## Introduction

---

The LDI Release Notes describe changes in the latest product. The following types of Release Notes are included for this release:

### New Features and Enhancements

*The following features and enhancements have been added to the tool.*

- Improved Device and Platform Support tickets creation flow.
- Improved filtering abilities.
- Reduced network traffic from agent to cloud to just port 443.  
Previously, Agent to Cloud network traffic had been using \*.uds.lenovo.com ports 443 and 8883. 8883 will no longer be needed once all devices in your fleet are updated to UDC version 22.10.0.5 or newer.

### Known Issues

*The following table displays the issues which existed in one or more previous versions, or in the current version.*

Issue Description	Severity	Workaround	Jira ID
The device is not registered to the portal before retrieving the claim code	Low	Select Services → Universal Device Client Service → Restart to restart the UDC Service.	PMP-14395
The count of Assigned and unassigned license may be wrong on dashboard page.	Low	-Report the problem to the support team for resolution ldisupport@lenovo.com  -Report the problem in the interface. Refer to Raise a Ticket in LDI User Guide.	PMP-17996

The device that is assigned license may be displayed on unlicensed device list.	Low	Same as above ^	PMP-17995
