Introduction

The LDI Plus Release Notes describe changes in the latest product. The following types of Release Notes are included for this release:

New Features and Enhancements

The following features and enhancements have been added to the tool.

- Previously LDI Plus had two menus under the Configuration, Insights & Automations tab called Alarm Notifications and Alarm Actions. These legacy menus have been removed as they held no working functionality for users and will be replaced in the future with similar functionality for LDI Plus sensors.

Known Issues

The following table displays the issues which existed in one or more previous versions, or in the current version.

| Issue Description | Severity | Workaround | Jira ID |
|--|----------|---|-------------|
| LDI will prompt user with error message when user navigates to the download InTune package page. | Low | No workaround | PMP-17455 |
| The device is not registered to the portal before retrieving the claim code. | Low | Select Services → Universal Device Client Service → Restart to restart the UDC Service. | PMP – 14395 |
