About this manual

This manual contains service and reference information for the following ThinkPad® notebook computers.

**ThinkPad L430**
- Machine Type (MT) 2464, 2465, 2466, 2468, and 2469

**ThinkPad L530**
- MT 2475, 2478, 2479, 2481, and 2485

Use this manual along with the advanced diagnostic tests to troubleshoot problems.

**Important:**

This manual is intended only for trained service technicians who are familiar with ThinkPad products. Use this manual along with the advanced diagnostic tests to troubleshoot problems effectively. Before servicing a ThinkPad product, be sure to read all the information under Chapter 1 “Safety information” on page 1 and Chapter 2 “Important service information” on page 27.
Chapter 1. Safety information

This chapter presents following safety information that you need to be familiar with before you service a ThinkPad notebook computer.

- “General safety” on page 1
- “Electrical safety” on page 2
- “Safety inspection guide” on page 3
- “Handling devices that are sensitive to electrostatic discharge” on page 3
- “Grounding requirements” on page 4
- “Safety notices (multilingual translations)” on page 4
- “Laser compliance statement (multilingual translations)” on page 19

General safety

Follow these rules to ensure general safety:

- Observe good housekeeping in the area of the machines during and after maintenance.
- When lifting any heavy object:
  1. Ensure that you stand safely without slipping.
  2. Distribute the weight of the object equally between your feet.
  3. Use a slow lifting force. Never move suddenly or twist when you attempt to lift.
  4. Lift by standing or by pushing up with your leg muscles; this action removes the strain from the muscles in your back. Do not attempt to lift any object that weighs more than 16 kg (35 lb) or that you think is too heavy for you.
- Do not perform any action that causes hazards to the customer, or that makes the equipment unsafe.
- Before you start the machine, ensure that other service technicians and the customer’s personnel are not in a hazardous position.
- Place removed covers and other parts in a safe place, away from all personnel, while you are servicing the machine.
- Keep your toolcase away from walk areas so that other people will not trip over it.
- Do not wear loose clothing that can be trapped in the moving parts of a machine. Ensure that your sleeves are fastened or rolled up above your elbows. If your hair is long, fasten it.
- Insert the ends of your necktie or scarf inside clothing or fasten it with a nonconductive clip, about 8 centimeters (3 inches) from the end.
- Do not wear jewelry, chains, metal-frame eyeglasses, or metal fasteners for your clothing.

Attention: Metal objects are good electrical conductors.

- Wear safety glasses when you are hammering, drilling, soldering, cutting wire, attaching springs, using solvents, or working in any other conditions that might be hazardous to your eyes.
- After service, reinstall all safety shields, guards, labels, and ground wires. Replace any safety device that is worn or defective.
- Reinstall all covers correctly before returning the machine to the customer.
- Fan louvers on the machine help to prevent overheating of internal components. Do not obstruct fan louvers or cover them with labels or stickers.
Electrical safety

Observe the following rules when working on electrical equipment.

Important:

Use only approved tools and test equipment. Some hand tools have handles covered with a soft material that does not insulate you when working with live electrical currents.

Many customers have, near their equipment, rubber floor mats that contain small conductive fibers to decrease electrostatic discharges. Do not use this type of mat to protect yourself from electrical shock.

• Find the room emergency power-off (EPO) switch, disconnecting switch, or electrical outlet. If an electrical accident occurs, you can then operate the switch or unplug the power cord quickly.

• Do not work alone under hazardous conditions or near equipment that has hazardous voltages.

• Disconnect all power before:
  – Performing a mechanical inspection
  – Working near power supplies
  – Removing or installing main units

• Before you start to work on the machine, unplug the power cord. If you cannot unplug it, ask the customer to power-off the wall box that supplies power to the machine, and to lock the wall box in the off position.

• If you need to work on a machine that has exposed electrical circuits, observe the following precautions:
  – Ensure that another person, familiar with the power-off controls, is near you to switch off the power, if necessary.
  – Use only one hand when working with powered-on electrical equipment; keep the other hand in your pocket or behind your back.

Attention: An electrical shock can occur only when there is a complete circuit. By observing the above rule, you can prevent a current from passing through your body.

  – When using testers, set the controls correctly and use the approved probe leads and accessories for that tester.
  – Stand on suitable rubber mats (obtained locally, if necessary) to insulate you from grounds such as metal floor strips and machine frames.

Observe the special safety precautions when you work with very high voltages; Instructions for these precautions are in the safety sections of maintenance information. Use extreme care when measuring high voltages.

• Regularly inspect and maintain your electrical hand tools for safe operational condition.

• Do not use worn or broken tools and testers.

• Never assume that power has been disconnected from a circuit. First, check that it has been powered off.

• Always look carefully for possible hazards in your work area. Examples of these hazards are moist floors, nongrounded power extension cables, power surges, and missing safety grounds.

• Do not touch live electrical circuits with the reflective surface of a plastic dental mirror. The surface is conductive; such touching can cause personal injury and machine damage.

• Do not service the following parts with the power on when they are removed from their normal operating places in a machine:
  – Power supply units
  – Pumps
  – Blowers and fans
  – Motor generators
  – Similar units to listed above

This practice ensures correct grounding of the units.

• If an electrical accident occurs:
– Use caution; do not become a victim yourself.
– Switch off power.
– Send another person to get medical aid.

Safety inspection guide

The purpose of this inspection guide is to assist you in identifying potentially unsafe conditions. As each machine was designed and built, required safety items were installed to protect users and service technicians from injury. This guide addresses only those items. You should use good judgment to identify potential safety hazards due to attachment of non-ThinkPad features or options not covered by this inspection guide.

If any unsafe conditions are present, you must determine how serious the apparent hazard could be and whether you can continue without first correcting the problem.

Consider these conditions and the safety hazards they present:

• Electrical hazards, especially primary power (primary voltage on the frame can cause serious or fatal electrical shock)
• Explosive hazards, such as a damaged CRT face or a bulging capacitor
• Mechanical hazards, such as loose or missing hardware

To determine whether there are any potentially unsafe conditions, use the following checklist at the beginning of every service task. Begin the checks with the power off, and the power cord disconnected.

Checklist:
1. Check exterior covers for damage (loose, broken, or sharp edges).
2. Power off the computer. Disconnect the power cord.
3. Check the power cord for:
   a. A third-wire ground connector in good condition. Use a meter to measure third-wire ground continuity for 0.1 ohm or less between the external ground pin and the frame ground.
   b. The power cord should be the authorized type specified for your computer. Go to: http://www.lenovo.com/serviceparts-lookup.
   c. Insulation must not be frayed or worn.
4. Check for cracked or bulging batteries.
5. Remove the cover.
6. Check for any obvious non-ThinkPad alterations. Use good judgment as to the safety of any non-ThinkPad alterations.
7. Check inside the unit for any obvious unsafe conditions, such as metal filings, contamination, water or other liquids, or signs of fire or smoke damage.
8. Check for worn, frayed, or pinched cables.
9. Check that the power-supply cover fasteners (screws or rivets) have not been removed or tampered with.

Handling devices that are sensitive to electrostatic discharge

Any computer part containing transistors or integrated circuits (ICs) should be considered sensitive to electrostatic discharge (ESD). ESD damage can occur when there is a difference in charge between objects. Protect against ESD damage by equalizing the charge so that the machine, the part, the work mat, and the person handling the part are all at the same charge.

Notes:
1. Use product-specific ESD procedures when they exceed the requirements noted here.
2. Ensure that the ESD protective devices you use have been certified (ISO 9000) as fully effective.

When handling ESD-sensitive parts:

- Keep the parts in protective packages until they are inserted into the product.
- Avoid contact with other people.
- Wear a grounded wrist strap against your skin to eliminate static on your body.
- Prevent the part from touching your clothing. Most clothing is insulative and retains a charge even when you are wearing a wrist strap.
- Use a grounded work mat to provide a static-free work surface. The mat is especially useful when handling ESD-sensitive devices.
- Select a grounding system, such as those listed below, to provide protection that meets the specific service requirement.

**Note:** The use of a grounding system to guard against ESD damage is desirable but not necessary.
- Attach the ESD ground clip to any frame ground, ground braid, or green-wire ground.
- When working on a double-insulated or battery-operated system, use an ESD common ground or reference point. You can use coax or connector-outside shells on these systems.
- Use the round ground prong of the ac plug on ac-operated computers.

---

**Grounding requirements**

Electrical grounding of the computer is required for operator safety and correct system function. Proper grounding of the electrical outlet can be verified by a certified electrician.

---

**Safety notices (multilingual translations)**

The safety notices in this section are provided in the following languages:

- English
- Arabic
- Brazilian Portuguese
- French
- German
- Hebrew
- Japanese
- Korean
- Spanish
- Traditional Chinese

---

**DANGER**

Before the computer is powered on after FRU replacement, make sure that all screws, springs, and other small parts are in place and are not left loose inside the computer. Verify this by shaking the computer and listening for rattling sounds. Metallic parts or metal flakes can cause electrical short circuits.
DANGER

Some standby batteries contain a small amount of nickel and cadmium. Do not disassemble a standby battery, recharge it, throw it into fire or water, or short-circuit it. Dispose of the battery as required by local ordinances or regulations. Use only the battery in the appropriate parts listing. Use of an incorrect battery can result in ignition or explosion of the battery.

DANGER

The battery pack contains small amounts of nickel. Do not disassemble it, throw it into fire or water, or short-circuit it. Dispose of the battery pack as required by local ordinances or regulations. Use only the battery in the appropriate parts listing when replacing the battery pack. Use of an incorrect battery can result in ignition or explosion of the battery.

DANGER

The lithium battery can cause a fire, an explosion, or a severe burn. Do not recharge it, remove its polarized connector, disassemble it, heat it above 100°C (212°F), incinerate it, or expose its cell contents to water. Dispose of the battery as required by local ordinances or regulations. Use only the battery in the appropriate parts listing. Use of an incorrect battery can result in ignition or explosion of the battery.

DANGER

If the LCD breaks and the fluid from inside the LCD gets into your eyes or on your hands, immediately wash the affected areas with water for at least 15 minutes. Seek medical care if any symptoms from the fluid are present after washing.

DANGER

To avoid shock, do not remove the plastic cover that protects the lower part of the inverter card.

DANGER

Though the main batteries have low voltage, a short-circuited or grounded battery can produce enough current to burn personnel or combustible materials.
DANGER

Unless hot swap is allowed for the FRU being replaced, do as follows before removing it: power off the computer, unplug all power cords from electrical outlets, remove the battery pack, and disconnect any interconnecting cables.

주의

FRU를 교체할 때는 홉 스왑이 가능한 경우가 아니라면, 다음을 따르십시오: 컴퓨터를 꺼고 전원 코드를 전원 소켓에서 분리하고 배터리 팩을 제거하고, 어떤 인터컨넥팅 케이블도 분리하십시오.

주의

배터리에는 전용의 전원 리튬 이온이나 칼슘 리튬이온이 포함되어 있습니다. 이 전원을 제대로 보관하거나 불에 담그는 것은 고정된 화재 위험을 초래할 수 있습니다. 또한 이 전원은 보관할 때도 수분에 노출되지 않도록 주의해야 합니다. 제조업체의 지시를 따르면 안전하게 사용할 수 있습니다. 배터리가 잘못 사용될 경우 화재나 폭발의 위험이 있습니다.

주의

전원 리튬 이온이나 칼슘 리튬이온에는 수분에 노출되지 않도록 주의해야 합니다. 또한, 이 전원은 보관할 때도 수분에 노출되지 않도록 주의해야 합니다. 제조업체의 지시를 따르면 안전하게 사용할 수 있습니다. 배터리가 잘못 사용될 경우 화재나 폭발의 위험이 있습니다.
قد تُسبب بطارية الليثيوم في حدوث حريق أو انفجار أو حدوث حرائق شديدة. لا تقم بإعادة شحن البطارية أو إزالة موصول الاستقطاب الخاص بها ولا تحاول أيضاً فكها أو تسخينها لأكثر من 100 درجة مئوية (212 درجة فهرنهايت) أو حرقها أو تعريض محتوياتها الخشنة الخاصة بها للماء. قد بالتخلص من البطارية وفقاً لما هو موضح في القوانين المحلية. استخدم نوع البطارية المحدد والذي يوصى باستخدامه. حيث أنه قد يؤدي استخدام نوع بطارية غير صحيح إلى اشتعالها أو انفجارها.

هذا ما انكسرت شاشة LCD ولمس السائل الداخلي عينيك أو يديك، ثم في الحال بسلهما بالماء لمدة لا تقل عن 15 دقيقة. إذا ما وجدت أي أعراض بعد الغسل اطلب عتبرلي المساعدة الطبية.

لتجنب التعرض لأي صدمات، لا تقم بإزالة الغطاء البلاستيكي الذي يحمي الجزء الأسفل من بطاقة العاكس.

على الرغم من أن البطاريات الرئيسية تكون لها جهد منخفض، إلا أنه قد تقوم البطاريات التي حدثت قصور بها أو التي تم توصيلها أرضياً باستمرار تصادر تيار يكفي لحداث حرائق أو تعرض المواد القابلة للاشتعال للحريق.

ما لا يتم السماح بتلبسه الفوري لأي FRU الجاري استبداله بدون ضرورة إغلاق النظام، قد يتوقع مايلي قبل ازالتهم. قد يبقف تشغيل الحاسب ونزع كل أسلاك الطاقة من المخارج الكهربائية. وقم أيضاً بإزالة حزمة البطارية ثم قم بإغلاق أي كابلات متصلة.
PERIGO

Antes de ligar o computador após a substituição da FRU, certifique-se de que todos os parafusos, molas e outras peças pequenas estejam no lugar e não estejam soltos dentro do computador. Verifique isso sacudindo o computador e procurando ouvir sons de peças soltas. Peças metálicas ou lascas de metal podem causar curto-circuito.

PERIGO

PERIGO

PERIGO

A bateria de lítio pode causar incêndio, explosão ou graves queimaduras. Não a recarregue, remova seu conector polarizado, desmonte-a, aqueça-a acima de 100°C (212°F), incinere-a, ou exponha o conteúdo de sua célula à água. Descarte a bateria conforme requerido pelas leis ou regulamentos locais. Use somente a bateria nas partes listadas apropriadas. O uso de uma bateria incorreta pode resultar em combustão ou explosão da bateria.

PERIGO

Se o LCD quebrar e o fluido de dentro dele entrar em contato com seus olhos ou com suas mãos, lave as áreas afetadas imediatamente com água durante pelo menos 15 minutos. Procure cuidados médicos se algum sintoma causado pelo fluido surgir após a lavagem.
Para evitar choque elétrico, não remova a capa plástica que protege a parte inferior da placa inversora.

⚠️

**PERIGO**

Embora as principais baterias possuam baixa voltagem, uma bateria em curto-circuito ou aterrada pode produzir corrente o bastante para queimar materiais de pessoal ou inflamáveis.

⚠️

**PERIGO**

A menos que uma hot swap seja permitida para a FRU que está sendo substituída, faça o seguinte antes de removê-la: desligue o computador, desconecte todos os cabos de energia das tomadas, remova o pacote de baterias e desconecte quaisquer cabos de interconexão.

⚠️

**DANGER**

Avant de remettre l’ordinateur sous tension après remplacement d’une unité en clientèle, vérifiez que tous les ressorts, vis et autres pièces sont bien en place et bien fixées. Pour ce faire, secouez l’unité et assurez-vous qu’aucun bruit suspect ne se produit. Des pièces métalliques ou des copeaux de métal pourraient causer un court-circuit.

⚠️

**DANGER**

Certaines batteries de secours contiennent du nickel et du cadmium. Ne les démontez pas, ne les rechargez pas, ne les exposez ni au feu ni à l’eau. Ne les mettez pas en court-circuit. Pour les mettre au rebut, conformez-vous à la réglementation en vigueur. Lorsque vous replacez la pile de sauvegarde ou celle de l’horloge temps réel, veillez à n’utiliser que les modèles cités dans la liste de pièces détachées adéquate. Une batterie ou une pile inappropriée risque de prendre feu ou d’exploser.

⚠️

**DANGER**

La batterie contient du nickel. Ne la démontez pas, ne l'exposez ni au feu ni à l'eau. Ne la mettez pas en court-circuit. Pour la mettre au rebut, conformez-vous à la réglementation en vigueur. Lorsque vous remplacez la batterie, veillez à n’utiliser que les modèles cités dans la liste de pièces détachées adéquate. En effet, une batterie inappropriée risque de prendre feu ou d’exploser.
DANGER

La pile de sauvegarde contient du lithium. Elle présente des risques d'incendie, d'explosion ou de brûlures graves. Ne la rechargez pas, ne retirez pas son connecteur polarisé et ne la démontez pas. Ne l'exposez pas à une température supérieure à 100°C, ne la faites pas brûler et n'en exposez pas le contenu à l'eau. Mettez la pile au rebut conformément à la réglementation en vigueur. Une pile inappropriée risque de prendre feu ou d'exploser.

DANGER

Si le panneau d'affichage à cristaux liquides se brise et que vous recevez dans les yeux ou sur les mains une partie du fluide, rincez-les abondamment pendant au moins quinze minutes. Consultez un médecin si des symptômes persistent après le lavage.

DANGER

Afin d'éviter tout risque de choc électrique, ne retirez pas le cache en plastique protégeant la partie inférieure de la carte d'alimentation.

DANGER

Bien que le voltage des batteries principales soit peu élevé, le court-circuit ou la mise à la masse d'une batterie peut produire suffisamment de courant pour brûler des matériaux combustibles ou causer des brûlures corporelles graves.

DANGER

Si le remplacement à chaud n'est pas autorisé pour l'unité remplaçable sur site que vous remplacez, procédez comme suit avant de retirer l'unité : mettez l'ordinateur hors tension, débranchez tous les cordons d'alimentation des prises de courant, retirez le bloc de batterie et déconnectez tous les câbles d'interconnexion.

VORSICHT

VORSICHT

VORSICHT

VORSICHT

VORSICHT

**VORSICHT**

Aus Sicherheitsgründen die Kunststoffabdeckung, die den unteren Teil der Spannungswandlerplatine umgibt, nicht entfernen.

**VORSICHT**

Obwohl Hauptbatterien eine niedrige Spannung haben, können sie doch bei Kurzschluß oder Erdung genug Strom abgeben, um brennbare Materialien zu entzünden oder Verletzungen bei Personen hervorzurufen.

**VORSICHT**

Wenn ein Austausch der FRU bei laufendem Betrieb nicht erlaubt ist, gehen Sie beim Austausch der FRU wie folgt vor: Schalten Sie den Computer aus, ziehen Sie alle Netzkabel von den Netzsteckdosen ab, entfernen Sie den Akku und ziehen Sie alle miteinander verbundenen Kabel ab.
Chapter 1. Safety information

Safety information

CAUTION

Always set the system to the off state before handling FRU modules. If you do not set the system to the off state before handling FRU modules, the FRU modules may get damaged.

Chapter 1. Safety information

CAUTION

FRU的交换後、ThinkPadの電源を入れる前に、ねじ、パネ、その他の小さな部品がすべて正しい位置にあり、またThinkPadの内部で緩んでいないことを確認してください。

これを確認するには、ThinkPadを振って、カチャカチャと音がしないか確かめます。金属部品や金属破片はショートの原因になることがあります。

Chapter 1. Safety information
予備バッテリーの中には少量のニッケルとカドミウムが含まれているものがあります。したがって、予備バッテリーの分解、再充電、火または水の中への投棄、またはショートさせることは決して行わないでください。バッテリーを廃棄する場合は地方自治体の条例に従ってください。適切なパーツ・リストにあるバッテリーだけを使用してください。誤ったバッテリーを使用すると、バッテリーが発火したり、爆発したりすることがあります。

危険
バッテリー・パックには少量のニッケルが含まれています。バッテリー・パックを分解したり、火または水の中に投げ込んだり、ショートさせないでください。バッテリー・パックの廃棄にあたっては、地方自治体の条例または規則に従ってください。バッテリー・パックを交換するときは、適切なパーツ・リストにあるバッテリーだけを使用してください。誤ったバッテリーを使用すると、バッテリーが発火したり、爆発したりすることがあります。

危険
リチウム・バッテリーは、火災、爆発、または重症のやけどを引き起こすことがあります。パックアップ・バッテリーの充電、その極性コネクターの取り外し、バッテリー本体の分解、100℃(212°F)以上への加熱、焼却、電池の中身を水に浸すことはしないでください。バッテリーを廃棄する場合は地方自治体の条例に従ってください。適切なパーツ・リストにあるバッテリーだけを使用してください。誤ったバッテリーを使用すると、バッテリーが発火したり、爆発したりすることがあります。

危険
LCDが破損し、LCDの中の液体が目に入ったり、手に触れたりした場合は、液体が触れた部分を少なくとも15分間洗い流してください。洗い流した後に、液体によって何らかの症状が現れた場合は、医師の治療を受けてください。

危険
感電を防ぐため、インバーター・カードの下部を保護しているプラスチック・カバーを外さないでください。

危険
メイン・バッテリーの電圧は低くても、ショートしたり、接続したバッテリーが、作業者にやけどを負わせたり、可燃物を燃やすだけの電流を発生させる場合があります。
危険
交換しようとしているFRUがホット・スワップに対応していない場合、それを取り外す前に、コンピューターの電源をオフにし、すべての電源コードをコンセントから抜き、バッテリー・パックを取り外して、相互接続しているケーブルをすべて切り離してください。

注意
FRUを交換してからコンピューター電源を切る前に、ドライプ、スロット、および基盤の内側に、異常な物が入っていなかったことを確認してください。コンピューター内部に異常が入っている場合は、コンピューターを修理してください。さらに、コンピューターを長時間使用した場合など、内部に異常が入っている場合もあります。

注意
一部のバッテリーやカートリッジはニッケルが含まれています。ニッケルが含まれているバッテリーやカートリッジは、水分を含まない場所に保管してください。保持中に水分が入った場合、バッテリーやカートリッジが爆発する可能性があります。

注意
バッテリーやカートリッジは、水や液体に接触させないでください。バッテリーやカートリッジが爆発する可能性があります。

注意
リチウムバッテリーは、温度、圧縮または過熱すると爆発する可能性があります。リチウムバッテリーを、ぎゅっと絞って、破棄または廃棄しないでください。リチウムバッテリーは、100℃(212°F)以上で加熱すると、爆発または短絡する可能性があります。リチウムバッテリーを破壊する前に、適切な処分をする責任を負ってください。
LCD가 파손되어 LCD 내부의 액체가 눈에 들어가거나 손에 묻으면 즉시 깨끗한 물로 15분 이상 닦아 내십시오. 젖은 후에 조금이라도 이상을 느낄면 즉시 병원에 가서 의사의 진찰을 받아야 합니다.

⚠️ 위험
전기적 위험을 방지하려면 인버터 카드의 아래 부분을 보호하는 플라스틱 덮개를 제거하지 마십시오.

⚠️ 위험
기본 배터리의 전압은 낮지만, 단락되거나 접지된 배터리는 화상을 입하기에 충분한 전류와 가연성 물질을 발생시킬 수 있습니다.

⚠️ 위험
FRU 교체 시 Hot Swap이 지원되지 않는 경우, FRU를 제거하기 전에 컴퓨터의 전원을 끄고, 전기 콘센트에서 전원 코드를 분리하고, 배터리를 제거한 후, 연결된 모든 케이블을 분리하십시오.

⚠️ PELIGRO
Antes de encender el sistema después de sustituir una FRU, compruebe que todos los tornillos, muelles y demás piezas pequeñas se encuentran en su sitio y no se encuentran sueltas dentro del sistema. Compruébelo agitando el sistema y escuchando los posibles ruidos que provocarían. Las piezas metálicas pueden causar cortocircuitos eléctricos.

⚠️ PELIGRO
Algunas baterías de reserva contienen una pequeña cantidad de níquel y cadmio. No las desmonte, ni recargue, ni las eche al fuego o al agua ni las cortocircuite. Deséchelas tal como dispone la normativa local. Utilice sólo baterías que se encuentren en la lista de piezas. La utilización de una batería no apropiada puede provocar la ignición o explosión de la misma.

⚠️ PELIGRO
Las baterías contienen pequeñas cantidades de níquel. No las desmonte, ni recargue, ni las eche al fuego o al agua ni las cortocircuite. Deséchelas tal como dispone la normativa local. Utilice sólo baterías que se encuentren en la lista de piezas al sustituir la batería. La utilización de una batería no apropiada puede provocar la ignición o explosión de la misma.
¡PELIGRO!

La batería de repuesto es una batería de litio y puede provocar incendios, explosiones o quemaduras graves. No la recargue, ni quite el conector polarizado, ni la desmonte, ni caliente por encima de los 100°C (212°F), ni la incinere ni exponga el contenido de sus celdas al agua. Deséchela tal como dispone la normativa local.

¡PELIGRO!

Si la LCD se rompe y el fluido de su interior entra en contacto con sus ojos o sus manos, lave inmediatamente las áreas afectadas con agua durante 15 minutos como mínimo. Obtenga atención médica si se presenta algún síntoma del fluido después de lavarse.

¡PELIGRO!

Para evitar descargas, no quite la cubierta de plástico que rodea la parte baja de la tarjeta invertida.

¡PELIGRO!

Aunque las baterías principales tienen un voltaje bajo, una batería cortocircuitada o con contacto a tierra puede producir la corriente suficiente como para quemar material combustible o provocar quemaduras en el personal.

¡PELIGRO!

Salvo que se permita el intercambio en caliente para la unidad sustituible localmente, realice lo siguiente antes de extraerla: apague el sistema, desconecte todos los cables de alimentación de las tomas de alimentación eléctrica, extraiga la batería y desconecte los cables de interconexión.

¡Peligro!

完成 FRU 更換之後，在開啓電腦的電源之前，請確定所有螺絲、彈簧及其他小零件都已歸位，沒有遺留在電腦內部。若要確認這一點，請搖晃電腦，聽聽看是否有卡嗒的聲響。金屬零件或儀錶的火花會造成電線短路。
部分備用電池含有微量的鎳和鎧。請勿拆開備用電池、再充電、丟入火或水中，或使其形成短路。請按照當地法令或規定來棄置電池。
僅限使用零件清單中的電池。使用不適當的電池會導致電池起火或爆炸。

⚠️ 電池套件含有微量的鎳。請勿拆開電池套件、丟入火或水中，或使其形成短路。請按照當地法令或規定來棄置電池套件。
更換電池套件時，僅限使用零件清單中的電池。使用不適當的電池會導致電池起火或爆炸。

⚠️ 鋰電池會導致起火、爆炸或嚴重燒傷。請勿再充電、拔除其電極接頭、拆開、加熱超過 100°C (212°F)、焚燒，或讓電池組成物浸到水。請按照當地法令或規定來棄置電池。
僅限使用零件清單中的電池。使用不適當的電池會導致電池起火或爆炸。

⚠️ 如果 LCD 破裂導致 LCD 流出的液體沾到您的眼睛或手，請立即以清水沖洗沾染部位至少 15 分鐘。如果在清洗後出現該液體所造成的任何症狀，請就醫治療。

⚠️ 為避免電擊，請勿拆下轉換卡下面的塑膠護蓋。

⚠️ 雖然主電池的電壓很低，但短路或接地電池所產生的電流，仍足以使人燒傷或使可燃物質起火。

⚠️
Laser compliance statement (multilingual translations)

The laser compliance statements in this section are provided in the following languages:

- English
- Arabic
- Brazilian Portuguese
- French
- German
- Hebrew
- Japanese
- Korean
- Spanish
- Traditional Chinese

⚠️ CAUTION:
When laser products (such as CD-ROMs, DVD drives, fiber optic devices, or transmitters) are installed, note the following:

- Do not remove the covers. Removing the covers of the laser product could result in exposure to hazardous laser radiation. There are no serviceable parts inside the device.
- Use of controls or adjustments or performance of procedures other than those specified herein might result in hazardous radiation exposure.

⚠️ DANGER

Some laser products contain an embedded Class 3A or Class 3B laser diode. Note the following.

Laser radiation when open. Do not stare into the beam, do not view directly with optical instruments, and avoid direct exposure to the beam.
تحذير:

عند تثبيت منتجات الليزر (مثل أقراص DVD أو محركات تشغيل أقراص CD-ROM أو أجهزة الألياف البصرية أو النواقل)، لاحظ ما يلي:

- لا تقم بنزع الغطاء. قد ينتج عن نزع غطاء منتج ليزر التعرض لأشعة ليزر في منتهى الخطورة. لا توجد أجزاء يمكن صيانتها داخل الجهاز.
- قد ينتج عن استخدام مفاتيح أو تنفيذ عمليات ضبط أو إجراءات بطريقة مختلفة عما هو محدد هنا التعرض لأشعة ليزر في منتهى الخطورة.

خطر

تحتوي بعض منتجات الليزر على صمام ثنائي ليزر مضمون من Class 3B أو Class 3A. لاحظ ما يلي.

- توجد أشعة ليزر عند الفتح. لا تنظر للشعاع ولا تنظر بطريقة مباشرة باستخدام أدوات ضوئية وتجنب التعرض المباشر للشعاع.
CUIDADO:
Quando produtos a laser (como CD-ROMs, unidades de DVD, dispositivos de fibra ótica ou transmissores) estão instalados, observe o seguinte:

- Não remova as tampas. A remoção das tampas do produto a laser pode resultar em exposição prejudicial à radiação de laser. Não há peças que permitam manutenção no interior do dispositivo.
- A utilização de controles ou ajustes ou a execução de procedimentos diferentes daqueles especificados aqui pode resultar em exposição perigosa à radiação.

PERIGO

Algumas produtos a laser contêm um diodo de laser Classe 3A ou Classe 3B integrado. Observe o seguinte:

Radiação a laser quando aberta. Não olhe diretamente para o feixe a olho nu ou com instrumentos óticos e evite exposição direta ao feixe.
ATTENTION :
Si des produits laser (tels que des unités de CD, DVD, à fibre optique ou des émetteurs) sont installés, lisez les informations suivantes :

- Pour éviter tout risque d'exposition au rayon laser, respectez les consignes de réglage et d'utilisation des commandes, ainsi que les procédures décrites dans le présent manuel.

DANGER

Certains produits à laser contiennent une diode à laser intégrée de classe 3A ou 3B. Prenez connaissance des informations suivantes.

Rayonnement laser lorsque le carter est ouvert. Evitez toute exposition directe au rayon laser. Evitez de regarder fixement le faisceau ou de l'observer à l'aide d'instruments optiques.
Vorsicht:
Bei der Installation von Lasergeräten (wie CD-ROM-Laufwerken, DVD-Laufwerken, Einheiten mit Lichtwellenleitertechnik oder Sendern) Folgendes beachten:

- Werden Steuerelemente, Einstellungen oder Durchführungen von Prozeduren anders als hier angegeben verwendet, kann gefährliche Laserstrahlung auftreten.

Gefahr

Einige Lasergeräte enthalten eine Laserdiode der Klasse 3A oder 3B. Beachten Sie Folgendes:

警告:
レーザー製品 (CD-ROM、DVD ドライブ、光ファイバー装置、または送信機など) を取り付ける場合には、以下のことに注意してください。

- カバーを取り外さないこと。カバーを取り外すと有害なレーザー光を浴びることがあります。この装置の内部には保守が可能な部品はありません。
- 本書で指定された内容以外の、お客様による整備、調整、または手順を行った場合、レーザー放射の危険があります。

危険

一部のレーザー製品には、クラス 3A またはクラス 3B のレーザー・ダイオードが組み込まれています。次の点に注意してください。

開けるとレーザー光が放射されます。光線を見つめたり、光学機械を使って直接見たり、光線を直接浴びることは避けてください。

警告:
レーザー製品 (CD-ROM、DVD ドライブ、光ファイバー装置、または送信機など) が設置されている場合、以下のことを注意して操作してください。

- 間近を設置して使用する。レーザー製品の間近を設置して使用すると有害なレーザー光が放出される可能性があります。傷つけられると、装置やその他の機器の性能が低下することがあります。
- 本書で指定された内容以外の、お客様による整備、調整、または手順を行った場合、レーザー放射の危険があります。

危険

一部のレーザー製品はクラス 3A またはクラス 3B のレーザー・ダイオードが組み込まれています。次の点に注意してください。

- 間近を設置して使用し、間近を設置して使用すること。レーザー光を浴びることは避けてください。
- 間近を設置して使用すること。間近を設置して使用すること。
PRECAUCIÓN:
Cuando haya instalados productos láser (por ejemplo, unidades de CD-ROM, unidades de DVD, dispositivos de fibra óptica o transmisores), tenga en cuenta lo siguiente:

• No extraiga las cubiertas. La extracción de las cubiertas del producto láser podría producir una exposición a radiación láser peligrosa. No hay ninguna pieza dentro del dispositivo que pueda reparar.
• La utilización de controles, ajustes o la realización de procedimientos diferentes a los especificados puede dar como resultado una exposición peligrosa a radiaciones.

PELIGRO

Algunos productos láser contienen un diodo láser de Clase 3A o Clase 3B incorporado. Tenga en cuenta lo siguiente.

Emite radiación láser cuando está abierto. No fije la vista en el rayo, no lo mire directamente con instrumentos ópticos y evite la exposición directa al rayo.
警告：
安装雷射產品（如 CD-ROM、DVD 光碟機、光纖裝置或轉送器）時，請注意下列事項：

- 請勿卸下外蓋。卸下雷射產品的外蓋可能導致曝露於危險的雷射輻射。裝置內沒有可維修的零件。
- 若不遵守本文規定的控制、調整或操作程序，可能會導致危險的輻射外洩。

危險

某些雷射產品包含內嵌式 3A 類或 3B 類雷射二極體。這類光碟機的使用者應注意下列聲明。

在開啟光碟機時，會有雷射輻射。請勿直視光束或以光學儀器直接觀看光束，並避免直接暴露在光束中。
Chapter 2. Important service information

This chapter presents following important service information that applies to all machine types supported by this manual:

- “Strategy for replacing FRUs” on page 27
  - “Strategy for replacing a hard disk drive” on page 28
  - “Important notice for replacing a system board” on page 28
  - “How to use error message” on page 28
- “Strategy for replacing FRUs for CTO, CMV, and GAV” on page 28
  - “Product definition” on page 28
  - “FRU identification for CTO, CMV, and GAV products” on page 29

Important:

- If the computer is equipped with both a hard disk drive and an mSATA solid-state drive, do not use the mSATA solid-state drive as a bootable device. The mSATA solid-state drive is used for “cache” function only.
- Advise customers to contact the Lenovo Customer Support Center if they need any assistance in obtaining or installing any software fixes, drivers, and UEFI BIOS downloads. Telephone numbers for Lenovo Support are available at:
  http://www.lenovo.com/support/phone
- System Disassembly/Reassembly videos that show the FRU removals or replacements for the Lenovo® authorized service technicians are available in the following support site:
  http://www.lenovoservicetraining.com/ion/

Strategy for replacing FRUs

Before replacing parts:

Ensure that all software fixes, drivers, and UEFI BIOS downloads are installed before replacing any FRUs listed in this manual.

After a system board is replaced, ensure that the latest UEFI BIOS is loaded to the system board before completing the service action.

To download software fixes, drivers, and UEFI BIOS, do as follows:

2. Enter the product number of the computer or press the Run Auto-Detect button on the screen.
3. Select Drivers & Software.
4. Follow the directions on the screen and install the necessary software.

Use the following strategy to prevent unnecessary expense for replacing and servicing FRUs:

- **If you are instructed to replace a FRU but the replacement does not correct the problem, reinstall the original FRU before you continue.**
- Some computers have both a processor board and a system board. If you are instructed to replace either the processor board or the system board, and replacing one of them does not correct the problem, reinstall that board, and then replace the other one.
- If an adapter or a device consists of more than one FRU, any of the FRUs might be the cause of the error. Before replacing the adapter or device, remove the FRUs, one by one, to see if the symptoms change. Replace only the FRU that changed the symptoms.
**Attention:** The setup configuration on the computer you are servicing might have been customized. Running Automatic Configuration might alter the settings. Note the current configuration settings (using the View Configuration option); then, when service has been completed, verify that those settings remain in effect.

**Strategy for replacing a hard disk drive**

Always try to run a low-level format before replacing a hard disk drive. This will cause all customer data on the hard disk to be lost. Ensure that the customer has a current backup of the data before doing this task.

**Attention:** The drive startup sequence in the computer you are servicing might have been changed. Be extremely careful during write operations such as copying, saving, or formatting. If you select an incorrect drive, data or programs can be overwritten.

If the computer is shipped with an mSATA solid-state drive and a hard disk drive, the mSATA solid-state drive is used for the “cache” function only to support and the Intel Rapid Start Technology. Users are not recommended to replace the mSATA solid-state drive by themselves. Otherwise, the “cache” function will not work and the Intel Rapid Start Technology cannot be used any more.

**Important notice for replacing a system board**

Some components mounted on a system board are very sensitive. Improper handling of a system board can cause damage to those components, and might cause a system malfunction.

**Attention:** When handling a system board:

- Do not drop a system board or apply any excessive force to it.
- Avoid rough handling of any kind.
- Avoid bending a system board and pushing it hard to prevent cracking at each Ball Grid Array (BGA) chipset.

**How to use error message**

Use the error codes displayed on the screen to diagnose failures. If more than one error code is displayed, begin the diagnosis with the first error code. Whatever causes the first error code might also cause false error codes. If no error code is displayed, see whether the error symptom is listed in the Symptom-to-FRU Index for the computer you are servicing.

**Strategy for replacing FRUs for CTO, CMV, and GAV**

**Product definition**

**Dynamic Configure To Order (CTO)**

This provides the ability for a customer to configure a Lenovo solution from an eSite, and have this configuration sent to fulfillment, where it is built and shipped directly to the customer. The machine label, Product Entitlement Warehouse (PEW), and eSupport will load these products as the 4-digit MT and 3-digit model, where model = “CTO” (Example: 1829-CTO).

**Custom Model Variant (CMV)**

This is a unique configuration that has been negotiated between Lenovo and the customer. A unique 4-digit MT and 3-digit model is provided to the customer to place orders (Example: 1829-W15). A CMV is a special bid offering. Therefore, it is not generally announced.
• The MTM portion of the machine label is the 4-digit MT and 3-digit model, where model = “CTO” (Example: 1829-CTO). The PRODUCT ID portion of the machine label is the 4-digit MT and 3-digit CMV model (Example: 1829-W15).

• The PEW record is the 4-digit MT and 3-digit model, where model = “CTO” (Example: 1829-CTO).

• eSupport will show both the CTO and CMV machine type models (Example: 1829-CTO and 1829-W15 will be found on the eSupport site.)

General Announce Variant (GAV)
This is a standard model (fixed configuration). GAVs are announced and offered to all customers. The MTM portion of the machine label is a 4-digit MT and 3-digit model, where model = a “fixed part number”, not “CTO” (Example: 1829-F1U). Also, PEW and eSupport will list these products under the same fixed model number.

FRU identification for CTO, CMV, and GAV products
There are three information resources to identify which FRUs are used to support CTO, CMV, and GAV products. These sources are PEW, eSupport, and the HMM.

Using PEW
• PEW is the primary source for identifying FRU part numbers and FRU descriptions for the key commodities for CTO, CMV and GAV products at a MT - serial number level. An example of key commodities are hard disk drives, system boards, microprocessors, Liquid Crystal Displays (LCDs), and memory.

• Remember, all CTO and CMV products are loaded in PEW under the 4-digit MT and 3-digit model, where model = “CTO” (Example: 1829-CTO). GAVs are loaded in PEW under the 4-digit MT and 3-digit model, where model = a “fixed part number”, not “CTO” (Example: 1829-F1U).

• PEW can be accessed at the following Web site:
  Select Warranty lookup. Input the MT and the Serial number and the list of key commodities will be returned in the PEW record under COMPONENT INFORMATION.

Using eSupport
For key commodities (examples - hard disk drive, system board, microprocessor, LCD, and memory)
• eSupport can be used to view the list of key commodities built in a particular machine serial (this is the same record found in PEW).

• eSupport can be accessed at the following Web site:
  http://www.lenovo.com/support

• To view the key commodities, do the following:
  1. Click Warranty.
  2. Click Check Warranty Status.
  3. On the Warranty Status Lookup page, type in your machine type and serial number, and then click Submit. The key commodities will be displayed.

For the remaining FRUs (the complete list of FRUs at the MT model level)
• eSupport can be used to view the complete list of FRUs for a machine type and model.

• To view the complete list of FRUs, do the following:
  1. Click Product & Parts Detail and then follow the instructions on the screen to reach the Product and Parts Details page.
  2. Click the Parts Detail tab to view the list of service parts.
Chapter 3. General checkout

This chapter presents following information:
• “What to do first” on page 31
• “Checkout guide” on page 32
  – “Lenovo Solution Center” on page 32
  – “Quick test programs” on page 32
  – “UEFI diagnostic program” on page 33
  – “Bootable diagnostic programs” on page 33
• “Power system checkout” on page 34

Some descriptions in this chapter might not apply to your particular computer.

Before you go to the checkout guide, be sure to read the following important notes.

Important notes:
• Only certified trained personnel should service the computer.
• Before replacing any FRU, read the entire page on removing and replacing FRUs.
• When you replace FRUs, it is recommended to use new nylon-coated screws.
• Be extremely careful during such write operations as copying, saving, or formatting. The sequence of the drives in the computer that you are servicing might have been altered. If you select an incorrect drive, data or programs might be overwritten.
• Replace a FRU only with another FRU of the correct model. When you replace a FRU, ensure that the model of the machine and the FRU part number are correct.
• A FRU should not be replaced because of a single, unreproducible failure. Single failures can occur for a variety of reasons that have nothing to do with a hardware defect, such as cosmic radiation, electrostatic discharge, or software errors. Consider replacing a FRU only when a problem recurs. If you suspect that a FRU is defective, clear the error log and run the test again. If the error does not recur, do not replace the FRU.
• Be careful not to replace a nondefective FRU.

What to do first

When you do return a FRU, you must include the following information in the parts exchange form or parts return form that you attach to it:
1. Name and phone number of service technician
2. Date of service
3. Date on which the machine failed
4. Date of purchase
5. Failure symptoms, error codes appearing on the display, and beep symptoms
6. Procedure index and page number in which the failing FRU was detected
7. Failing FRU name and part number
8. Machine type, model number, and serial number
9. Customer’s name and address

Note: During the warranty period, the customer is responsible for repair costs if the computer damage was caused by misuse, accident, modification, unsuitable physical or operating environment, or improper maintenance by the customer. Following is a list of some common items that are not covered under warranty and some symptoms indicate that the system has been subjected to stress beyond normal use.

Before checking problems with the computer, determine whether the damage is covered under the warranty by referring to the following list:

The following are not covered under warranty:
• LCD panel cracked from the application of excessive force or from being dropped
- Scratched (cosmetic) parts
- Distortion, deformation, or discoloration of the cosmetic parts
- Plastic parts, latches, pins, or connectors that have been cracked or broken by excessive force
- Damage caused by liquid spilled into the system
- Damage caused by the improper insertion of a PC Card or the installation of an incompatible card
- Improper disc insertion or use of an optical drive
- Fuses blown by attachment of a nonsupported device
- Forgotten computer password (making the computer unusable)
- Sticky keys caused by spilling a liquid onto the keyboard
- Use of an incorrect ac power adapter on laptop products

The following symptoms might indicate damage caused by nonwarranted activities:
- Missing parts might be a symptom of unauthorized service or modification.
- If the spindle of a hard disk drive becomes noisy, it might have been subjected to excessive force, or have been dropped.

Checkout guide

Use the following procedures as a guide to identify and correct problems with the ThinkPad notebook computers.

Note: The diagnostic tests are intended to test only ThinkPad products. The use of non-ThinkPad products, prototype cards, or modified options can lead to false indications of errors and invalid system responses.

1. Identify the failing symptoms in as much detail as possible.
2. Verify the symptoms. Try to re-create the failure by running the diagnostic test or by repeating the operation.

Lenovo Solution Center

The Lenovo Solution Center program enables you to troubleshoot and resolve computer problems. It combines diagnostic tests, system information collection, security status, and support information, along with hints and tips for maximum system performance.

Note: The Lenovo Solution Center program is available only on models preinstalled with the Windows 7 operating system. It also can be downloaded from http://www.lenovo.com/diagnose.

To run Lenovo Solution Center, click **Start → Control Panel → System and Security → Lenovo - System Health and Diagnostics**, and then follow the instructions on the screen.

For additional information about this program, see the help information system of that program.

Quick test programs

Lenovo Hard Drive Quick Test and Lenovo Memory Quick Test are two quick test programs that enable you to troubleshoot and resolve computer internal storage and memory problems.

Notes:

- If the computer you are servicing is not installed with the Lenovo Solution Center program, you can download the quick test programs from the Lenovo Support Web site.
- The two programs are applicable to computers installed with the Windows 7, Windows XP, Windows Server 2003, or Windows Server 2008 operating system.

To download and install a quick test program, go to http://www.lenovo.com/diagnose, and follow the instructions on the Web site.
To run a quick test using the downloaded program, do the following:

1. Go to the C:\SWTOOLS\diag folder.
2. Double-click the gui_lsc_lite.exe file.
3. When the User Account Control window opens, click Yes.
4. Select the device class to be tested.
5. Select the devices to be tested.
6. Select the tests to be performed.
7. Follow the instructions on the screen to start the test. When a problem is detected, information messages will be displayed. Refer to the messages to troubleshoot the problem.

**UEFI diagnostic program**

A UEFI diagnostic program is preinstalled on the computer. It enables you to test memory and internal storage problems, view system information, and check and recover bad sectors on internal storage devices.

To run the UEFI diagnostic program, do the following:

1. Turn on the computer. If the computer cannot be turned on, go to “Power system checkout” on page 34, and check the power sources. If an error code is displayed, go to “Symptom-to-FRU index” on page 41 for error code descriptions and troubleshooting hints.
2. When the ThinkPad logo is displayed, repeatedly press and release the F12 key. When the Boot Menu window opens, release the F12 key.
3. Press the Tab key to switch to the Application Menu window.
4. Use the arrow keys to select Lenovo Diagnostics and then press Enter. The main screen of the UEFI diagnostic program is displayed.
5. Follow the instructions on the screen to use the diagnostic program.

The options on the main screen are as follows:

<table>
<thead>
<tr>
<th>Tests</th>
<th>Tools</th>
</tr>
</thead>
<tbody>
<tr>
<td>• Quick Memory Test</td>
<td>• System Information</td>
</tr>
<tr>
<td>• Quick Storage Device Test</td>
<td>• Recover Bad Sectors Tool</td>
</tr>
<tr>
<td>• Exit Application</td>
<td></td>
</tr>
</tbody>
</table>

**Bootable diagnostic programs**

If the computer you are servicing is not installed with the UEFI diagnostic program, you can download a bootable diagnostic program from the Lenovo Support Web site. The bootable diagnostic programs enable you to test computer memory and internal storage devices, view system information, and check and recover the internal storage devices. To use the bootable diagnostic programs, you can create a bootable diagnostic medium on a USB device or CD.

To create a bootable diagnostic medium, do the following:

2. Click Lenovo Bootable Diagnostics.
3. Follow the instructions on the Web site to create a bootable diagnostic medium on a USB device or CD.

To use the diagnostic medium you have created, do one of the following:

- If you have created the bootable diagnostic medium on a USB device, do the following:
  1. Attach the USB device to the computer.
2. Turn on the computer. If the computer cannot be turned on, go to “Power system checkout” on page 34, and check the power sources. If an error code is displayed, go to “Symptom-to-FRU index” on page 41 for error code descriptions and troubleshooting hints.

3. When the ThinkPad logo is displayed, repeatedly press and release the F12 key. When the Boot Menu window opens, release the F12 key.

4. Use the arrow keys to select USB HDD and then press Enter. The diagnostic program will be launched automatically.

5. Follow the instructions on the screen to use the diagnostic program.

- If you have created the bootable diagnostic medium on a CD, do the following:
  1. Turn on the computer. If the computer cannot be turned on, go to “Power system checkout” on page 34, and check the power sources. If an error code is displayed, go to “Symptom-to-FRU index” on page 41 for error code descriptions and troubleshooting hints.
  2. Insert the CD into the optical drive.
  3. Restart the computer.
  4. When the ThinkPad logo is displayed, repeatedly press and release the F12 key. When the Boot Menu window opens, release the F12 key.
  5. Use the arrow keys to select ATAPI CDx (x: 0, 1, ...) and then press Enter. The diagnostic program will be launched automatically.
  6. Follow the instructions on the screen to use the diagnostic program.

---

**Power system checkout**

To verify a symptom, do the following:

1. Turn off the computer.
2. Remove the battery pack.
3. Connect the ac power adapter.
4. Check that power is supplied when you turn on the computer.
5. Turn off the computer.
6. Disconnect the ac power adapter and install the charged battery pack.
7. Check that the battery pack supplies power when you turn on the computer.

If you suspect a power problem, see the appropriate one of the following power supply checkouts:

- “Checking the ac power adapter” on page 34
- “Checking operational charging” on page 35
- “Checking the battery pack” on page 35
- “Checking the backup battery” on page 36

**Checking the ac power adapter**

You are here because the computer fails only when the ac power adapter is used.

- If the power problem occurs only when the docking station or the port replicator is used, replace the docking station or the port replicator.
- If the power-on indicator does not turn on, check the power cord of the ac power adapter for correct continuity and installation.
- If the computer does not charge during operation, go to “Checking operational charging” on page 35.

To check the ac power adapter, do the following:

1. Unplug the ac power adapter cable from the computer.
2. Measure the output voltage at the plug of the ac power adapter cable. See the following figure:
Note: Output voltage across pin 2 of the ac power adapter might differ from the one you are servicing.
3. If the voltage is not correct, replace the ac power adapter.
4. If the voltage is acceptable, replace the system board.

Note: Noise from the ac power adapter does not always indicate a defect.

Checking operational charging

To check whether the battery charges properly during operation, use a discharged battery pack or a battery pack that has less than 50% of the total power remaining when installed in the computer.

Perform operational charging. If the battery status indicator or icon does not turn on, remove the battery pack and let it return to room temperature. Reinstall the battery pack. If the charge indicator or icon still does not turn on, replace the battery pack.

If the charge indicator still does not turn on, replace the system board. Then reinstall the battery pack. If it is still not charged, go to the next section.

Checking the battery pack

Battery charging does not start until the Power Manager battery gauge shows that less than 96% of the total power remains; under this condition the battery pack can charge to 100% of its capacity. This protects the battery pack from being overcharged or from having a shortened life.

To check your battery, move your cursor to the Power Manager battery gauge icon in the icon tray of the Windows taskbar and wait for a moment (but do not click), and the percentage of battery power remaining is displayed. To get detailed information about the battery, double-click the Power Manager battery gauge icon.

Note: If the battery pack becomes hot, it might not be able to charge. Remove it from the computer and leave it at room temperature for a while. After it cools down, reinstall and recharge it.

To check the battery pack, do the following:
1. Power off the computer.
2. Remove the battery pack and measure the voltage between battery terminals 1 (+) and 7 (-). See the following figure:

<table>
<thead>
<tr>
<th>Pin</th>
<th>Voltage (V dc)</th>
</tr>
</thead>
<tbody>
<tr>
<td>1</td>
<td>+20</td>
</tr>
<tr>
<td>2</td>
<td>0</td>
</tr>
<tr>
<td>3</td>
<td>Ground</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>Terminal</th>
<th>Voltage (V dc)</th>
</tr>
</thead>
<tbody>
<tr>
<td>1</td>
<td>+0 to +12.6</td>
</tr>
<tr>
<td>7</td>
<td>Ground (-)</td>
</tr>
</tbody>
</table>
3. If the voltage is less than +11.0 V dc, the battery pack has been discharged.

   **Note:** Recharging will take at least 3 hours, even if the indicator does not turn on.
   If the voltage is still less than +11.0 V dc after recharging, replace the battery.

4. If the voltage is more than +11.0 V dc, measure the resistance between battery terminals 5 and 7.
   The resistance must be 4 to 30 KΩ.
   If the resistance is not correct, replace the battery pack. If the resistance is correct, replace the system board.

**Checking the backup battery**

To check the backup battery, do the following:

1. Turn off the computer, and unplug the ac power adapter from it.
2. Turn the computer upside down.
3. Remove the battery pack (see “1010 Battery pack” on page 64).
4. Remove the backup battery (see “1090 Backup battery” on page 81).
5. Measure the voltage of the backup battery. See the following figure.

```
Red (+)  Voltage (V dc)
Red    +2.5 to +3.2
Black  Ground
```

- If the voltage is correct, replace the system board.
- If the voltage is not correct, replace the backup battery.
- If the backup battery discharges quickly after replacement, replace the system board.
Chapter 4. Related service information

This chapter presents following information:
- “Restoring the factory contents by using Recovery Disc Set” on page 37
- “Passwords” on page 38
- “Power management” on page 40
- “Symptom-to-FRU index” on page 41

Service Web site:
When the latest maintenance diskette and the system program service diskette become available, they will be posted on http://www.lenovo.com/support.

Restoring the factory contents by using Recovery Disc Set

When the hard disk drive or solid-state drive is replaced because of a failure, no product recovery program is on the new hard disk. In this case, you must use the Recovery Disc Set for the computer. Order the Recovery Disc Set and the hard disk drive at the same time so that you can recover the new hard disk drive with the pre-installed software when they arrive.

The recovery disc set consists of the user instructions and the following set of DVDs to restore the computer to the original factory configuration.

Operating System Recovery Disc (one disc)
This disc restores the Microsoft® Windows operating system. Use this disc to start the recovery process.

Applications and Drivers Recovery Disc (one or more discs)
This disc restores the preinstalled applications and drivers on the computer.

Supplemental Recovery Disc
This disc contains additional content, such as updates to the software that was preinstalled on the computer. Not all recovery disc sets come with a Supplemental Recovery Disc.

Notes:
- You must have a DVD drive to use the recovery discs. If you do not have an internal DVD drive, you can use an external USB DVD drive.
- During the recovery process, all data on the drive will be deleted. If possible, copy any important data or personal files that you want to keep onto removable media or a network drive before you start the recovery process.

To restore the computer to the original factory configuration using the recovery disc set, do the following:

**Note:** Recovery can take one to two hours to complete. The length of time depends on the method you use. If you use recovery discs, the recovery process will take about two hours.

1. Make the CD/DVD drive the first startup device in the startup sequence using the following procedure:
   a. Turn on the computer. When the logo screen is displayed, Pres F1. The ThinkPad Setup program opens.
   b. Use the arrow keys to select **Startup → Boot**.
   c. Select the CD/DVD drive as the **1st Boot Device**.
2. Insert the Operating System Recovery Disc into the DVD drive.
3. Press F10 to save the configuration changes. Follow the instructions on the screen to begin the recovery process.

4. Select your language and click **Next**.

5. Read the license. If you agree with the terms and conditions, select **I accept these terms and conditions** and then click **Next**. If you do not agree with the terms and conditions, follow the instructions on the screen.

6. Click **Yes** in the displayed window to begin the operating system recovery process.

7. Insert the **Applications and Drivers Recovery Disc** when prompted and then click **OK** to begin the applications and drivers recovery process.

8. If you have a **Supplemental Recovery Disc**, insert it when prompted and click **Yes**. If you do not have a **Supplemental Recovery Disc**, click **No**.

9. When all of the data has been copied from the last disc in the set and has been processed, remove the disc and restart the computer.

**Note:** The rest of the recovery process is fully automated and no action is required by you. The computer will restart into the Microsoft Windows desktop several times and you might experience periods when no activity is apparent on the screen for several minutes at a time. This is normal.

10. When the recovery process is complete, the Set Up Windows screen is displayed. Follow the instructions on the screen to complete the Windows setup.

11. After you have completed the Windows setup, you might want to restore the original startup sequence. Start the ThinkPad Setup program and then press F9 to restore the default settings. Press F10 to save and exit ThinkPad Setup.

**Note:** After restoring a hard disk drive to the factory default settings, you might need to reinstall some device drivers.

---

**Passwords**

As many as three passwords might be needed for any ThinkPad notebook computer: the power-on password (POP), the hard-disk password (HDP), and the supervisor password (SVP).

If any of these passwords has been set, a prompt for it appears on the screen whenever the computer is turned on. The computer does not start until the password is entered.

**Note:** If only an SVP is installed, the password prompt does not appear when the operating system is booted.

**Power-on password**

A power-on password (POP) protects the system from being powered on by an unauthorized person. The password must be entered before an operating system can be booted. For how to remove the POP, see “How to remove the power-on password” on page 39.

**Hard-disk password**

There are two hard-disk passwords (HDPs):

- **User** HDP—for the user
- **Master** HDP—for the system administrator, who can use it to get access to the hard disk even if the user has changed the user HDP

**Note:** There are two modes for the HDP: **User only** and **Master + User**. The **Master + User** mode requires two HDPs; the system administrator enters both in the same operation. The system administrator then provides the user HDP to the system user.
Attention: If the user HDP has been forgotten, check whether a master HDP has been set. If it has, it can be used for access to the hard disk drive. If no master HDP is available, neither Lenovo nor Lenovo authorized service technicians provide any services to reset either the user or the master HDP, or to recover data from the hard disk drive. The hard disk drive can be replaced for a scheduled fee.

For how to remove the POP, see “How to remove the hard-disk password” on page 39.

Supervisor password

A supervisor password (SVP) protects the system information stored in the BIOS Setup Utility. The user must enter the SVP in order to get access to ThinkPad Setup and change the system configuration.

Attention: If the SVP has been forgotten and cannot be made available to the service technician, there is no service procedure to reset the password. The system board must be replaced for a scheduled fee.

How to remove the power-on password

To remove a POP that you have forgotten, do the following:

(A) If no SVP has been set:

1. Turn off the computer and disconnect the ac power adapter.
2. Remove the battery pack. For how to remove the battery pack, see “1010 Battery pack” on page 64.
3. Remove the backup battery. For how to remove the backup battery, see “1090 Backup battery” on page 81.
4. Connect the ac power adapter. Turn on the computer and wait until the POST ends. After the POST ends, the password prompt does not appear. The POP has been removed.
5. Reinstall the backup battery and the battery pack.

(B) If an SVP has been set and is known by the service technician:

1. Turn on the computer.
2. When the ThinkPad logo comes up, immediately press F1.
3. Type the supervisor password to enter the ThinkPad Setup program.
4. Select Security, using the cursor keys to move down the menu.
5. Select Password.
7. Type the current SVP in the Enter Current Password field. Then leave the Enter New Password field blank, and press Enter twice.
8. In the Changes have been saved window, press Enter.
9. Press F10; then, in the Setup confirmation window, select Yes.

How to remove the hard-disk password

Attention: If User only mode is selected and the user HDP has been forgotten and cannot be made available to the service technician, neither Lenovo nor Lenovo authorized service technicians provide any services to reset the user HDPs or to recover data from the hard disk drive. The hard disk drive can be replaced for a scheduled fee.

To remove a user HDP that has been forgotten, when the SVP and the master HDP are known, do the following:

1. Turn on the computer.
2. When the ThinkPad logo comes up, immediately press F1 to enter ThinkPad Setup.
3. Select Security, using the cursor keys to move down the menu.
4. Select **Password**.
5. Select **Hard-disk x password**, where x is the letter of the hard disk drive. A pop-up window opens.
6. Select **Master HDP**.
7. Type the current master HDP in the **Enter Current Password** field. then leave the **Enter New Password** field blank, and press Enter twice.
9. Select **Yes** in the Setup confirmation window. Both user HDP and master HDP will have been removed.

---

**Power management**

To reduce power consumption, the computer has three power management modes: screen blank, sleep, and hibernation.

**Screen blank mode**

If the time set on the “Turn off monitor” timer in the operating system expires, the LCD backlight turns off.

To put the computer into screen blank mode, right-click the battery gauge from the Windows notification area and select **Power off display**.

To end screen blank mode and resume normal operation, press any key.

**Sleep mode**

When the computer enters sleep mode, the following events occur in addition to what occurs in screen blank mode:

- The LCD is powered off.
- The hard disk drive is powered off.
- The microprocessor stops.

To enter sleep mode, press **Fn+F4**.

**Note:** You can change the action of the **Fn+F4** key combination by changing the settings in Power Manager.

In certain circumstances, the computer goes into sleep mode automatically:

- If a “suspend time” has been set on the timer, and the user does not do any operation with the keyboard, the TrackPoint® pointing device, the hard disk, or the parallel connector within that time.
- If the battery indicator blinks orange, indicating that the battery power is low.

**Note:** Even if you do not set the low-battery alarm, the charge indicator notifies you when the battery is low, and then the computer enters the power-saving mode automatically.

To cause the computer to return from sleep mode and resume operation, do one of the following:

- Press the **Fn** key.
- Open the LCD cover.
- Turn on the power switch.

Also, in either of the following events, the computer automatically returns from sleep mode and resumes operation:

- The ring indicator (RI) is signaled by a serial device or a PC Card device.
- The time set on the resume timer elapses.
Note: The computer does not accept any input immediately after it enters sleep mode. Wait a few seconds before taking any action to reenter operation mode.

Hibernation mode

In hibernation mode, the following occurs:

- The system status, RAM, VRAM, and setup data are stored on the hard disk.
- The system is powered off.

Note: If the computer enters the hibernation mode while it is attached to the docking station, do not undock it before resuming normal operation. If you do undock it and then try to resume normal operation, you will get an error message, and you will have to restart the system.

To put the computer into hibernation mode, use the Power Manager program to define one of the following actions as the event that causes the system to go into hibernation mode. Then perform the defined action.

- Closing the lid
- Pressing the power button
- Pressing Fn+F4 combination

Also, the computer goes into hibernation mode automatically in either of the following conditions:

- If a “hibernation time” has been set on the timer, and if the user does not do any operation with the keyboard, the TrackPoint pointing device, the hard disk drive, or the parallel connector within that time.
- If the timer conditions are satisfied in suspend mode.

When the power is turned on, the computer returns from hibernation mode and resumes operation. The hibernation file in the boot record on the hard disk drive is read, and system status is restored from the hard disk drive.

Symptom-to-FRU index

This section contains following information:

- “Numeric error codes” on page 42
- “Error messages” on page 42
- “No-beep symptoms” on page 43
- “LCD-related symptoms” on page 44
- “Intermittent problems” on page 44
- “Undetermined problems” on page 44

The symptom-to-FRU index in this section lists symptoms and errors and their possible causes. The most likely cause is listed first, in boldface type.

Note: Do the FRU replacement or other actions in the sequence shown in the column headed “FRU or action, in sequence.” If replacing a FRU does not solve the problem, put the original part back in the computer. Do not replace a nondefective FRU.

This index can also help you determine, during regular servicing, what FRUs are likely to need to be replaced next.

A numeric error is displayed for each error detected in POST or system operation. In the displays, n can be any number.
If no numeric code is displayed, check the narrative descriptions of symptoms. If the symptom is not described there, go to “Intermittent problems” on page 44.

Note: For a device not supported by diagnostic codes in the ThinkPad notebook computers, see the manual for that device.

**Numeric error codes**

*Table 1. Numeric error codes*

<table>
<thead>
<tr>
<th>Symptom or error (beeps, if any)</th>
<th>FRU or action, in sequence</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>0187</strong> EAIA data access error—The access to EEPROM is failed.</td>
<td>System board.</td>
</tr>
<tr>
<td><strong>0189</strong> Invalid RFID configuration information area—The EEPROM checksum is not correct.</td>
<td>System board.</td>
</tr>
</tbody>
</table>
| **0190** Critical low-battery error | 1. Charge the battery pack.  
2. Battery pack. |
| **0191** System Security—Invalid Remote Change requested. | 1. Run ThinkPad Setup, and then save current setting by pressing F10.  
2. System board. |
| **0251** System CMOS checksum bad—Default configuration used. | 1. Charge the backup battery for more than 8 hours by connecting the ac power adapter.  
2. Replace the backup battery and run ThinkPad Setup to reset the time and date. |
| **0271** Real Time Clock error—check Date and Time settings. | Run ThinkPad Setup to reset the time and date. |
| **1802** Unauthorized network card is plugged in— Turn off and remove the Mini PCI network card. | 1. Remove Mini PCI network card.  
2. System board. |
| **2110** Read error on HDD0 (Main HDD) | Main HDD |
| **2112** Read error on HDD2 (Mini SATA) | Mini SATA |

**Error messages**

*Table 2. Error messages*

<table>
<thead>
<tr>
<th>Symptom or error (beeps, if any)</th>
<th>FRU or action, in sequence</th>
</tr>
</thead>
</table>
| **Bad CRC of Security Settings in EFI. Enter ThinkPad Setup.** | 1. Press F1 to enter ThinkPad Setup. Press F9, and Enter to load the default setting. Then save the current setting by pressing F10, and restart the computer.  
2. System board. |
| **Fan error.** | 1. **Thermal fan.**  
2. Thermal grease.  
Table 2. Error messages (continued)

</tr>
<tr>
<td>Five short beeps, pause, five short beeps, and pause</td>
<td>Continue to boot immediately when the error was detected.</td>
</tr>
</tbody>
</table>

LCD-related symptoms

**Important:** The TFT LCD for the notebook computer contains many thin-film transistors (TFTs). The presence of a small number of dots that are missing, discolored, or always lighted is characteristic of TFT LCD technology, but excessive pixel problems can cause viewing concerns.

If the LCD you are servicing has two or less visible defective pixels, it should not be considered faulty. However, if the LCD has three or more visible defective pixels, it will be deemed as defective by Lenovo and it should be replaced.

**Notes:**
- This policy applies to all ThinkPad notebook computers purchased on 1 January, 2008 or later.
- Lenovo will not provide replacement if the LCD is within specification as we cannot guarantee that any replacement LCD will have zero pixel defects.
- One pixel consists of R, G, B sub-pixels.

Table 5. LCD-related symptoms

<table>
<thead>
<tr>
<th>Symptom or error</th>
<th>FRU or action, in sequence</th>
</tr>
</thead>
<tbody>
<tr>

<td>4. System board.</td>
</tr>
</tbody>
</table>

Intermittent problems

Intermittent system hang problems can be due to a variety of causes that have nothing to do with a hardware defect, such as cosmic radiation, electrostatic discharge, or software errors. FRU replacement should be considered only when a problem recurs.

Undetermined problems

If the diagnostic tests did not identify the device that has failed, if wrong devices are installed, or if the system simply is not operating, follow these procedures to isolate the failing FRU (do not isolate FRUs that have no defects).

Verify that all attached devices are supported by the computer.
Verify that the power supply being used at the time of the failure is operating correctly. (See “Power system checkout” on page 34.)

1. Turn off the computer.
2. Visually check each FRU for damage. Replace any damaged FRU.
3. Remove or disconnect all of the following devices:
   a. Non-ThinkPad devices
   b. Devices attached to the docking station or the port replicator
   c. Printer, mouse, and other external devices
   d. Battery pack
   e. Hard disk drive
   f. Optical drive
   g. Memory module under the bottom door (if there is one)
   h. PC cards
4. Turn on the computer.
5. Determine whether the problem has been solved.
6. If the problem does not recur, reconnect the removed devices one at a time until you find the failing FRU.
7. If the problem remains, replace the following FRUs one at a time (do not replace a non-defective FRU):
   a. System board
   b. LCD assembly
Chapter 5. Status indicators

This chapter presents the system status indicators that show the status of the computer.

<table>
<thead>
<tr>
<th>Indicator</th>
<th>Meaning</th>
</tr>
</thead>
<tbody>
<tr>
<td>Battery status indicator</td>
<td>• <strong>Steady green</strong>: It indicates one of the following:</td>
</tr>
<tr>
<td></td>
<td>- The battery charge level is 80% or higher.</td>
</tr>
<tr>
<td></td>
<td>- The battery charge level is between 20% and 80%, and the battery is not charging.</td>
</tr>
<tr>
<td></td>
<td>• <strong>Slow blinking green</strong>: The battery charge level is between 20% to 80%, and the battery is charging. When the battery reaches 80% charge, the blinking stops, but the charging continues until the battery is 100% charged.</td>
</tr>
</tbody>
</table>
### Table 6. Status indicators (continued)

Chapter 6. Fn key combinations

The following table describes the functions of Fn key combinations.

**Table 7. Fn key combinations**

<table>
<thead>
<tr>
<th>Key combination</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Fn+F3</td>
<td>Press Fn+F3 to lock the computer.</td>
</tr>
</tbody>
</table>
| Fn+F4           | Press Fn+F4 to put the computer into sleep mode. To return to normal operation, press the Fn key only.  
**Notes:**  
• To use the Fn+F4 key combination, you must install the ThinkPad Power Management Driver on your computer beforehand.  
• If you want to use the combination to put the computer into hibernation mode, change the settings in the Power Manager program. |
| Fn+F5           | Press Fn+F5 to enable or disable the built-in wireless network features.  
**Notes:** To use this function, the following device drivers must be installed on your computer beforehand:  
1. ThinkPad Power Management Driver  
2. On Screen Display Utility  
3. Wireless device drivers |
| Fn+F6           | Press Fn+F6 to open the Communications settings window. From this window, you can take a picture, change the camera and audio settings, and launch the Communications Utility program. |
| Fn+F7           | Press Fn+F7 to switch between the computer display and an external monitor.  
**Note:** You also can use the Windows+P combination to switch between the computer display and an external monitor. |
| Fn+F8           | When you press Fn+F8, the computer display becomes dimmer. |
| Fn+F9           | When you press Fn+F9, the computer display becomes brighter. |
| Fn+F10          | Previous track or scene |
| Fn+F11          | Play or pause |
| Fn+F12          | Next track or scene |
| Fn+B            | Has the same function as the Break key on a conventional keyboard. |
| Fn+P            | Has the same function as the Pause key on a conventional keyboard. |
| Fn+S            | Has the same function as the SysRq key on a conventional keyboard. |
| Fn+K            | Has the same function as the ScrLK key on a conventional keyboard. |
| Fn+Spacebar     | Fn+Spacebar is not supported on your computer.  
**Note:** Though your keyboard comes with a ThinkLight icon on the spacebar, the ThinkLight function is not supported on ThinkPad L430 and L530 models. |
Chapter 7. Locations

This chapter introduces the locations of some computer hardware components.

Locating computer controls, connectors, and indicators

This section introduces the locations of the computer controls, connectors, and indicators.

Front view

1 Integrated camera (on some models)
2 Built-in microphone (on some models)
3 Power button
4 Security keyhole
5 Always On USB connector
6 Optical drive
7 Combo audio jack
8 Media card reader
9 Fingerprint reader (on some models)
10 Touchpad buttons
11 Touch pad
12 TrackPoint buttons
13 TrackPoint pointing stick
14 UltraNav® pointing device
15 Volume control buttons
16 Black button
Rear view

1 ExpressCard slot (on some models)
2 USB 2.0 connectors
3 USB 3.0 connector
4 Mini DisplayPort connector
5 Video graphics array (VGA) connector
6 Fan louvers
7 ac power connector
8 Ethernet connector

Bottom view

1 Battery pack
2 Battery pack latch
3 SIM card slot (on some models)
4 Docking connector
5 Hard disk drive or solid-state drive
6 Memory card slot
7 PCI Express Mini card slot for wireless WAN or mSATA solid-state drive (on some models)

Locating FRUs and CRUs

This topic introduces the following service parts:
- “Major FRUs and CRUs” on page 54
- “LCD FRUs and CRUs” on page 56
Notes:
- Each FRU is available for all types or models, unless otherwise specified.
- **CRU statement for customers:**
  
  You can resolve some problems with your product with a replacement part you can install yourself, called a “Customer Replaceable Unit” or “CRU.” Some CRUs are designated as self-service CRUs and others are designated as optional-service CRUs. **Installation of self-service CRUs is your responsibility.** For optional-service CRUs, you can either install the CRU yourself or you can request that a Service Provider install the CRU according to the warranty service for your product. If you intend on installing the CRU, Lenovo will ship the CRU to you. CRU information and replacement instructions are shipped with your product and are available from Lenovo at any time upon request. You can find a list of CRUs for your product in this Hardware Maintenance Manual. An electronic version of this manual can be found at http://www.lenovo.com/support. Click **User Guides & Manuals** and then follow the on-screen instructions to find the manual for your product. You might be required to return the defective part that is replaced by the CRU. When return is required: (1) return instructions, a prepaid shipping label, and a container will be included with the replacement CRU; and (2) you might be charged for the replacement CRU if Lenovo does not receive the defective CRU within thirty (30) days of your receipt of the replacement CRU. See your Lenovo Limited Warranty documentation for full details.

ThinkPad computers contain the following types of CRUs:
- **Self-service CRUs:** These CRUs unplug or are held by no more than two screws. Examples of these types of CRUs include the ac power adapter, power cord, battery, and hard disk drive. Other self-service CRUs depending on product design might include the memory module, wireless card, keyboard, and palm rest with finger print reader and touch pad.
- **Optional-service CRUs:** These CRUs are isolated parts within the computer that are concealed by an access panel that is typically secured by more than two screws. Once the access panel is removed, the specific CRU is visible.
# Major FRUs and CRUs

**Looking up FRU information**

For detailed FRU information, including part numbers, descriptions, and substitution part numbers, go to [http://www.lenovo.com/serviceparts-lookup](http://www.lenovo.com/serviceparts-lookup).
Chapter 8. FRU replacement notices

This chapter presents notices related to removing and replacing parts. Read this chapter carefully before replacing any FRU.

CRU statement for customers:
You can resolve some problems with your product with a replacement part you can install yourself, called a “Customer Replaceable Unit” or “CRU.” Some CRUs are designated as self-service CRUs and others are designated as optional-service CRUs. Installation of self-service CRUs is your responsibility. For optional-service CRUs, you can either install the CRU yourself or you can request that a Service Provider install the CRU according to the warranty service for your product. If you intend on installing the CRU, Lenovo will ship the CRU to you. CRU information and replacement instructions are shipped with your product and are available from Lenovo at any time upon request. You can find a list of CRUs for your product in this Hardware Maintenance Manual. An electronic version of this manual can be found at http://www.lenovo.com/support. Click User Guides & Manuals and then follow the on-screen instructions to find the manual for your product. You might be required to return the defective part that is replaced by the CRU. When return is required: (1) return instructions, a prepaid shipping label, and a container will be included with the replacement CRU; and (2) you might be charged for the replacement CRU if Lenovo does not receive the defective CRU within thirty (30) days of your receipt of the replacement CRU. See your Lenovo Limited Warranty documentation for full details.

Screw notices
Loose screws can cause a reliability problem. In the ThinkPad notebook computer, this problem is addressed with special nylon-coated screws that have the following characteristics:

- They maintain tight connections.
- They do not easily come loose, even with shock or vibration.
- They are harder to tighten.

Do the following when you service this machine:

- Keep the screw kit in your tool bag. For the part number of the screw kit, go to http://www.lenovo.com/serviceparts-lookup.
- It is recommended to use new screws.
- It is recommended to use each screw only once.
- Use a torque screwdriver if you have one.

Tighten screws as follows:

- **Plastic to plastic**
  Turn an additional 90 degrees after the screw head touches the surface of the plastic part.

  ![90 degrees more](Cross-section)

- **Logic card to plastic**
  Turn an additional 180 degrees after the screw head touches the surface of the logic card.
Notes:
- Ensure that you use the correct screw. It is recommended to use new screws for replacements. If you have a torque screwdriver, tighten all screws firmly to the torque specified in the screw information table for each step.
- Ensure torque screw drivers are calibrated correctly following country specifications.

Retaining serial numbers

This section includes the following descriptions:

- “Restoring the serial number of the system unit” on page 60
- “Retaining the UUID” on page 61
- “Reading or writing the ECA information” on page 61

Restoring the serial number of the system unit

When the computer was manufactured, the EEPROM on the system board was loaded with the serial numbers of the system and all major components. These numbers need to remain the same throughout the life of the computer.

If you replace the system board, you must restore the serial number of the system unit to its original value.

Before replacing the system board, save the original serial number by doing the following:

1. Install the LENOVO ThinkPad Hardware Maintenance Diskette Version 1.76 or later, and restart the computer.
2. From the main menu, select 1. Set System Identification.
3. Select 2. Read S/N data from EEPROM. The serial number of the system unit is listed as 20: Serial number.
4. Write down that number.

Note: The serial number of the system unit also is written on the label attached to the bottom of the computer.

After you have replaced the system board, restore the serial number by doing the following:

1. Install the LENOVO ThinkPad Hardware Maintenance Diskette Version 1.76 or later and restart the computer.
2. From the main menu, select 1. Set System Identification.
3. Select 1. Add S/N data from EEPROM. Follow the instructions on the screen.

If the MTM and Product ID numbers differ from each other on the rear label, use what is shown for the Product ID field. See example below:
MTM on rear label:
TTTT-CTO S/N SSSSSSSS

Product ID on rear label:
TTTT-MMM (Use this number when setting Serial Number)

In the example, the Serial Number to be input is ‘1STTTTMMSSSSSSS’.

Retaining the UUID

The Universally Unique Identifier (UUID) is a 128-bit number uniquely assigned to your computer at production and stored in the EEPROM of your system board.

The algorithm that generates the number is designed to provide unique IDs until the year A.D. 3400. No two computers in the world have the same number.

When you replace the system board, you must set the UUID on the new system board by doing the following:
1. Install the LENOVO ThinkPad Hardware Maintenance Diskette Version 1.76 or later, and restart the computer.
2. From the main menu, select 4. Assign UUID. A new UUID is created and written. If a valid UUID already exists, it is not overwritten.

Reading or writing the ECA information

Information on Engineering Change Announcements (ECA) are stored in the EEPROM of the system board. The electronic storage of this information simplifies the procedure to check if the ECA has been previously applied to a machine. The machine does not need to be disassembled to check for the ECA application.

To check what ECAs have been previously applied to the machine, use the ECA Information Read/Write function on the LENOVO ThinkPad Hardware Maintenance Diskette Version 1.76 or later.
1. Insert the LENOVO ThinkPad Hardware Maintenance Diskette Version 1.76 or later, and restart the computer.
2. From the main menu, select 6. Set ECA Information.
3. To read the ECA information, select 2. Read ECA/rework number from EEPROM and follow the instructions on the screen.
4. To read the box build date, select 5. Read box build date from EEPROM, and follow the instruction on the screen.

After an ECA has been applied to the machine, the EEPROM must be updated to reflect the ECA’s application. Use the LENOVO ThinkPad Hardware Maintenance Diskette Version 1.76 or later to update the EEPROM.

Note: Only the ECA number is stored in the EEPROM. The machine type of the ECA is assumed to be the same as the machine type of the machine that had the ECA applied to it.
1. Insert the LENOVO ThinkPad Hardware Maintenance Diskette Version 1.76 or later, and restart the computer.
2. From the main menu, select 6. Set ECA Information.
3. To write the ECA information, select 1. Write ECA/rework number from EEPROM, and follow the instructions on the screen.
4. To write the box build date, select 4. Write box build date from EEPROM, and follow the instruction on the screen.
If the system board is being replaced, try to read the ECA information from the old system board and transfer the information to the new system. If the system board is inoperable, this will not be possible.
Chapter 9. Removing or replacing a FRU

This chapter provides instructions on how to remove or replace a FRU.

**CRU statement for customers:**
You can resolve some problems with your product with a replacement part you can install yourself, called a “Customer Replaceable Unit” or “CRU.” Some CRUs are designated as self-service CRUs and others are designated as optional-service CRUs. Installation of self-service CRUs is your responsibility. For optional-service CRUs, you can either install the CRU yourself or you can request that a Service Provider install the CRU according to the warranty service for your product. If you intend on installing the CRU, Lenovo will ship the CRU to you. CRU information and replacement instructions are shipped with your product and are available from Lenovo at any time upon request. You can find a list of CRUs for your product in this Hardware Maintenance Manual. An electronic version of this manual can be found at http://www.lenovo.com/support. Click User Guides & Manuals and then follow the on-screen instructions to find the manual for your product. You might be required to return the defective part that is replaced by the CRU. When return is required: (1) return instructions, a prepaid shipping label, and a container will be included with the replacement CRU; and (2) you might be charged for the replacement CRU if Lenovo does not receive the defective CRU within thirty (30) days of your receipt of the replacement CRU. See your Lenovo Limited Warranty documentation for full details.

**General guidelines:**

When removing or replacing a FRU, be sure to observe the following general guidelines:

1. Do not try to service any computer unless you have been trained and certified. An untrained person runs the risk of damaging parts.
2. Before replacing any FRU, review Chapter 8 “FRU replacement notices” on page 59.
3. Begin by removing any FRUs that have to be removed before replacing the failing FRU. Such FRUs are listed at the beginning of each FRU replacement procedure. Remove them in the order in which they are listed.
4. Follow the correct sequence in the steps for removing a FRU, as given in the drawings by the numbers in square callouts.
5. When turning a screw, turn it in the direction as shown by the arrow in the drawing.
6. When removing a FRU, move it in the direction as shown by the arrow in the drawing.
7. To put the new FRU in place, reverse the removal procedure and follow the notes that pertain to replacement.
8. When replacing a FRU, use the correct screw(s) as shown in the replacement procedure.

**DANGER**

Before removing any FRU, turn off the computer, unplug all power cords from electrical outlets, remove the battery pack, and then disconnect any interconnecting cables.

**Attention:** After replacing a FRU, do not turn on the computer until you have made sure that all screws, springs, and other small parts are in place and none are loose inside the computer. Verify this by shaking the computer gently and listening for rattling sounds. Metallic parts or metal flakes can cause electrical short circuits.

**Attention:** The system board is sensitive to, and can be damaged by, electrostatic discharge. Before touching it, establish personal grounding by touching a ground point with one hand or by using an electrostatic discharge (ESD) strap.
Before servicing the computer

Removing the SIM card
Depending on the model, the computer you are servicing might have a SIM card slot. If the customer has installed a SIM card in the slot, remove it before servicing.

To remove the SIM card, you need to remove the battery pack first. See “1010 Battery pack” on page 64.

After you finish the service, insert the card back into the slot.

1010 Battery pack

Important notices for replacing a battery pack:
- This system supports only batteries specially designed for this specific system and manufactured by Lenovo or an authorized builder. The system does not support unauthorized batteries or batteries designed for other systems. If an unauthorized battery or a battery designed for another system is installed, the system will not charge.

Attention: Lenovo has no responsibility for the performance or safety of unauthorized batteries, and provides no warranties for failures or damage arising out of their use.
- The Lenovo Solution Center program provides an automatic battery diagnostic test that determines if the battery pack is defective. A battery pack FRU should not be replaced unless this diagnostic test shows that the battery is defective. The only exception to this is if the battery pack is physically damaged or a customer is reporting a possible safety issue.
- If the Lenovo Solution Center program is not installed in the computer, the customer should download this program before a non-physically damaged battery pack is replaced. Note that a physically damaged battery pack is not covered by the warranty.
Removal steps of battery pack

⚠️ DANGER

Use only the authorized battery specified for your computer. Any other battery could ignite or explode.

Unlock the battery latch 1. Hold the battery lock lever in the unlocked position, and then remove the battery pack in the direction shown by arrow 2.

When installing: Install the battery pack along the slide rails of the slot. Ensure that the battery release lever is in the locked position.

1020 Bottom door

For access, remove this FRU:
• “1010 Battery pack” on page 64

Removal steps of bottom door

Note: Loosen the screws 1, and then remove the bottom door 2.
1030 Optical drive

Removal steps of the optical drive for L530 models

For access, remove this FRU:
- “1010 Battery pack” on page 64

Remove the screw [1] that secures the optical drive.

<table>
<thead>
<tr>
<th>Step</th>
<th>Screw (quantity)</th>
<th>Color</th>

<th>Torque</th>
</tr>
</thead>
<tbody>
<tr>
<td>1</td>
<td>M2 × 3 mm, flat-head, nylon-coated (1)</td>
<td>Black</td>
<td>0.181 Nm (1.85 kgfcm)</td>
</tr>
</tbody>
</table>

Press the edge of the optical drive outwards, using the tip of a thin screwdriver as shown in the following illustration 2 and then pull out the optical drive 3.
1040 Hard disk drive or solid-state drive assembly

For access, remove these FRUs in order:
• “1010 Battery pack” on page 64
• “1020 Bottom door” on page 65

Attention:
• Do not drop the drive or apply any physical shock to it. The drive is sensitive to physical shock. Improper handling can cause damage and permanent loss of data.
• Before removing the drive, have the user make a backup copy of all the information on it if possible.
• Never remove the drive while the computer is operating or is in suspend mode.

Removal steps of hard disk drive or solid-state drive assembly

When installing: Ensure that the hard disk drive or solid-state drive connector is attached firmly.
Removal steps of hard disk drive or solid-state drive bracket

<table>
<thead>

</tbody>
</table>

1050 Keyboard

For access, remove these FRUs in order:
- “1010 Battery pack” on page 64
- “1020 Bottom door” on page 65
Removal steps of keyboard

When installing: Ensure that the screws are fastened and the keyboard is secured.

<table>
<thead>
<tr>
<th>Step</th>
<th>Screw (quantity)</th>
<th>Color</th>
<th>Torque</th>
</tr>
</thead>
<tbody>
<tr>
<td>1</td>
<td>M2 × 14 mm, flat-head, nylon-coated (2)</td>
<td>Black</td>
<td>0.181 Nm (1.85 kgfcm)</td>
</tr>
</tbody>
</table>

Press the keyboard as shown in the following illustration until the hooks on the rear edge of the keyboard are detached from the keyboard bezel.

Lift the keyboard up 3 and then detach the keyboard connectors 4.
When installing: Ensure that all the connectors are attached firmly to the system board.

When installing: Ensure that the hooks on the front edge of the keyboard are under the frame as shown in the following illustration. When the front side of the keyboard is housed firmly, gently press the keys with your palms to slide the keyboard toward you until it snaps into position.
1060 Memory module

Removal steps of the memory module under the bottom door
For access, remove these FRUs in order:
• “1010 Battery pack” on page 64
• “1020 Bottom door” on page 65

When installing: Insert the notched end of the memory module into the socket. Press the memory module firmly, and pivot it until it snaps into place. Ensure that it is firmly installed into the slot and does not move easily.

Note: Do not apply any pressure to the memory module.

Removal steps of the memory module under the keyboard
For access, remove these FRUs in order:
• “1010 Battery pack” on page 64
• “1050 Keyboard” on page 69
• “1100 Keyboard bezel” on page 82
When installing: Insert the notched end of the memory module into the socket. Press the memory module firmly, and pivot it until it snaps into place. Ensure that it is firmly installed into the slot and does not move easily.

Note: Your computer has two memory module slots: one under the bottom door and the other under the keyboard. If only one memory module is to be installed on the computer you are servicing, install it in the slot located under the keyboard.

1070 PCI Express Mini Card for wireless WAN or mSATA solid-state drive

For access, remove these FRUs in order:
- “1010 Battery pack” on page 64
- “1020 Bottom door” on page 65

Depending on model, the computer you are servicing might come with one of the following cards installed: PCI Express Mini Card for wireless WAN, PCI Express Half Mini Card for wireless WAN, or mSATA solid-state drive.
Removal steps of PCI Express Mini Card for wireless WAN

In step 1 unplug the connectors by using the removal tool antenna RF connector, or pick the connectors with your fingers and gently unplug them. Remove the screw 2.

<table>
<thead>
<tr>
<th>Step</th>
<th>Screw (quantity)</th>
<th>Color</th>
<th>Torque</th>
</tr>
</thead>
<tbody>
<tr>
<td>2</td>
<td>M2 × 3 mm, flat-head, nylon-coated (1)</td>
<td>Black</td>
<td>0.181 Nm (1.85 kgfcm)</td>
</tr>
</tbody>
</table>
When installing: Plug the red cable into the jack labeled **MAIN**, and the blue cable into the jack labeled **AUX** on the card.
Removal steps of PCI Express Half Mini Card for wireless WAN

In step 1, unplug the connectors by using the removal tool antenna RF connector, or pick the connectors with your fingers and gently unplug them in the direction of the arrows. Remove the screw 2.

<table>
<thead>
<tr>
<th>Step</th>
<th>Screw (quantity)</th>
<th>Color</th>
<th>Torque</th>
</tr>
</thead>
<tbody>
<tr>
<td>2</td>
<td>M2 × 3 mm, flat-head, nylon-coated (1)</td>
<td>Black</td>
<td>0.181 Nm (1.85 kgfcm)</td>
</tr>
</tbody>
</table>
When installing: Plug the red cable into the jack labeled MAIN, and the blue cable into the jack labeled AUX on the card.

Removal steps of mSATA solid-state drive

Attention:
- Do not drop the drive or apply any physical shock to it. The drive is sensitive to physical shock. Improper handling can cause damage and permanent loss of data.
- Before removing the drive, have the user make a backup copy of all the information on it if possible.
- Never remove the drive while the computer is operating or is in suspend mode.
- After installing the drive, go to http://www.lenovo.com/support for instructions on configuring the drive.
### Step 1

<table>

Chapter 9. Removing or replacing a FRU  83
**When installing:** Ensure that the connectors are attached firmly to the system board.

Release the cables as shown in the following illustration:
Release the keyboard bezel from the frame using a plastic pry tool as shown in the following illustration.

1110 ExpressCard reader board or ExpressCard dummy card

For access, remove these FRUs in order:
• “1010 Battery pack” on page 64
• “1020 Bottom door” on page 65
• “1030 Optical drive” on page 66
• “1040 Hard disk drive or solid-state drive assembly” on page 68
• “1050 Keyboard” on page 69
• “1100 Keyboard bezel” on page 82

If the computer you are servicing supports the ExpressCard, follow the following instructions to remove or replace the ExpressCard reader board.
Removal steps of ExpressCard reader board

<table>
<thead>
<tr>
<th>Step</th>
<th>Screw (quantity)</th>
<th>Color</th>
<th>Torque</th>
</tr>
</thead>
<tbody>
<tr>
<td>1</td>
<td>M2 × 3 mm, flat-head, nylon-coated (3)</td>
<td>Black</td>
<td>0.181 Nm (1.85 kgfcm)</td>
</tr>
</tbody>
</table>

If the computer you are servicing does not support the ExpressCard, there will be a dummy card installed instead. Follow the following instructions to remove or replace the dummy card.
Removal steps of ExpressCard dummy card

<table>
<thead>
<tr>
<th>Step</th>
<th>Screw (quantity)</th>
<th>Color</th>
<th>Torque</th>
</tr>
</thead>
<tbody>
<tr>
<td>1</td>
<td>M2 x 3 mm, flat-head, nylon-coated (2)</td>
<td>Black</td>
<td>0.181 Nm (1.85 kgfcm)</td>
</tr>
</tbody>
</table>

1120 Bluetooth daughter card

For access, remove these FRUs in order:

- “1010 Battery pack” on page 64
- “1020 Bottom door” on page 65
- “1030 Optical drive” on page 66
• “1040 Hard disk drive or solid-state drive assembly” on page 68
• “1050 Keyboard” on page 69
• “1100 Keyboard bezel” on page 82

Removal steps of bluetooth daughter card

<table>
<thead>
<tr>
<th>Step</th>
<th>Screw (quantity)</th>

<td>Black</td>
<td>0.181 Nm (1.85 kgfcm)</td>
</tr>
</tbody>
</table>

When installing: Ensure that the I/O sub card cable is attached firmly to the system board.

1140 Speaker assembly

For access, remove these FRUs in order:
- “1010 Battery pack” on page 64
• “1020 Bottom door” on page 65
• “1030 Optical drive” on page 66
• “1040 Hard disk drive or solid-state drive assembly” on page 68
• “1050 Keyboard” on page 69
• “1100 Keyboard bezel” on page 82

Removal steps of speaker assembly
### 1150 Thermal fan assembly

For access, remove these FRUs in order:
- “1010 Battery pack” on page 64
- “1020 Bottom door” on page 65
- “1030 Optical drive” on page 66
- “1040 Hard disk drive or solid-state drive assembly” on page 68
- “1050 Keyboard” on page 69
- “1100 Keyboard bezel” on page 82

**Attention:**
- Do not handle the thermal fan assembly roughly. Improper handling of the thermal fan assembly can cause distortion or deformation and imperfect contact with components.
- Do not touch or apply any excessive force to the fan motor. It might cause damage to the thermal fan assembly or might cause the computer to malfunction.

**Removal steps of thermal fan assembly**

Detach the thermal fan assembly connector \( \text{A} \). Loosen the screws \( \text{2} \) in ascending alphabetical order as illustrated, but do not remove them.

**Note:** Some models might not have screws \( \text{2e} \) and \( \text{2f} \).
When installing:

- Before you attach the thermal fan assembly to the computer, apply thermal grease, at an amount of 0.2 grams, on the parts marked as in the following illustrations. Either too much or too less application of grease might cause a thermal problem due to imperfect contact with a component. For models that have a discrete thermal fan assembly, you need to peel the thin film off from the rubbers marked B.
- Attach the thermal fan assembly connector to the system board and fasten the screws in ascending alphabetical order as illustrated above.

For models that have a discrete graphics module:
For models that have an integrated graphics module:

1160 Microprocessor

For access, remove these FRUs in order:
- “1010 Battery pack” on page 64
- “1020 Bottom door” on page 65
- “1030 Optical drive” on page 66
- “1040 Hard disk drive or solid-state drive assembly” on page 68
- “1050 Keyboard” on page 69
- “1090 Backup battery” on page 81
- “1100 Keyboard bezel” on page 82
- “1150 Thermal fan assembly” on page 91

Attention: The microprocessor is extremely sensitive. When you service the microprocessor, avoid any kind of rough handling.
Removal steps of microprocessor

Rotate the head of the screw in the direction shown by the arrow 1 to release the lock; then remove the microprocessor 2. After that, peel the mylar off from the microprocessor as shown by the arrow 3.

When installing: Place the microprocessor in the microprocessor socket, and then rotate the head of the screw in the direction shown by the arrow 4 to secure the microprocessor.

1170 DC-in connector and base cover assembly

For access, remove these FRUs in order:
- “1010 Battery pack” on page 64
- “1030 Optical drive” on page 66
- “1050 Keyboard” on page 69
- “1100 Keyboard bezel” on page 82
- “2010 LCD unit” on page 100

Applying labels to the base cover

The new base cover FRU is shipped with a kit containing labels of several kinds. Apply those labels when you replace the base cover.

1. GEO label
2. Taiwan WWAN label (only for Taiwan)
3. FCC label
4. System label
7. Information label
8. S/N label

For the labels which are not shipped with the new base cover, peel them off from the old base cover, and adhere them to the new one.

Notes:

- If the Windows Certificate of Authentication (COA) label 5 is attached to a part that is replaced, return the old part with the label attached to the customer, or provide a letter to the customer stating what the label was originally on the computer and what the label part number, serial number, and product key were.
- For some models, if there are two FCC labels on the old base cover, apply both labels to the new base cover.
The following illustration shows the correct location of each label.

1 GEO label
2 Taiwan WWAN label (only for Taiwan)
3 FCC label
4 System label
5 Windows COA label
6 Non-encryption label (for non-TPM model) or Indonesia rating label
7 Information label
8 S/N label
9 Asset tag
10 IMEI label
11 Wireless label for special bid
12 Asset tag
13 Wireless card label
14 Bluetooth label (only for Brazil)
15 Brazil WWAN label (only for Brazil)
16 SIRIM label or Indonesia POSTEL label
17 China telcom label
18 Israel label
19 China 3G logo WWAN label
20 China WWAN label
21 China 3G WWAN label
22 China GEO label (only for China)

1180 System board assembly and RJ45 sub card

Important notices for handling the system board:
When handling the system board, bear the following in mind:

- The system board has an accelerometer, which can be broken if several thousands of G-forces are applied.

  Note: Dropping a system board from a height of as little as 6 inches so that it falls flat on a hard bench can subject the accelerometer to as much as 6,000 G’s of shock.

- Be careful not to drop the system board on a bench top that has a hard surface, such as metal, wood, or composite.
- If a system board is dropped, be sure to document the drop in any reject report, and replace the system board.
- Avoid rough handling of any kind.
- At every point in the process, be sure not to drop or stack the system board.
- If you put a system board down, be sure to put it only on a padded surface such as an ESD mat or a corrugated conductive surface.

For access, remove these FRUs in order:
- “1010 Battery pack” on page 64
Location of the major sensitive components on the system board

Attention: The following components soldered on the system board are extremely sensitive. When you service the system board, avoid any kind of rough handling.

A Microprocessor
B Platform Controller Hub (PCH)
C Graphic Processing Unit (GPU)
Note: GPU is only for models that have a discrete graphics card.
D Accelerometer chip for the hard disk drive Active Protection System® (APS)

</table>
When installing:

- Ensure that you attach the LCD connector firmly.
- Ensure that you route the cables firmly in the correct position.
- When you route the cables, ensure that they are not subject to any tension. Tension could cause the cables to be damaged by the cable guides, or a wire to be broken.
2020 LCD front bezel

For access, remove this FRU:
• “1010 Battery pack” on page 64

Removal steps of LCD front bezel

</tbody>
</table>

2040 Integrated camera

For access, remove these FRUs in order:
• “1010 Battery pack” on page 64
• “2020 LCD front bezel” on page 102
Some models might not have an integrated camera. If the computer you are servicing has an integrated camera, follow the following instructions to remove or replace it.

**Removal steps of the integrated camera on L530 models**

<table>
<thead>
<tr>
<th>Step</th>
<th>Screw (quantity)</th>
<th>Color</th>
<th>Torque</th>
</tr>
</thead>
<tbody>
<tr>
<td>1</td>
<td>M2 × 3.5 mm, flat-head, nylon-coated (1)</td>
<td>Black</td>
<td>0.181 Nm (1.85 kgfcm)</td>
</tr>
</tbody>
</table>

**Note:** On ThinkPad L430 models, the camera is not secured with a screw. To remove or replace the camera, you can skip step 1 and start from step 2.
When installing: Ensure that the connector is attached firmly.

2050 Antenna assembly

For access, remove these FRUs in order:
- “1010 Battery pack” on page 64
- “1050 Keyboard” on page 69
- “1100 Keyboard bezel” on page 82
- “1070 PCI Express Mini Card for wireless WAN or mSATA solid-state drive” on page 73
- “1080 PCI Express Mini Card for wireless LAN/WiMAX” on page 79
- “2010 LCD unit” on page 100
- “2020 LCD front bezel” on page 102
- “2040 Integrated camera” on page 103

Removal steps of antenna assembly

Release the antenna cables from the cable guides of the LCD rear cover assembly and from the hinges.
When installing: When you route the cables, ensure that they are not subject to any tension. Tension could cause the cables to be damaged by the cable guides, or a wire to be broken.

2060 LCD panel, hinges, and LCD rear cover assembly

For access, remove these FRUs in order:
- “1010 Battery pack” on page 64
- “1050 Keyboard” on page 69
- “1070 PCI Express Mini Card for wireless WAN or mSATA solid-state drive” on page 73
- “1080 PCI Express Mini Card for wireless LAN/WiMAX” on page 79
- “1100 Keyboard bezel” on page 82
- “2010 LCD unit” on page 100
- “2020 LCD front bezel” on page 102

Removal steps of LCD panel, hinges, and LCD rear cover assembly for L430 models

Remove the screws 1 that secure the LCD panel.

<table>
<thead>
<tr>
<th>Step</th>
