## Introduction

---

The LDI Plus Release Notes describe changes in the latest product. The following types of Release Notes are included for this release:

### New Features and Enhancements

*The following features and enhancements have been added to the tool.*

- Organization Activity History:
  - Ability to track:
    - Device Events
    - User Events
    - Org Events
  - Ability to view, filter, and export the content of the Activity History.
- Miscellaneous:
  - Add Tool Tip Avg CPU Usage - App Performance to reduce confusion about what items show up as impacting performance.
  - Link the user to Microsoft page in default BSOD Detected remediation to provide better remediation steps.
  - Display the latest crashes on Device Lookup first.
  - Show error toast in case of unexpected error on device list load.
  - Update the count of App Performance issues on System Health dashboard.

### Known Issues

*The following table displays the issues which existed in one or more previous versions, or in the current version.*

Issue Description	Severity	Workaround	Jira ID
Agent 2 can be uninstalled when the TPM device is reclaimed.	High	No workaround	PMP - 17332
Agent 2 might not install successfully on MacOS devices.	Low	No workaround	PMP - 14596
