallel connector, or the diskette drive within that time.
- If the timer conditions are satisfied in suspend mode.

When the power is turned on, the computer returns from hibernation mode and resumes operation. The hibernation file in the boot record on the hard disk drive is read, and system status is restored from the hard disk drive.

## Symptom-to-FRU index

This section contains following information:

- "Numeric error codes" on page 34 ٠
- "Error messages" on page 35 •
- "No-beep symptoms" on page 35
- "LCD-related symptoms" on page 35 •
- "Intermittent problems" on page 36 •
- "Undetermined problems" on page 36 ٠

The symptom-to-FRU index in this section lists symptoms and errors and their possible causes. The most likely cause is listed first, in boldface type.

Note: Do the FRU replacement or other actions in the sequence shown in the column headed "FRU or action, in sequence." If replacing a FRU does not solve the problem, put the original part back in the computer. Do not replace a nondefective FRU.

This index can also help you determine, during regular servicing, what FRUs are likely to need to be replaced next.

A numeric error is displayed for each error detected in POST or system operation. In the displays, n can be any number.

If no numeric code is displayed, check the narrative descriptions of symptoms. If the symptom is not described there, go to "Intermittent problems" on page 36.

Note: For a device not supported by diagnostic codes in the ThinkPad notebook computers, see the manual for that device.

## Numeric error codes

Table 1. Numeric error codes

Symptom or error (beeps, if any)

Symptom or error (beeps, if any)	FRU or action, in sequence
<b>0187</b> EAIA data access error-The access to EEPROM is failed. (two short beeps)	System board.
<b>0189</b> Invalid RFID configuration information area—The EEPROM checksum is not correct. (two short beeps)	System board.
<b>0190</b> Critical low-battery error (two short beeps)	<ol> <li>Charge the battery pack.</li> <li>Battery pack.</li> </ol>
<b>0191</b> System Security—Invalid Remote Change requested.	<ol> <li>Run the ThinkPad Setup program, and then save current setting by pressing F10.</li> <li>System board.</li> </ol>
<b>0251</b> System CMOS checksum bad – Default configuration used. (two short beeps)	<ol> <li>Charge the backup battery for more than 8 hours by connecting the ac power adapter.</li> <li>Replace the backup battery and run the ThinkPad Setup program to reset the time and date.</li> </ol>

Table 1. Numeric error codes (continued)

Symptom or error (beeps, if any)	FRU or action, in sequence
<b>0271</b> Date and time error—Neither the date nor the time is set in the computer. (two short beeps)	Run the ThinkPad Setup program to reset the time and date.
<b>1802</b> Unauthorized network card is plugged in—Turn off and remove the miniPCI network card. (two short beeps)	<ol> <li>Remove the Mini PCI network card.</li> <li>System board.</li> </ol>

## **Error messages**

Table 2. Error messages

Symptom or error (beeps, if any)	FRU or action, in sequence
Fan error. (four short beeps, one long beep)	<ol> <li>Fan.</li> <li>Thermal grease.</li> <li>System board.</li> </ol>
The battery installed is not supported by this system and will not charge. Please replace the battery with the correct Lenovo battery for this system. Press the ESC key to continue.	Replace the battery.

## **No-beep symptoms**

Table 3. No-beep symptoms

Symptom or error	FRU or action, in sequence	
No beep, power-on indicator on, LCD blank, and no POST.	<ol> <li>Make sure that every connector is connected tightly and correctly.</li> <li>DIMM.</li> <li>System board.</li> </ol>	
No beep, power-on indicator on, and LCD blank during POST.	<ol> <li>Reseat DIMM.</li> <li>System board.</li> </ol>	
The power-on password prompt appears.	A power-on password or a supervisor password is set. Type the password and press <b>Enter</b> .	
The hard-disk password prompt appears.	A hard-disk password is set. Type the password and press <b>Enter</b> .	

## **LCD-related symptoms**

**Important:** The TFT LCD for the notebook computer contains many thin-film transistors (TFTs). The presence of a small number of dots that are missing, discolored, or always lighted is characteristic of TFT LCD technology, but excessive pixel problems can cause viewing concerns.

If the LCD you are servicing has two or less visible defective pixels, it should not be considered faulty. However, if the LCD has three or more visible defective pixels, it will be deemed as defective by Lenovo and it should be replaced.

#### Notes:

- This policy applies to all ThinkPad notebooks purchased on 1 January, 2008 or later.
- Lenovo will not provide replacement if the LCD is within specification as we cannot guarantee that any replacement LCD will have zero pixel defects.

• One pixel consists of R, G, B sub-pixels.

Symptom or error	FRU or action, in sequence
No beep, power-on indicator on, and a blank LCD during POST.	System board.
<ul> <li>LCD backlight not working.</li> <li>LCD too dark.</li> <li>LCD brightness cannot be adjusted.</li> <li>LCD contrast cannot be adjusted.</li> </ul>	<ol> <li>Reseat the LCD connectors.</li> <li>LCD assembly.</li> <li>System board.</li> </ol>
<ul> <li>LCD screen unreadable.</li> <li>Characters missing pixels.</li> <li>Screen abnormal.</li> <li>Wrong color displayed.</li> </ul>	<ol> <li>See important note for "LCD-related symptoms."</li> <li>Reseat all LCD connectors.</li> <li>LCD assembly.</li> <li>System board.</li> </ol>
Horizontal or vertical lines displayed on LCD.	LCD assembly.

## Intermittent problems

Intermittent system hang problems can be due to a variety of causes that have nothing to do with a hardware defect, such as cosmic radiation, electrostatic discharge, or software errors. FRU replacement should be considered only when a problem recurs.

When analyzing an intermittent problem, do the following:

- 1. Run the diagnostic test for the system board in loop mode at least 10 times.
- 2. If no error is detected, do not replace any FRUs.
- 3. If any error is detected, replace the FRU shown by the FRU code. Rerun the test to verify that no more errors exist.

## **Undetermined problems**

If the diagnostic tests did not identify the adapter or device that has failed, if wrong devices are installed, or if the system simply is not operating, follow these procedures to isolate the failing FRU. Do not isolate FRUs that have no defects.

Verify that all attached devices are supported by the computer.

Verify that the power supply being used at the time of the failure is operating correctly. See "Power system checkout" on page 26.

- 1. Turn off the computer.
- 2. Visually check each FRU for damage. Replace any damaged FRU.
- 3. Remove or disconnect all of the following devices:
  - a. Non-ThinkPad devices
    - b. Printer, mouse, and other external devices
  - c. Battery pack
  - d. Hard disk drive
  - e. External diskette drive or optical drive
  - f. Memory module
  - g. Optical disk or diskette in the internal drive
  - h. PC Cards
- 4. Turn on the computer.
- 5. Determine whether the problem has been solved.
- 6. If the problem does not recur, reconnect the removed devices one at a time until you find the failing FRU.
- 7. If the problem remains, replace the following FRUs one at a time:

#### a. System board

b. LCD assembly

# Chapter 5. Status indicators

This chapter presents the system status indicators that show the status of the computer.

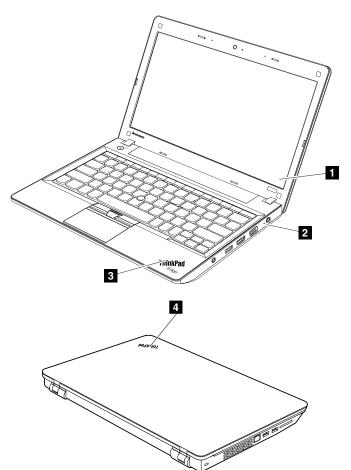

Table 5.	Status	indicators

Indicator	Meaning
Caps Lock status indicator	When the Caps Lock mode is enabled, the Caps Lock status indicator is displayed on the screen. You can type all alphabetic characters (A-Z) in uppercase directly.
<ul><li>2 Power status indicator</li></ul>	<ul> <li>Green: The ac power adapter is connected.</li> <li>Off: The ac power adapter is not connected.</li> </ul>

Table 5. Status indicators (continued)

Indicator	Meaning
System status indicator	<ul> <li>The illuminated dot in the ThinkPad logo on the outer lid of the computer and on the keyboard bezel assembly works as a system status indicator: it shows whether the computer is in sleep, hibernation, or normal mode.</li> <li>Red: The computer is on (in normal mode).</li> <li>Fast blinking red: The computer is entering sleep or hibernation mode.</li> <li>Slow blinking red: The computer is in sleep mode.</li> </ul>
4 System status indicator	Off: The computer is off or in hibernation mode.
THIMPad	

# Chapter 6. Special keys

The computer comes with several special keys at the upper row of the keyboard. To use each function, directly press the desired key.

The following table explains the function of each special key.

Table 6. Special keys

Special key	Description
Speaker mute (F1)	Press this key to mute the sound of the computer. To turn on the sound, press this key again, or press the speaker volume down key or the speaker volume up key.
₽ <sub>F1</sub>	
Speaker volume down (F2)	Press this key to turn down the volume of the computer.
Speaker volume up (F3)	Press this key to turn up the volume of the computer.
<b>LL</b> + <sub>F3</sub>	
Microphone mute (F4)	Press the microphone mute key to mute or unmute all of the recording devices.
K F4	
Launching the camera and audio settings (F5)	Press this key to open the camera and audio settings window. Change the camera and audio settings from this window as desired.
Switching the display output location (F6)	Press this key to switch between the computer display and an external monitor.
	<b>Note:</b> To switch between the computer display and an external monitor, the Windows+P key combination also is available.
	When you prove this key, the computer display becomes dimmer
Display brightness down (F7)	When you press this key, the computer display becomes dimmer.
<b>O V</b> <sub>F7</sub>	
Display brightness up (F8)	When you press this key, the computer display becomes brighter.

#### Table 6. Special keys (continued)

Special key	Description
Wireless radio control (F9)	<ul> <li>Press this key to enable or disable the built-in wireless networking features.</li> <li>Notes: If you want to use this key to enable or disable the wireless features, the following device drivers must be installed on your computer beforehand:</li> <li>Power Management Driver</li> <li>On Screen Display Utility</li> <li>Wireless device drivers</li> </ul>
Previous track/scene (F10)	Use these keys for multimedia control.
Play/Pause (F11)	
Next track/scene (F12)	

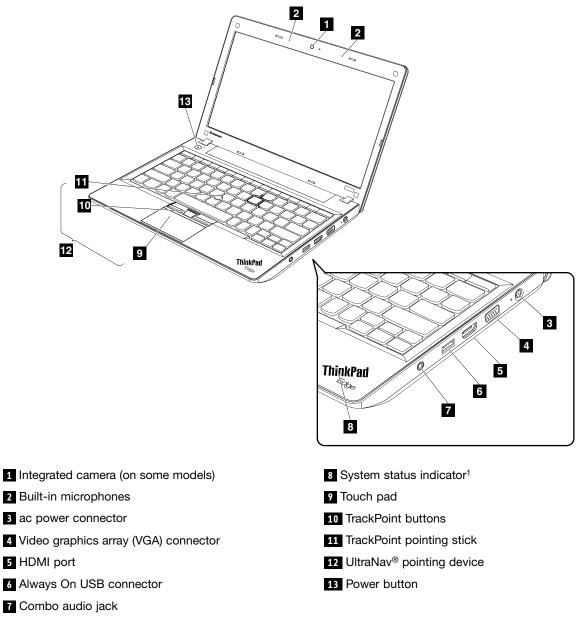

# Chapter 7. Locations

This chapter introduces the locations of the hardware components on your computer.

## Locating computer controls, connectors, and indicators

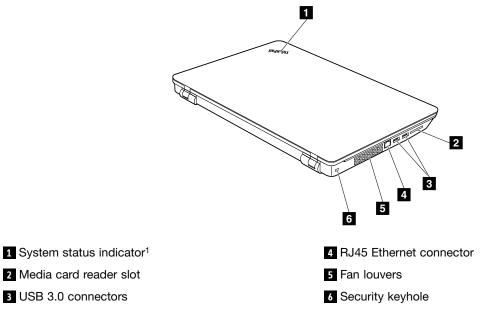

This topic introduces the locations of the computer controls, connectors, and indicators.

#### **Front view**

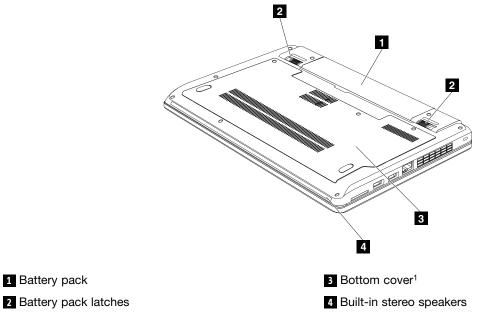

<sup>1</sup>: For the description of the indicator, see Chapter 5 "Status indicators" on page 39.

## **Rear view**

<sup>1</sup>: For the description of the indicator, see Chapter 5 "Status indicators" on page 39.

<sup>1</sup>: The hard disk drive, solid-state drive, memory module, wireless LAN card, wireless WAN card, mSATA solid-state drive, and the backup battery are located underneath the bottom cover.

## **Bottom view**

## Locating FRUs and CRUs

This topic introduces the following service parts:

- "Major FRUs and CRUs" on page 46
- "Locating FRUs and CRUs" on page 45

#### Notes:

• Each FRU is available for all types or models, unless otherwise specified.

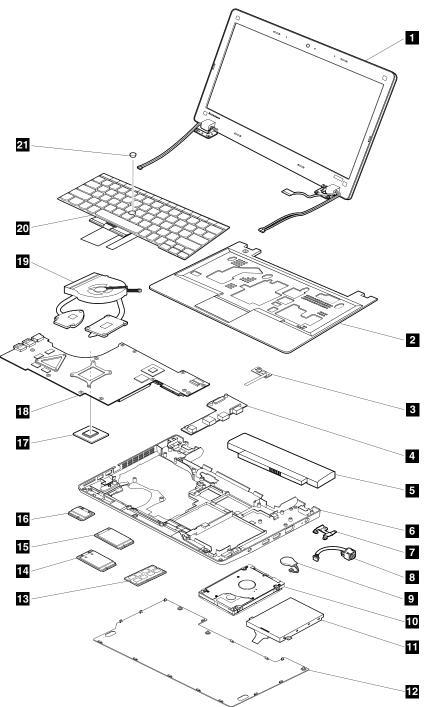

#### • CRU statement for customers:

You can resolve some problems with your product with a replacement part you can install yourself, called a "Customer Replaceable Unit" or "CRU." Some CRUs are designated as self-service CRUs and others are designated as optional-service CRUs. *Installation of self-service CRUs is your responsibility. For optional-service CRUs, you can either install the CRU yourself or you can request that a Service Provider install the CRU according to the warranty service for your product.* If you intend on installing the CRU, Lenovo will ship the CRU to you. CRU information and replacement instructions are shipped with your product and are available from Lenovo at any time upon request. You can find a list of CRUs for your product in this Hardware Maintenance Manual. An electronic version of this manual can be found at http://www.lenovo.com/support. Click **User Guides & Manuals** and then follow the on-screen instructions to find the manual for your product. You might be required to return the defective part that is replaced by the CRU. When return is required: (1) return instructions, a prepaid shipping label, and a container will be included with the replacement CRU; and (2) you might be charged for the replacement CRU if Lenovo does not receive the defective CRU within thirty (30) days of your receipt of the replacement CRU. See your Lenovo Limited Warranty documentation for full details.

ThinkPad computers contain the following types of CRUs:

- Self-service CRUs: These CRUs unplug or are held by no more than two screws. Examples of these types
  of CRUs include the ac power adapter, power cord, battery, and hard disk drive. Other self-service CRUs
  depending on product design might include the memory module, wireless card, keyboard, and palm rest
  with finger print reader and touch pad.
- Optional-service CRUs: These CRUs are isolated parts within the computer that are concealed by an access
  panel that is typically secured by more than two screws. Once the access panel is removed, the specific
  CRU is visible.

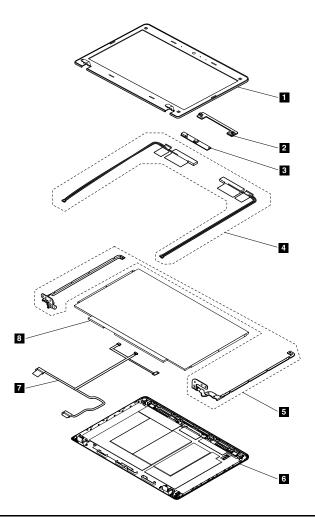

# **Major FRUs and CRUs**

No.	FRU descriptions	Self-service CRU	Optional service CRU
1	LCD unit	No	No
2	Keyboard bezel assembly	No	No
3	Power button sub card	No	No
4	VGA sub card	No	No

No.	FRU descriptions	Self-service CRU	Optional service CRU
5	Battery pack	Yes	No
6	Base cover assembly	No	No
7	DC-in sub card	No	No
8	DC-in cable	No	No
9	Backup battery	Yes	No
10	Hard disk drive (on some models)	Yes	No
11	Solid-state drive (on some models)	Yes	No
12	Bottom cover	Yes	No
13	Memory module	Yes	No
14	Wireless WAN card (on some models)	Yes	No
15	mSATA solid-state drive (on some models)	No	No
16	Wireless LAN card	Yes	No
17	Microprocessor	No	No
18	System board	No	No
19	Thermal fan assembly	No	No
20	Keyboard	Yes	No
21	TrackPoint cap	Yes	No

## **LCD FRUs**

No.	FRU descriptions	Self-service CRU	Optional service CRU
1	LCD bezel assembly	No	No
2	Microphone sub card	No	No
3	Integrated camera (on some models)	No	No
4	Antenna kit	No	No
5	Hinge kit	No	No
6	LCD rear cover assembly	No	No
7	LCD cable assembly	No	No
8	LCD panel	No	No

# Chapter 8. FRU replacement notices

This chapter presents notices related to removing and replacing parts. Read this chapter carefully before replacing any FRU.

#### **CRU statement for customers:**

You can resolve some problems with your product with a replacement part you can install yourself, called a "Customer Replaceable Unit" or "CRU." Some CRUs are designated as self-service CRUs and others are designated as optional-service CRUs. *Installation of self-service CRUs is your responsibility. For optional-service CRUs, you can either install the CRU yourself or you can request that a Service Provider install the CRU according to the warranty service for your product.* If you intend on installing the CRU, Lenovo will ship the CRU to you. CRU information and replacement instructions are shipped with your product and are available from Lenovo at any time upon request. You can find a list of CRUs for your product in this *Hardware Maintenance Manual*. An electronic version of this manual can be found at http://www.lenovo.com/support. Click **User Guides & Manuals** and then follow the on-screen instructions to find the manual for your product. You might be required to return the defective part that is replaced by the CRU. When return is required: (1) return instructions, a prepaid shipping label, and a container will be included with the replacement CRU; and (2) you might be charged for the replacement CRU. See your Lenovo Limited Warranty documentation for full details.

#### **Screw notices**

Loose screws can cause a reliability problem. In the ThinkPad notebook computer, this problem is addressed with special nylon-coated screws that have the following characteristics:

- They maintain tight connections.
- They do not easily come loose, even with shock or vibration.
- They are harder to tighten.

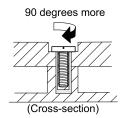

Do the following when you service this machine:

- Keep the screw kit in your tool bag. For the part number of the screw kit, go to http://www.lenovo.com/serviceparts-lookup.
- It is recommended to use new screws.
- It is recommended to use each screw only once.

#### Tighten screws as follows:

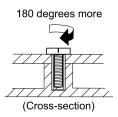

• Plastic to plastic

Turn an additional 90 degrees after the screw head touches the surface of the plastic part.

#### • Logic card to plastic

Turn an additional 180 degrees after the screw head touches the surface of the logic card.

#### Notes:

- Ensure that you use the correct screw. It is recommended to use new screws for replacements. If you have a torque screwdriver, tighten all screws firmly to the torque specified in the screw information table for each step.
- Ensure that torque screwdrivers are calibrated correctly following country specifications.

## **Retaining serial numbers**

This topic provides instructions on the following:

- "Restoring the serial number of the system unit" on page 50
- "Retaining the UUID" on page 51
- "Reading or writing the ECA information" on page 51

## Restoring the serial number of the system unit

When the computer was manufactured, the EEPROM on the system board was loaded with the serial numbers of the system and all major components. These numbers need to remain the same throughout the life of the computer.

If you replace the system board, you must restore the serial number of the system unit to its original value.

Before replacing the system board, save the original serial number by doing the following:

- 1. Install the LENOVO ThinkPad Hardware Maintenance Diskette Version 1.76 or later, and restart the computer.
- 2. From the main menu, select 1. Set System Identification.
- 3. Select **2. Read S/N data from EEPROM**. The serial number of the system unit is listed as **20: Serial number**.
- 4. Write down that number.

Note: The serial number of the system unit also is written on the label attached to the bottom of the computer.

After you have replaced the system board, restore the serial number by doing the following:

- 1. Install the LENOVO ThinkPad Hardware Maintenance Diskette Version 1.76 or later and restart the computer.
- 2. From the main menu, select 1. Set System Identification.
- 3. Select 1. Add S/N data from EEPROM. Follow the instructions on the screen.

If the MTM and Product ID numbers differ from each other on the rear label, use what is shown for the Product ID field. See the following example:

#### MTM on the rear label:

TTTT-CTO S/N SSSSSSS

#### Product ID on the rear label:

TTTT-MMM (Use this number when setting Serial Number)

In the example, the Serial Number to be input is "1STTTTMMMSSSSSSS".

## **Retaining the UUID**

The Universally Unique Identifier (UUID) is a 128-bit number uniquely assigned to your computer at production and stored in the EEPROM of your system board. The algorithm that generates the number is designed to provide unique IDs until the year A.D. 3400. No two computers in the world have the same number.

When you replace the system board, you must set the UUID on the new system board by doing the following:

- 1. Install the LENOVO ThinkPad Hardware Maintenance Diskette Version 1.76 or later, and restart the computer.
- 2. From the main menu, select **4.** Assign UUID. A new UUID is created and written. If a valid UUID already exists, it will not be overwritten.

## Reading or writing the ECA information

Information on Engineering Change Announcements (ECA) are stored in the EEPROM of the system board. The electronic storage of this information simplifies the procedure to check if the ECA has been previously applied to a machine. The machine does not need to be disassembled to check for the ECA application.

To check what ECAs have been previously applied to the machine, use the ECA Information Read/Write function on the LENOVO ThinkPad Hardware Maintenance Diskette Version 1.76 or later.

- 1. Insert the LENOVO ThinkPad Hardware Maintenance Diskette Version 1.76 or later, and restart the computer.
- 2. From the main menu, select 6. Set ECA Information.
- 3. To read the ECA information, select **2. Read ECA/rework number from EEPROM** and follow the instructions on the screen.
- 4. To read the box build date, select **5. Read box build date from EEPROM**, and follow the instructions on the screen.

After an ECA has been applied to the machine, the EEPROM must be updated to reflect the ECA's application. Use the LENOVO ThinkPad Hardware Maintenance Diskette Version 1.76 or later to update the EEPROM.

**Note:** Only the ECA number is stored in the EEPROM. The machine type of the ECA is assumed to be the same as the machine type of the machine that had the ECA applied to it.

- 1. Insert the LENOVO ThinkPad Hardware Maintenance Diskette Version 1.76 or later, and restart the computer.
- 2. From the main menu, select 6. Set ECA Information.
- 3. To write the ECA information, select **1. Write ECA/rework number from EEPROM**, and follow the instructions on the screen.
- 4. To write the box build date, select **4. Write box build date from EEPROM**, and follow the instruction on the screen.

If the system board is being replaced, try to read the ECA information from the old system board and transfer the information to the new system. If the system board is inoperable, this will not be possible.

# Chapter 9. Removing or replacing a FRU

This chapter provides instructions on how to remove or replace a FRU.

#### **CRU** statement for customers:

You can resolve some problems with your product with a replacement part you can install yourself, called a "Customer Replaceable Unit" or "CRU." Some CRUs are designated as self-service CRUs and others are designated as optional-service CRUs. *Installation of self-service CRUs is your responsibility. For optional-service CRUs, you can either install the CRU yourself or you can request that a Service Provider install the CRU according to the warranty service for your product.* If you intend on installing the CRU, Lenovo will ship the CRU to you. CRU information and replacement instructions are shipped with your product and are available from Lenovo at any time upon request. You can find a list of CRUs for your product in this *Hardware Maintenance Manual*. An electronic version of this manual can be found at http://www.lenovo.com/support. Click **User Guides & Manuals** and then follow the on-screen instructions to find the manual for your product. You might be required to return the defective part that is replaced by the CRU. When return is required: (1) return instructions, a prepaid shipping label, and a container will be included with the replacement CRU; and (2) you might be charged for the replacement CRU if Lenovo does not receive the defective CRU within thirty (30) days of your receipt of the replacement CRU. See your Lenovo Limited Warranty documentation for full details.

## **General guidelines**

When removing or replacing a FRU, be sure to observe the following general guidelines:

- 1. Do not try to service any computer unless you have been trained and certified. An untrained person runs the risk of damaging parts.
- 2. Before replacing any FRU, review Chapter 8 "FRU replacement notices" on page 49.
- Begin by removing any FRUs that have to be removed before replacing the failing FRU. Any such FRUs
  are listed at the beginning of each FRU replacement section. Remove them in the order in which they
  are listed.
- 4. Follow the correct sequence in the steps for removing a FRU, as given in the drawings by the numbers in square callouts.
- 5. When turning a screw, turn it in the direction as given by the arrow in the drawing.
- 6. When removing a FRU, move it in the direction as given by the arrow in the drawing.
- 7. To put the new FRU in place, reverse the removal procedure and follow any notes that pertain to replacement.
- 8. When replacing a FRU, use the correct screws as shown in the replacement procedures.

Before removing any FRU, turn off the computer, unplug all power cords from electrical outlets, remove the battery pack, and then disconnect any interconnecting cables.

**Attention:** After replacing a FRU, do not turn on the computer until you have made sure that all screws, springs, and other small parts are in place and none are loose inside the computer. Verify this by shaking the computer gently and listening for rattling sounds. Metallic parts or metal flakes can cause electrical short circuits.

**Attention:** The system board is sensitive to, and can be damaged by, electrostatic discharge. Before touching it, establish personal grounding by touching a ground point with one hand or by using an electrostatic discharge (ESD) strap.

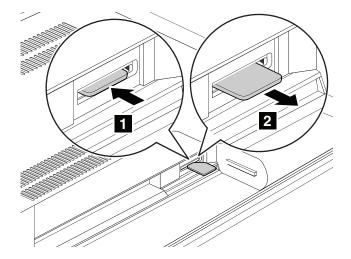

## Before servicing your computer

Carefully read this topic before servicing the computer.

## **Removing the SIM card**

The computer you are servicing might have the SIM card that the customer has installed. If the computer you are servicing has the SIM card, remove it before you start the servicing.

To remove the SIM card, you need to remove the battery pack first. See "1010 Battery pack" on page 54.

After you finish the servicing, ensure that you insert the card back into the slot firmly.

## 1010 Battery pack

#### Important notices for replacing a battery pack:

This system supports only batteries specially designed for this specific system and manufactured by Lenovo or an authorized builder. The system does not support unauthorized batteries or batteries designed for other systems. If an unauthorized battery or a battery designed for another system is installed, the system will not charge.

Attention: Lenovo has no responsibility for the performance or safety of unauthorized batteries, and provides no warranties for failures or damage arising out of their use.

The Lenovo Solution Center program provides an automatic battery diagnostic test that determines if the battery pack is defective. A battery pack FRU should not be replaced unless this diagnostic test shows that the battery is defective. The only exception to this is if the battery pack is physically damaged or a customer is reporting a possible safety issue.

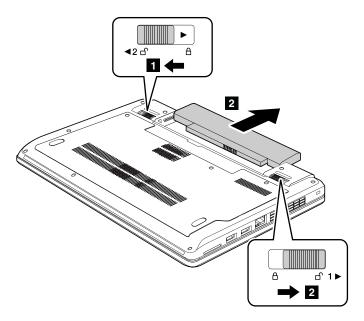

If the Lenovo Solution Center program is not installed in the computer, the customer should download this program before a non-physically damaged battery pack is replaced. Note that the replacement of a physically damaged battery pack is not covered by the warranty.

Removal steps of battery pack

Use only the authorized battery specified for your computer. Any other battery could ignite or explode.

Slide the left battery latch to the unlocked position **1**. Hold the right battery latch to the unlocked position and remove the battery pack **2**.

#### When installing:

Install the battery pack in the slot. Ensure that the left battery latch is in the locked position.

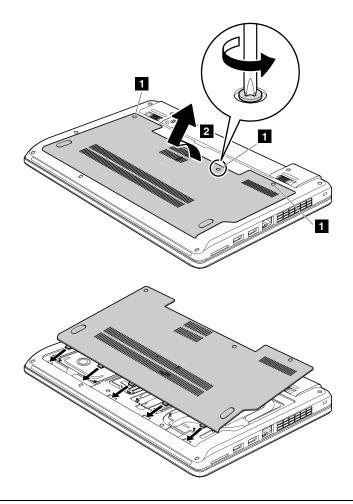

#### 1020 Bottom cover

For access, remove this FRU:

• "1010 Battery pack" on page 54

#### Removal steps of bottom cover

Note: Loosen the screws 1.

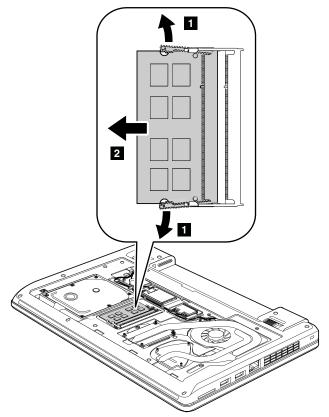

# 1030 Memory module

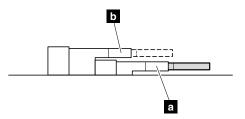

For access, remove these FRUs in order:

- "1010 Battery pack" on page 54
- "1020 Bottom cover" on page 55

Removal steps of memory module

**Note:** If only one memory module is to be installed on the computer you are servicing, the memory module must be installed in the lower slot **a**, but not in the upper slot **b**.

#### When installing:

Insert the notched end of the memory module into the slot. Press the memory module in firmly, and pivot it until it snaps into place. Ensure that it is firmly installed in the slot and does not move easily.

## 1040 Hard disk drive or solid-state drive

For access, remove these FRUs in order:

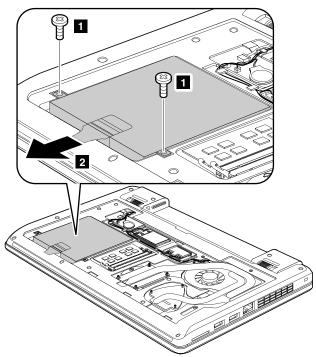

- "1010 Battery pack" on page 54
- "1020 Bottom cover" on page 55

#### Attention:

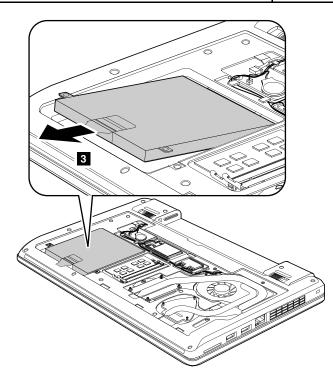

- Do not drop the drive or apply any physical shock to it. The drive is sensitive to physical shock. Improper handling can cause damage and permanent loss of data.
- Before removing the drive, have the user make a backup copy of all the information on it if possible.

• Never remove the drive while the computer is operating or in suspend mode.

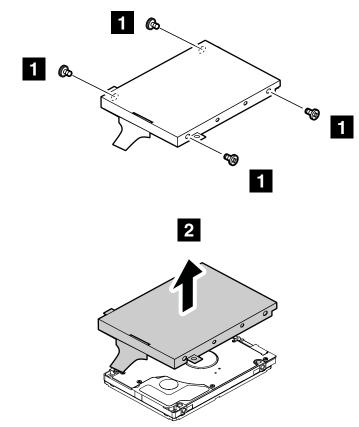

#### Removal steps of hard disk drive or solid-state drive

Step	Screw (quantity)	Color	Torque
1	M2 $\times$ 3.5 mm, flat-head, nylon-coated (2)	Black	0.181 Nm (1.85 kgfcm)

Removal steps of bracket

Step	Screw (quantity)	Color	Torque
1	M3 $\times$ 2.8 mm, flat-head, nylon-coated (4)	Black	0.392 Nm (4 kgfcm)

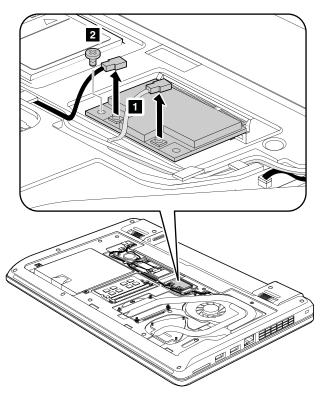

# 1050 PCI Express Mini Card for wireless LAN

For access, remove these FRUs in order:

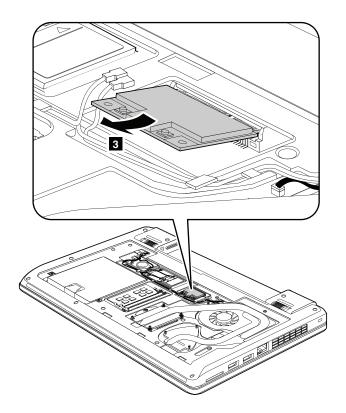

- "1010 Battery pack" on page 54
- "1020 Bottom cover" on page 55

#### Removal steps of PCI Express Mini Card for wireless LAN

In step 1, unplug the connectors by using the removal tool antenna RF connector or pick the connectors with your fingers and gently unplug them in the direction of the arrows.

Step	Screw (quantity)	Color	Torque
2	M2 $\times$ 3.5 mm, flat-head, nylon-coated (1)	Black	0.181 Nm (1.85 kgfcm)

#### When installing:

Plug the gray cable into the connector marked **MAIN** or **M**, and the black cable into the connector marked **AUX** or **A** on the card.

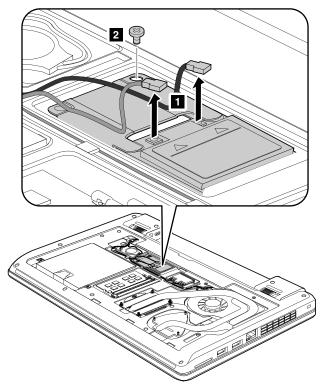

# 1060 PCI Express Half Mini Card for wireless WAN or mSATA solid-state drive

For access, remove these FRUs in order:

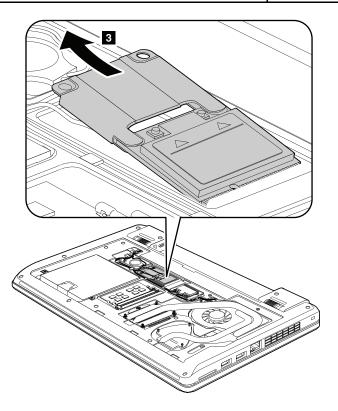

- "1010 Battery pack" on page 54
- "1020 Bottom cover" on page 55

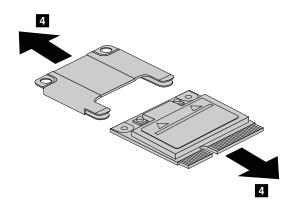

The computer you are servicing might come with a PCI Express Half Mini Card for wireless WAN, or a mSATA solid-state drive.

#### Removal steps of PCI Express Half Mini Card for wireless WAN

Step	Screw (quantity)	Color	Torque
2	M2 $\times$ 3.5 mm, small-head, nylon-coated (1)	Black	0.181 Nm (1.85 kgfcm)

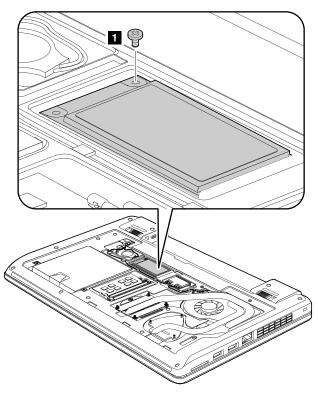

#### When installing:

Plug the orange cable into the connector marked **MAIN**, and the blue cable into the connector marked **AUX** on the card.

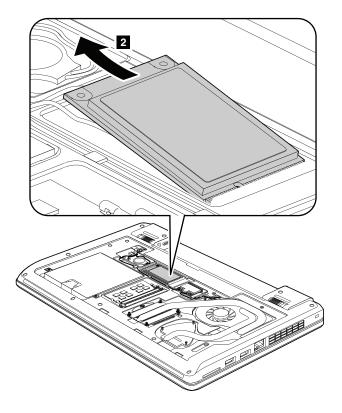

#### Removal steps of mSATA solid-state drive

#### Attention:

- Do not drop the drive or apply any physical shock to it. The drive is sensitive to physical shock. Improper handling can cause damage and permanent loss of data.
- Never remove the drive while the computer is operating or in suspend mode.
- After installing the drive, go to http://www.lenovo.com/support for instructions on configuring the drive.

Step	Screw (quantity)	Color	Torque
1	M2 $\times$ 3.5 mm, small-head, nylon-coated (1)	Black	0.181 Nm (1.85 kgfcm)

## 1070 Backup battery

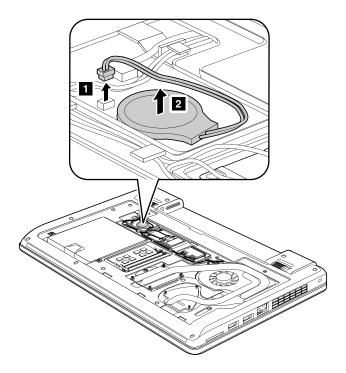

For access, remove these FRUs in order:

- "1010 Battery pack" on page 54
- "1020 Bottom cover" on page 55

#### Removal steps of backup battery

Use only the authorized battery specified for your computer. Any other battery could ignite or explode.

#### When installing:

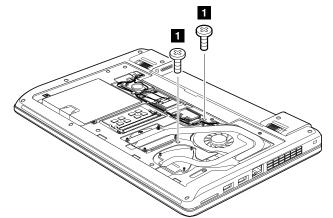

Ensure that the connector is attached firmly.

## 1080 Keyboard

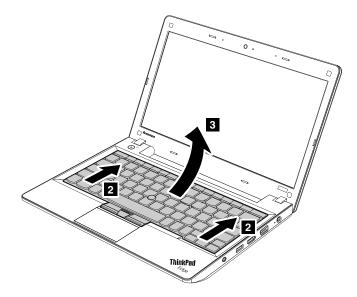

For access, remove these FRUs in order:

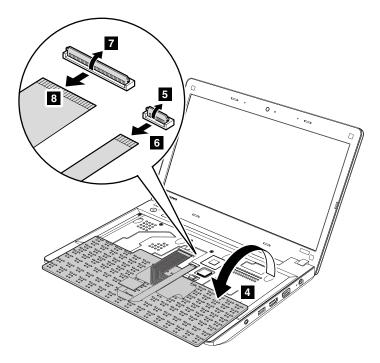

- "1010 Battery pack" on page 54
- "1020 Bottom cover" on page 55

#### Removal steps of keyboard

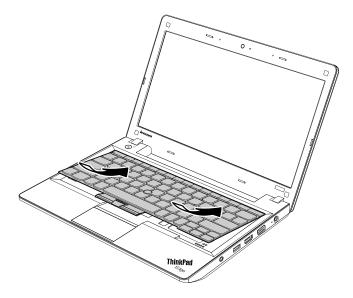

Step	Screw (quantity)	Color	Torque
1	M2 $\times$ 6 mm, flat-head, nylon-coated (2)	Black	0.181 Nm (1.85 kgfcm)

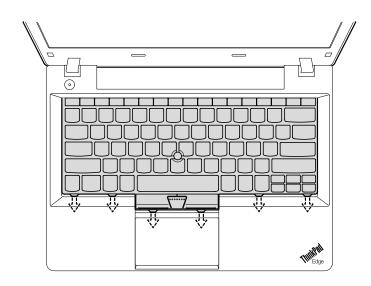

When installing: Ensure that the keyboard connectors are attached firmly.

**When installing:** Attach the keyboard so that the hooks on the front edge of the keyboard are under the frame as shown in the following illustration. When the front edge of the keyboard is housed firmly, gently press the keys with your palms to slide the keyboard towards you until it snaps into position.

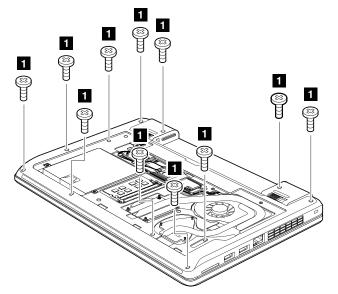

## 1090 Keyboard bezel assembly and power button sub card

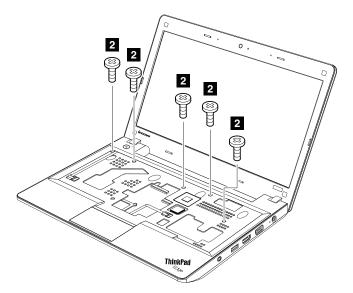

For access, remove these FRUs in order:

- "1010 Battery pack" on page 54
- "1020 Bottom cover" on page 55
- "1080 Keyboard" on page 65

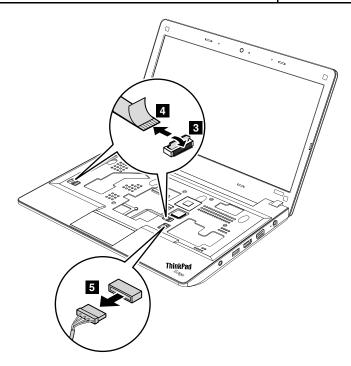

#### Removal steps of keyboard bezel assembly

Step	Screw (quantity)	Color	Torque
1	M2 $\times$ 6 mm, flat-head, nylon-coated (11)	Black	0.181 Nm (1.85 kgfcm)

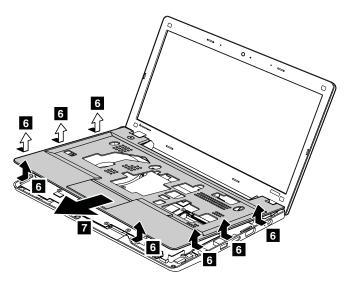

Step	Screw (quantity)	Color	Torque
2	M2 $\times$ 6 mm, big-head, nylon-coated (5)	Black	0.181 Nm (1.85 kgfcm)

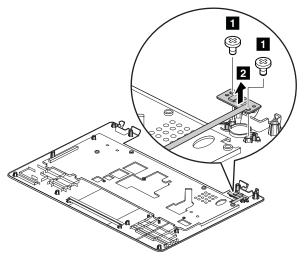

## When installing:

Ensure that the connectors are attached firmly.

In step **6**, release the keyboard bezel assembly from the frame as shown in the following illustration by using a plastic pry tool, and remove the keyboard bezel assembly in the direction shown by the arrow **7**.

Removal steps of power button sub card

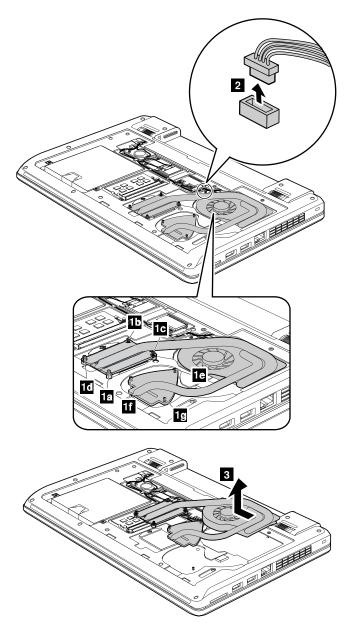

Step	Screw (quantity)	Color	Torque
1	M2 $\times$ 3.5 mm, flat-head, nylon-coated (2)	Black	0.181 Nm (1.85 kgfcm)

## 1100 Thermal fan assembly

- "1010 Battery pack" on page 54
- "1020 Bottom cover" on page 55
- "1040 Hard disk drive or solid-state drive" on page 57
- "1050 PCI Express Mini Card for wireless LAN" on page 59
- "1060 PCI Express Half Mini Card for wireless WAN or mSATA solid-state drive" on page 61
- "1080 Keyboard" on page 65
- "1090 Keyboard bezel assembly and power button sub card" on page 68

#### Removal steps of thermal fan assembly

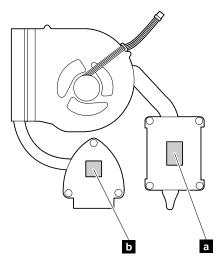

Loosen the screws 1 in ascending alphabetic order as illustrated.

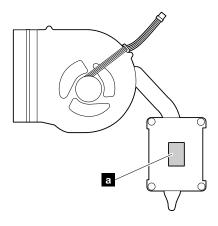

#### When installing:

- Before you attach the thermal pipes to the computer, apply thermal grease, at an amount of 0.2 grams, on the part marked and b as shown in the following illustrations. Either too much or too less application of grease can cause a thermal problem due to imperfect contact with a component.
- Ensure that the connector is attached firmly to the system board.

For models that have a discrete graphics card:

For models that have an integrated graphics card:

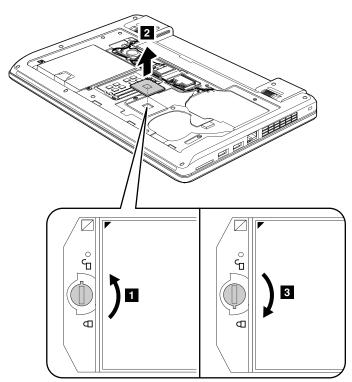

## **1110 Microprocessor**

- "1010 Battery pack" on page 54
- "1020 Bottom cover" on page 55
- "1100 Thermal fan assembly" on page 70

#### Removal steps of microprocessor

**Attention:** The microprocessor is extremely sensitive. When you service the microprocessor, avoid any kind of rough handling.

Rotate the head of the screw in the direction shown by the arrow **1** to release the lock; then remove the microprocessor **2**.

When installing: Place the microprocessor above the microprocessor socket, and then rotate the head of the screw in the direction shown by the arrow **3** to secure the microprocessor.

## 1120 System board assembly and VGA sub card

#### Important notices for handling the system board:

When handling the system board, bear the following in mind:

• The system board has an accelerometer, which can be broken if several thousands of G-forces are applied.

**Note:** Dropping a system board from a height of as little as six inches so that it falls flat on a hard bench can subject the accelerometer to as much as 6,000 G's of shock.

- Be careful not to drop the system board on a bench top that has a hard surface, such as metal, wood, or composite.
- Avoid rough handling of any kind.
- At every point in the process, be sure not to drop or stack the system board.
- If you put a system board down, be sure to put it only on a padded surface such as an ESD mat or a corrugated conductive surface.

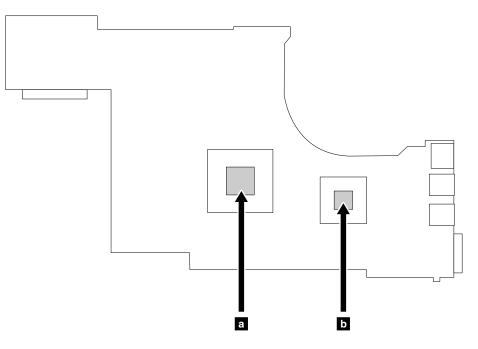

- "1010 Battery pack" on page 54
- "1020 Bottom cover" on page 55
- "1040 Hard disk drive or solid-state drive" on page 57

- "1050 PCI Express Mini Card for wireless LAN" on page 59
- "1060 PCI Express Half Mini Card for wireless WAN or mSATA solid-state drive" on page 61
- "1080 Keyboard" on page 65
- "1090 Keyboard bezel assembly and power button sub card" on page 68
- "1100 Thermal fan assembly" on page 70
- "1110 Microprocessor" on page 72

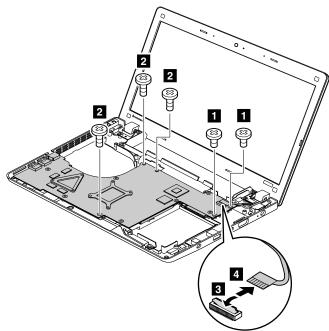

The following components soldered on the top side of the system board are extremely sensitive. When you service the system board, avoid any kind of rough handling.

- a Microprocessor
- **b** Graphics Processing Unit (GPU)

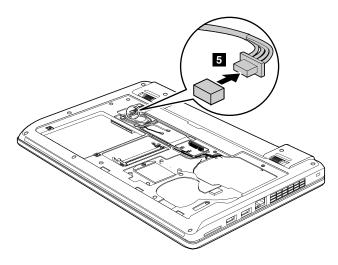

Note: The GPU is only for models that have a discrete graphics card.

## Removal steps of system board assembly

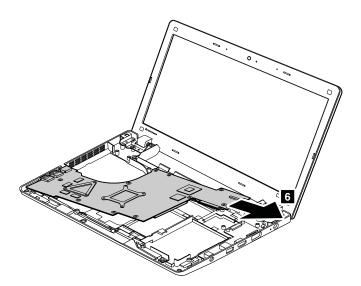

Step	Screw (quantity)	Color	Torque
1	M2 $\times$ 3.5 mm, flat-head, nylon-coated (2)	Black	0.181 Nm (1.85 kgfcm)
2	M2 $\times$ 6 mm, flat-head, nylon-coated (3)	Black	0.181 Nm (1.85 kgfcm)

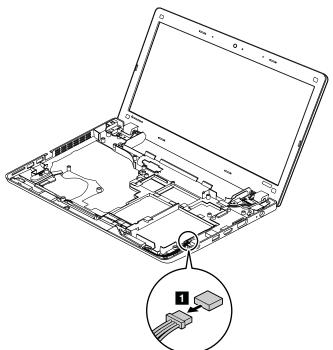

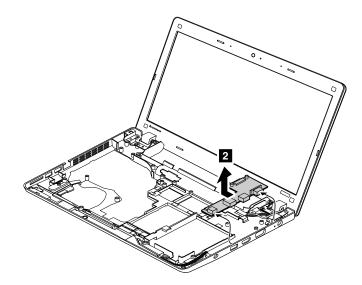

## When installing:

Ensure that the connectors are attached firmly.

Removal steps of VGA sub card

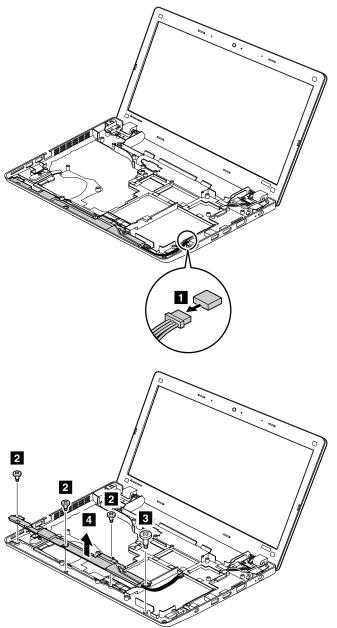

#### When installing:

Ensure that the cables are attached to the cable guides firmly.

## **1130 Speaker assembly**

- "1010 Battery pack" on page 54
- "1020 Bottom cover" on page 55
- "1040 Hard disk drive or solid-state drive" on page 57
- "1050 PCI Express Mini Card for wireless LAN" on page 59
- "1060 PCI Express Half Mini Card for wireless WAN or mSATA solid-state drive" on page 61
- "1080 Keyboard" on page 65
- "1090 Keyboard bezel assembly and power button sub card" on page 68
- "1100 Thermal fan assembly" on page 70
- "1110 Microprocessor" on page 72
- "1120 System board assembly and VGA sub card" on page 73

Removal steps of speaker assembly

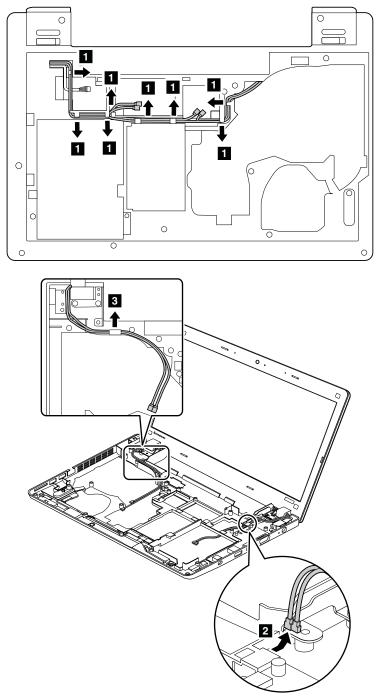

Step	Screw (quantity)	Color	Torque
2	M2 $\times$ 3.5 mm, flat-head, nylon-coated (3)	Black	0.181 Nm (1.85 kgfcm)
3	M3 $\times$ 2.8 mm, flat-head, nylon-coated (1)	Black	0.181 Nm (1.85 kgfcm)

## 2010 LCD unit, DC-in cable, and base cover assembly

- "1010 Battery pack" on page 54
- "1020 Bottom cover" on page 55
- "1040 Hard disk drive or solid-state drive" on page 57

- "1050 PCI Express Mini Card for wireless LAN" on page 59
- "1060 PCI Express Half Mini Card for wireless WAN or mSATA solid-state drive" on page 61
- "1080 Keyboard" on page 65
- "1090 Keyboard bezel assembly and power button sub card" on page 68
- "1100 Thermal fan assembly" on page 70
- "1120 System board assembly and VGA sub card" on page 73

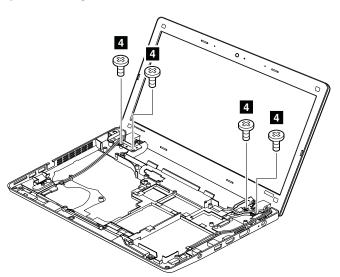

#### Removal steps of LCD unit

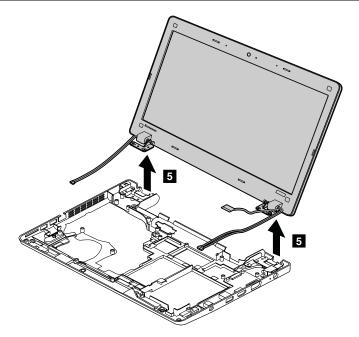

#### When installing:

• Ensure that the cables are attached to the cable guides firmly.

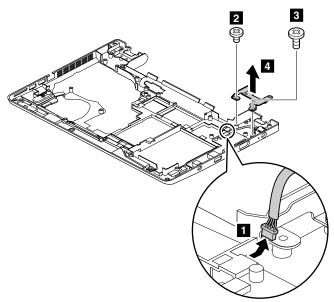

• When you route the cables, ensure that they are not subject to any tension. Tension could cause the cables to be damaged by the cable guides, or a wire to be broken.

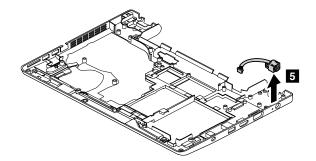

Step	Screw (quantity)	Color	Torque
4	M2.5 ×4.5 mm, flat-head, nylon-coated (4)	Black	0.392 Nm (4 kgfcm)

#### Removal steps of DC-in cable

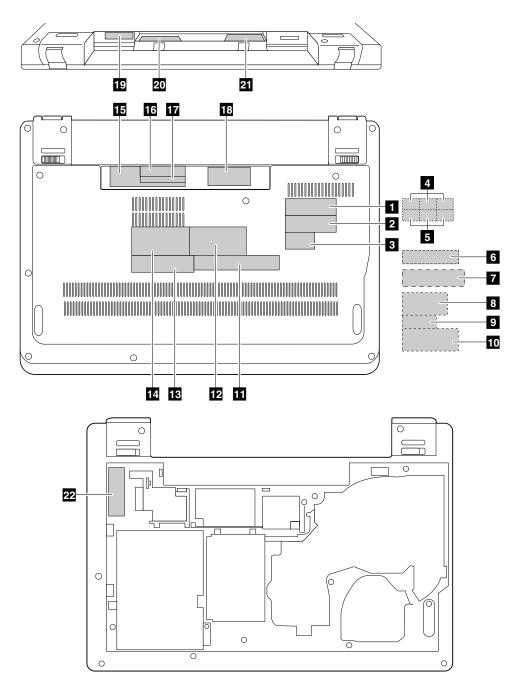

Step	Screw (quantity)	Color	Torque
2	M2 ×3.5 mm, flat-head, nylon-coated (1)	Black	0.392 Nm (4 kgfcm)
3	M2 $\times$ 6 mm, flat-head, nylon-coated (1)	Black	0.392 Nm (4 kgfcm)

## Applying labels to the base cover:

The new base cover FRU is shipped with a kit containing labels of several kinds.

The following illustrations show the location of each label.

**Note:** If the Windows Certificate of Authentication (COA) label **18** is attached to a part that is replaced, return the old part with the label attached to the customer, or provide a letter to the customer stating what the label was originally on the computer and what the label part number, serial number, and product key were.

When you replace the base cover, apply the following labels:

15 Homologation label	19 FCC label
-----------------------	--------------

The following labels need to be peeled off from the old base cover, and need to be put on the new base cover.

1 Wireless card label for Brazil	11 Wireless label for special bid
2 Bluetooth label for Brazil	12 Asset tag

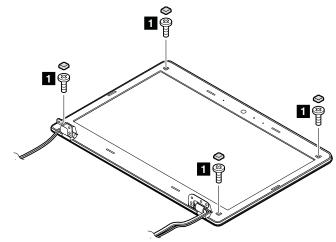

3 Wireless WAN label for Brazil	13 Indonesia rating label or non-encryption label
4 SIRIM label	14 Asset tag
5 Indonesia POSTEL label	16 System barcode label
6 Israel label	17 Taiwan Wireless WAN label
7 China Telecom label	20 Certification label 1
8 China 3G Wireless WAN label	21 Certification label 2
9 China Wireless WAN label (for PCR models)	22 Warning label
10 China 3G logo WWAN label	

## 2020 LCD bezel assembly

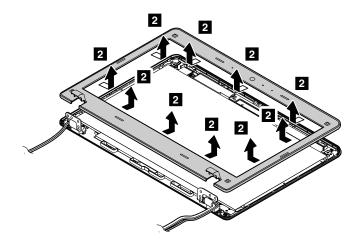

For access, remove these FRUs in order:

- "1010 Battery pack" on page 54
- "1020 Bottom cover" on page 55
- "1040 Hard disk drive or solid-state drive" on page 57
- "1050 PCI Express Mini Card for wireless LAN" on page 59
- "1060 PCI Express Half Mini Card for wireless WAN or mSATA solid-state drive" on page 61
- "1080 Keyboard" on page 65
- "1090 Keyboard bezel assembly and power button sub card" on page 68
- "1100 Thermal fan assembly" on page 70
- "2010 LCD unit, DC-in cable, and base cover assembly" on page 78

## Removal steps of LCD bezel assembly

Step	Screw cap	Screw (quantity)	Color	Torque
1		M2.5 $\times$ 4.5 mm, flat-head, nylon-coated (4)	Black	0.181 Nm (1.85 kgfcm)

#### When installing:

Ensure that all the latches are attached firmly. Then secure the bezel with the screws.

## 2030 LCD panel and hinges

For access, remove these FRUs in order:

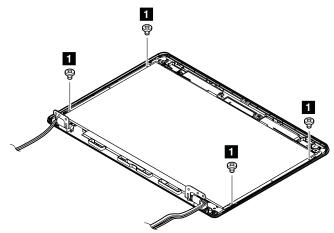

- "1010 Battery pack" on page 54
- "1020 Bottom cover" on page 55
- "1040 Hard disk drive or solid-state drive" on page 57
- "1050 PCI Express Mini Card for wireless LAN" on page 59
- "1060 PCI Express Half Mini Card for wireless WAN or mSATA solid-state drive" on page 61
- "1080 Keyboard" on page 65
- "1090 Keyboard bezel assembly and power button sub card" on page 68
- "1100 Thermal fan assembly" on page 70
- "2010 LCD unit, DC-in cable, and base cover assembly" on page 78
- "2020 LCD bezel assembly" on page 83

#### Important notices on handling the LCD panel:

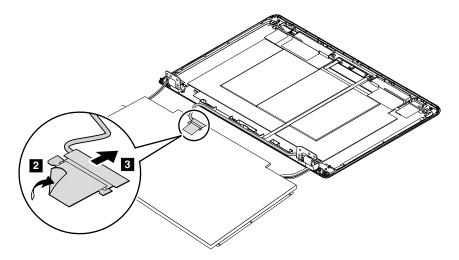

The LCD panel and the peripheral parts used in this product are very sensitive. Improper handling of the LCD panel can cause damage to the parts, and might cause a system malfunction such as a missing dot, missing line, or pixel problems.

- Do not apply any kind of pressure to the LCD panel.
- When you lift the LCD panel, always hold the edges of the panel with both of your hands. Do not hold the panel with one hand or apply any kind of pressure to the surface of the panel.
- Do not touch or apply any kind of pressure to the printed circuit board.

## Removal steps of LCD panel

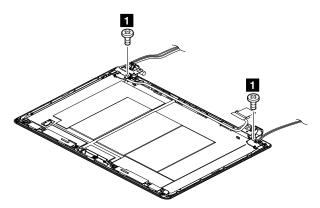

Step	Screw (quantity)	Color	Torque
1	M2 $\times$ 3 mm, flat-head, nylon-coated (4)	Black	0.181 Nm (1.85 kgfcm)

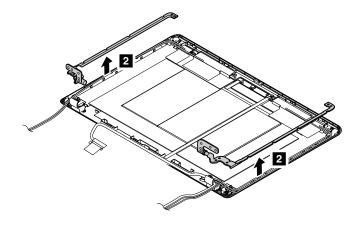

## When installing:

Ensure that the LCD cable assembly connector is attached firmly.

## **Removal steps of hinges**

Step	Screw (quantity)	Color	Torque
1	M2 x 3.5 mm, flat-head, nylon-coated (2)	Black	0.181 Nm (1.85 kgfcm)

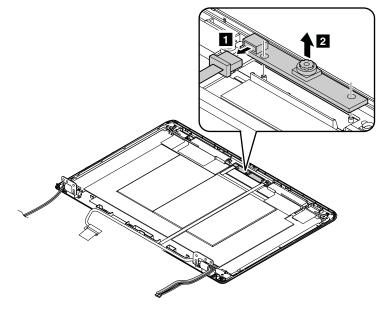

## 2040 Integrated camera

For access, remove these FRUs in order:

- "1010 Battery pack" on page 54
- "1020 Bottom cover" on page 55
- "1040 Hard disk drive or solid-state drive" on page 57
- "1050 PCI Express Mini Card for wireless LAN" on page 59
- "1060 PCI Express Half Mini Card for wireless WAN or mSATA solid-state drive" on page 61
- "1080 Keyboard" on page 65
- "1090 Keyboard bezel assembly and power button sub card" on page 68
- "1100 Thermal fan assembly" on page 70
- "2010 LCD unit, DC-in cable, and base cover assembly" on page 78
- "2020 LCD bezel assembly" on page 83
- "2030 LCD panel and hinges" on page 84

#### Removal steps of integrated camera

#### When installing:

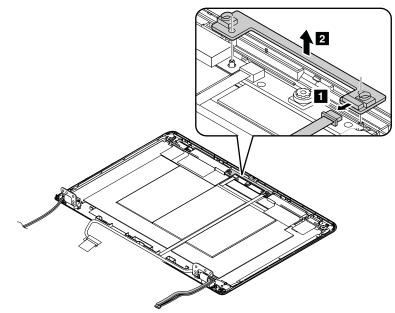

Ensure that the connector is attached firmly.

## 2050 Microphone

For access, remove these FRUs in order:

- "1010 Battery pack" on page 54
- "1020 Bottom cover" on page 55
- "1040 Hard disk drive or solid-state drive" on page 57
- "1050 PCI Express Mini Card for wireless LAN" on page 59
- "1060 PCI Express Half Mini Card for wireless WAN or mSATA solid-state drive" on page 61
- "1080 Keyboard" on page 65
- "1090 Keyboard bezel assembly and power button sub card" on page 68
- "1100 Thermal fan assembly" on page 70
- "2010 LCD unit, DC-in cable, and base cover assembly" on page 78
- "2020 LCD bezel assembly" on page 83
- "2030 LCD panel and hinges" on page 84

#### **Removal steps of microphone**

#### When installing:

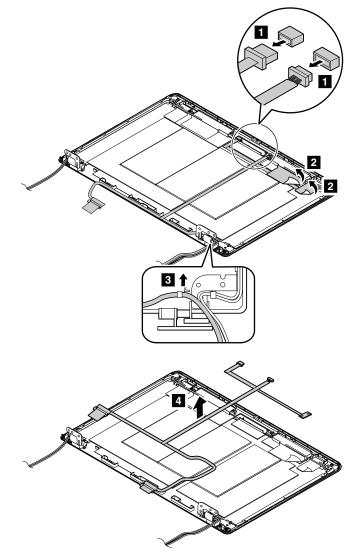

Ensure that the connector is attached firmly.

## 2060 LCD cable assembly

- "1010 Battery pack" on page 54
- "1020 Bottom cover" on page 55
- "1040 Hard disk drive or solid-state drive" on page 57
- "1050 PCI Express Mini Card for wireless LAN" on page 59
- "1060 PCI Express Half Mini Card for wireless WAN or mSATA solid-state drive" on page 61
- "1080 Keyboard" on page 65
- "1090 Keyboard bezel assembly and power button sub card" on page 68

- "1100 Thermal fan assembly" on page 70
- "2010 LCD unit, DC-in cable, and base cover assembly" on page 78
- "2020 LCD bezel assembly" on page 83
- "2030 LCD panel and hinges" on page 84

#### Removal steps of LCD cable assembly

## 2070 Wireless LAN antenna assembly, wireless WAN antenna assembly, and LCD rear cover assembly

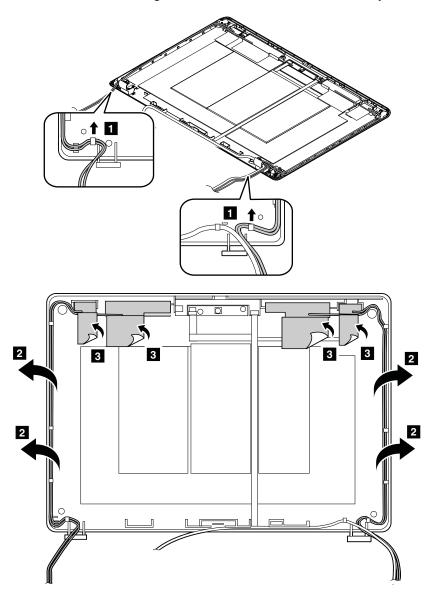

- "1010 Battery pack" on page 54
- "1020 Bottom cover" on page 55
- "1040 Hard disk drive or solid-state drive" on page 57
- "1050 PCI Express Mini Card for wireless LAN" on page 59
- "1060 PCI Express Half Mini Card for wireless WAN or mSATA solid-state drive" on page 61
- "1080 Keyboard" on page 65
- "1090 Keyboard bezel assembly and power button sub card" on page 68
- "1100 Thermal fan assembly" on page 70
- "2010 LCD unit, DC-in cable, and base cover assembly" on page 78

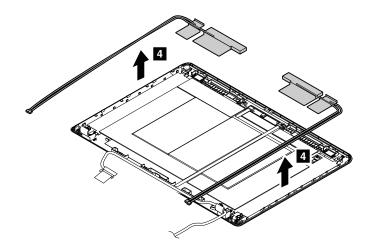

- "2020 LCD bezel assembly" on page 83
- "2030 LCD panel and hinges" on page 84
- "2040 Integrated camera" on page 86

## Removal steps of wireless LAN antenna assembly, wireless WAN antenna assembly, and LCD rear cover assembly

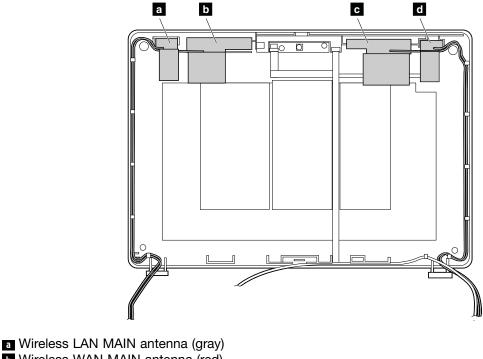

**Note:** Depending on the model, the antennas in your computer might look slightly different from the illustrations in this topic.

Release the antenna cables from the cable guides of the LCD rear cover assembly.

**Cable routing:** When you install the antenna assembly, route the cables as shown in the following illustration. As you route the cables, ensure that they are not subject to any tension. Tension could cause the cables to be damaged by the cable guides, or a wire to be broken.

b Wireless WAN MAIN antenna (red)
c Wireless WAN AUX antenna (blue)
d Wireless LAN AUX antenna (black)

Note: The model you are servicing might not have the wireless WAN antenna cables.

## Appendix A. Notices

Lenovo may not offer the products, services, or features discussed in this document in all countries. Consult your local Lenovo representative for information on the products and services currently available in your area.
