About this manualiii

Chapter 1. Safety information1

General safety	1
Electrical safety	1
Safety inspection guide	3
Handling devices that are sensitive to electrostatic discharge	3
Grounding requirements	4
Safety notices (multilingual translations)	4

Chapter 2. Important service information19

Strategy for replacing FRUs	19
Strategy for replacing a hard disk drive or a solid-state drive	19
Important notice for replacing a system board	20
How to use error codes	20
Strategy for replacing FRUs for CTO, special-bid, and standard models.	20
Product definition	20
FRU identification	21

Chapter 3. General checkout23

What to do first	23
Checkout guide	24
Diagnosing problems	24
Quick test programs	24
UEFI diagnostic program	25
Bootable diagnostic programs	25
Power system checkout	26
Checking the ac power adapter	26
Checking the built-in battery and operational charging	27
Checking the coin-cell battery	27

Chapter 4. Related service information29

Reset or restore Windows	29
Passwords	29
Power-on password	29
Hard disk password	29
Supervisor password	30
System management password.	30
How to remove the power-on password	31
How to remove the hard disk password.	31
How to remove the system management password	32

Power management	32
Sleep mode	32
Hibernation mode	33
Symptom-to-FRU index	33
Numeric error codes	34
Error messages	35
Beep errors.	36
No-beep symptoms	38
LCD-related symptoms	38
Intermittent problems.	39
Undetermined problems	39

Chapter 5. Special keys41

Chapter 6. Locations43

Locating computer controls, connectors, and indicators	43
Front	43
Base	44
Left	45
Right	46
Bottom	46
Rear	47
Locating FRUs and CRUs	47
Major FRUs and CRUs	48
LCD FRUs	51
Miscellaneous parts	53
Connector and cable guide	53
Looking up FRU information	61

Chapter 7. FRU replacement notices63

Service tool kit	63
Screw notices	63
Retaining serial numbers	64
Restoring the serial number of the system unit	64
Retaining the UUID.	65

Chapter 8. Removing or replacing a FRU.67

General guidelines.	67
Before servicing the computer	68
Disabling the built-in battery	68
Removing the nano-SIM card and the nano-SIM-card tray	68
1010 Keyboard	68
1020 Base cover assembly	70

1030 M.2 solid-state drive	72
1040 Memory module (for selected models)	73
1050 Speaker assembly	74
1060 Wireless WAN card (for selected models)	75
1070 Wireless LAN card (for AMD models)	76
1080 Coin-cell battery	77
1090 Built-in battery	78
1100 Thermal fan assembly	79
1110 Ethernet card cable, bracket and board	81
1120 Always On USB 3.2 connector Gen 1 cable, bracket and board	83
1130 Fingerprint reader cable, bracket and board	84
1140 Smart card reader module and cable (for selected models)	86
1150 Trackpad and cable	88
1160 Hall sensor board with cable	89
1170 NFC module, cable and antenna (for selected Intel models)	89
1180 RFID reader cable and reader (for models with RFID)	90

1190 Power button board and cable	91
1200 System board	93
1210 MIMO wireless-WAN antenna assembly (for selected Intel models)	98
1220 LCD unit	99
1240 Keyboard bezel assembly	104
2010 LCD bezel sheet and LCD bezel	104
2020 LCD panel and LCD elastic adhesive tapes	105
2030 Camera/microphone module	113
2040 LCD hinges	114
2050 Camera/LED cable	115
2060 LCD cable	117
2070 Wireless antenna assembly	117
2080 LCD cover assembly	119

Appendix A. Notices.121

Appendix B. Abbreviation and acronym table123

About this manual

This manual contains service and reference information for the following ThinkPad® products:

Product name	Machine type (MT)
ThinkPad T14 Gen 1	20S0, 20S1, 20S2, 20S3, 20UD and 20UE
ThinkPad P14s Gen 1	20S4, 20S5, 20Y1, and 20Y2

Use this manual along with the advanced diagnostic tests to troubleshoot problems.

Important:

- This manual is intended only for trained service technicians who are familiar with ThinkPad products. Use this manual along with the advanced diagnostic tests to troubleshoot problems effectively.
- Depending on the model, some hardware configuration and software programs might not be available on the computer. Some statements in this manual might not be applicable to the computer.
- Before servicing a ThinkPad product, be sure to read all the information under Chapter 1 “Safety information” on page 1 and Chapter 2 “Important service information” on page 19.

Chapter 1. Safety information

This chapter presents the following safety information that you need to be familiar with before you service a ThinkPad notebook computer.

- “General safety” on page 1
- “Electrical safety” on page 1
- “Safety inspection guide” on page 3
- “Handling devices that are sensitive to electrostatic discharge” on page 3
- “Grounding requirements” on page 4
- “Safety notices (multilingual translations)” on page 4

General safety

Follow these rules to ensure general safety:

- Observe good housekeeping in the area of the machines during and after maintenance.
- When lifting any heavy object:
 1. Ensure that you can stand safely without slipping.
 2. Distribute the weight of the object equally between your feet.
 3. Use a slow lifting force. Never move suddenly or twist when you attempt to lift.
 4. Lift by standing or by pushing up with your leg muscles; this action removes the strain from the muscles in your back. Do not attempt to lift any object that weighs more than 16 kg (35 lb) or that you think is too heavy for you.
- Do not perform any action that causes hazards to the customer, or that makes the equipment unsafe.
- Before you start the machine, ensure that other service technicians and the customer's personnel are not in a hazardous position.
- Place removed covers and other parts in a safe place, away from all personnel, while you are servicing the machine.
- Keep your toolcase away from walk areas so that other people will not trip over it.
- Do not wear loose clothing that can be trapped in the moving parts of a machine. Ensure that your sleeves are fastened or rolled up above your elbows. If your hair is long, fasten it.
- Insert the ends of your necktie or scarf inside clothing or fasten it with a nonconductive clip, about 8 centimeters (3 inches) from the end.
- Do not wear jewelry, chains, metal-frame eyeglasses, or metal fasteners for your clothing, because metal objects are good electrical conductors.
- Wear safety glasses when you are hammering, drilling, soldering, cutting wire, attaching springs, using solvents, or working in any other conditions that might be hazardous to your eyes.
- After service, reinstall all safety shields, guards, labels, and ground wires. Replace any safety device that is worn or defective.
- Reinstall all covers correctly before returning the machine to the customer.
- Fan louvers on the machine help to prevent overheating of internal components. Do not obstruct fan louvers or cover them with labels or stickers.

Electrical safety

Observe the following rules when working on electrical equipment.

Important:

- Use only approved tools and test equipment. Some hand tools have handles covered with a soft material that does not insulate you when working with live electrical currents.
- Many customers have, near their equipment, rubber floor mats that contain small conductive fibers to decrease electrostatic discharges (ESD). Do not use this type of mat to protect yourself from electrical shock.
- Find the room emergency power-off (EPO) switch, disconnecting switch, or electrical outlet. If an electrical accident occurs, you can then operate the switch or unplug the power cord quickly.
- Do not work alone under hazardous conditions or near equipment that has hazardous voltages.
- Disconnect all power before:
 - Performing a mechanical inspection
 - Working near power supplies
 - Removing or installing main units
- Before you start to work on the machine, unplug the power cord. If you cannot unplug it, ask the customer to power off the wall box that supplies power to the machine, and to lock the wall box in the off position.
- If you need to work on a machine that has exposed electrical circuits, observe the following precautions:
 - Ensure that another person, familiar with the power-off controls, is near you. That person must be there to switch off the power, if necessary.
 - Use only one hand when working with powered-on electrical equipment; keep the other hand in your pocket or behind your back.

CAUTION:

An electrical shock can occur only when there is a complete circuit. By observing the above rule, you may prevent a current from passing through your body.

- When using testers, set the controls correctly and use the approved probe leads and accessories for that tester.
- Stand on suitable rubber mats (obtained locally, if necessary) to insulate you from grounds such as metal floor strips and machine frames.

Observe the special safety precautions when you work with very high voltages. Instructions for these precautions are in the safety sections of maintenance information. Use extreme care when measuring high voltages.

- Regularly inspect and maintain your electrical hand tools for safe operational condition.
- Do not use worn or broken tools and testers.
- Never assume that power has been disconnected from a circuit. First, check that it has been powered off.
- Always look carefully for possible hazards in your work area. Examples of these hazards are moist floors, nongrounded power extension cables, power surges, and missing safety grounds.
- Do not touch live electrical circuits with the reflective surface of a plastic dental mirror. The surface is conductive; such touching can cause personal injury and machine damage.
- Do not service the following parts with the power on:
 - Power supply units
 - Pumps
 - Blowers and fans
 - Motor generators
 - Units similar to those listed above

This practice ensures correct grounding of the units.

- If an electrical accident occurs:
 - Use caution; do not become a victim yourself.
 - Switch off power.
 - Send another person to get medical aid.

Safety inspection guide

The purpose of this inspection guide is to assist you in identifying potentially unsafe conditions. As each machine was designed and built, required safety items were installed to protect users and service technicians from injury. This guide addresses only those items. You should use good judgment to identify potential safety hazards due to attachment of non-ThinkPad features or options not covered by this inspection guide.

If any unsafe conditions are present, you must determine how serious the apparent hazard could be and whether you can continue without first correcting the problem.

Consider these conditions and the safety hazards they present:

- Electrical hazards, especially primary power (primary voltage on the frame can cause serious or fatal electrical shock)
- Explosive hazards, such as a damaged CRT face or a bulging capacitor
- Mechanical hazards, such as loose or missing hardware

To determine whether there are any potentially unsafe conditions, use the following checklist at the beginning of every service task. Begin the checks with the power off, and the power cord disconnected.

Checklist:

1. Check exterior covers for damage (loose, broken, or sharp edges).
2. Turn off the computer. Disconnect the power cord.
3. Check the power cord for:
 - a. A third-wire ground connector in good condition. Use a meter to measure third-wire ground continuity for 0.1 ohm or less between the external ground pin and the frame ground.
 - b. The power cord should be the authorized type specified for your computer. Go to: <https://support.lenovo.com/partslookup>.
 - c. Insulation must not be frayed or worn.
4. Check for cracked or bulging batteries.
5. Remove the cover.
6. Check for any obvious non-ThinkPad alterations. Use good judgment as to the safety of any non-ThinkPad alterations.
7. Check inside the unit for any obvious unsafe conditions, such as metal filings, contamination, water or other liquids, or signs of fire or smoke damage.
8. Check for worn, frayed, or pinched cables.
9. Check that the power-supply cover fasteners (screws or rivets) have not been removed or tampered with.

Handling devices that are sensitive to electrostatic discharge

Any computer part containing transistors or integrated circuits (ICs) should be considered sensitive to electrostatic discharge (ESD). ESD damage can occur when there is a difference in charge between objects. Protect against ESD damage by equalizing the charge so that the machine, the part, the work mat, and the person handling the part are all at the same charge.

Notes:

1. Use product-specific ESD procedures when they exceed the requirements noted here.

2. Ensure that the ESD protective devices you use have been certified (ISO 9000) as fully effective.

When handling ESD-sensitive parts:

- Keep the parts in protective packages until they are inserted into the product.
- Avoid contact with other people.
- Wear a grounded wrist strap against your skin to eliminate static on your body.
- Prevent the part from touching your clothing. Most clothing is insulative and retains a charge even when you are wearing a wrist strap.
- Use a grounded work mat to provide a static-free work surface. The mat is especially useful when handling ESD-sensitive devices.
- Select a grounding system, such as those listed below, to provide protection that meets the specific service requirement.

Note: The use of a grounding system to guard against ESD damage is desirable but not necessary.

- Attach the ESD ground clip to any frame ground, ground braid, or green-wire ground.
- When working on a double-insulated or battery-operated system, use an ESD common ground or reference point. You can use coax or connector-outside shells on these systems.
- Use the round ground prong of the ac plug on ac-operated computers.

Grounding requirements

Electrical grounding of the computer is required for operator safety and correct system function. Proper grounding of the electrical outlet can be verified by a certified electrician.

Safety notices (multilingual translations)

The safety notices in this section are provided in the following languages:

- English
- Arabic
- Brazilian Portuguese
- French
- German
- Hebrew
- Japanese
- Korean
- Spanish
- Traditional Chinese

DANGER

Before the computer is powered on after FRU replacement, make sure that all screws, springs, and other small parts are in place and are not left loose inside the computer. Verify this by shaking the computer and listening for rattling sounds. Metallic parts or metal flakes can cause electrical short circuits.

DANGER

Some standby batteries contain a small amount of nickel and cadmium. Do not disassemble a standby battery, recharge it, throw it into fire or water, or short-circuit it. Dispose of the battery as required by local ordinances or regulations. Use only the battery in the appropriate parts listing. Use of an incorrect battery can result in ignition or explosion of the battery.

DANGER

The battery pack contains small amounts of nickel. Do not disassemble it, throw it into fire or water, or short-circuit it. Dispose of the battery pack as required by local ordinances or regulations. Use only the battery in the appropriate parts listing when replacing the battery pack. Use of an incorrect battery can result in ignition or explosion of the battery.

DANGER

The lithium battery can cause a fire, an explosion, or a severe burn. Do not recharge it, remove its polarized connector, disassemble it, heat it above 100°C (212°F), incinerate it, or expose its cell contents to water. Dispose of the battery as required by local ordinances or regulations. Use only the battery in the appropriate parts listing. Use of an incorrect battery can result in ignition or explosion of the battery.

DANGER

If the LCD breaks and the fluid from inside the LCD gets into your eyes or on your hands, immediately wash the affected areas with water for at least 15 minutes. Seek medical care if any symptoms from the fluid are present after washing.

DANGER

To avoid shock, do not remove the plastic cover that protects the lower part of the inverter card.

DANGER

Though the main batteries have low voltage, a short-circuited or grounded battery can produce enough current to burn personnel or combustible materials.

DANGER

Unless hot swap is allowed for the FRU being replaced, do as follows before removing it: power off the computer, unplug all power cords from electrical outlets, remove the battery pack, and disconnect any interconnecting cables.

قبل اعادة تشغيل الحاسب بعد الانتهاء من استبدال FRU، تأكد من أنه قد تم اعادة كل من المسامير و السوست وكل الأجزاء الصغيرة الأخرى في أماكنهم ولم يتم فقدهم داخل الحاسب. ويمكن التحقق من ذلك عن طريق هز الحاسب والاستماع لأي صوت صاخب يصدر منه. قد تؤدي الأجزاء أو الرقائق المعدنية الى حدوث دائرة قصر.

تحتوي بعض البطاريات الاحتياطية على كمية صغيرة من مادتي النيكل والكاديوم. لا تقم بفك أو اعادة شحن البطارية الاحتياطية ولا تقم أيضا بالقائها في النار أو الماء ولا تتسبب في احداث دائرة قصر بها. قم بالتخلص من البطارية كما هو موضح في القوانين المحلية. استخدم نوع البطارية المحدد والذي يوصى باستخدامه. حيث أنه قد يؤدي استخدام نوع بطارية غير صحيح الى اشتعالها أو انفجارها.

تحتوي حزمة البطارية على كمية صغيرة من مادة النيكل. لا تقم بفكها أو القاءها في النار أو الماء ولا تتسبب في احداث دائرة قصر بها. تخلص من حزمة البطارية وفقا لما هو موضح في القوانين المحلية. قم، عند استبدال حزمة البطارية، باستخدام الأنواع المحددة فقط والتي يوصى باستخدامها. حيث أنه قد يؤدي استخدام نوع بطارية غير صحيح الى اشتعالها أو انفجارها.

قد تتسبب بطارية الليثيوم في حدوث حريق أو انفجار أو حدوث حروق شديدة. لا تقم باعادة شحن البطارية أو ازالة موصل الاستقطاب الخاص بها ولا تحاول أيضا فكها أو تسخينها لأكثر من ١٠٠ درجة مئوية (٢١٢ فهرنهايت) أو حرقها أو تعريض محتويات الخانة الخاصة بها للماء. قم بالتخلص من البطارية وفقا لما هو موضح في القوانين المحلية. استخدم نوع البطارية المحدد والذي يوصى باستخدامه. حيث أنه قد يؤدي استخدام نوع بطارية غير صحيح الى اشتعالها أو انفجارها.

إذا ما انكسرت شاشة LCD ولامس السائل الداخلي عينيك أو يديك، قم في الحال بغسلهما بالماء لمدة لا تقل عن ١٥ دقيقة. إذا ما وجدت أي أعراض بعد الغسل اطلب عندئذ المساعدة الطبية.

لتجنب التعرض لأي صدمات، لا تقم بإزالة الغطاء البلاستيكي الذي يحمي الجزء الأسفل من بطاقة العاكس.

على الرغم من أن البطاريات الرئيسية يكون لها جهد منخفض، إلا أنه قد تقوم البطاريات التي حدث قصور بها أو التي تم توصيلها أرضيا بإصدار تيار يكفي لحدوث حروق للأفراد أو تعرض المواد القابلة للاشتعال للحريق.

ما لم يتم السماح بالتبديل الفوري لأي FRU الجاري استبداله بدون ضرورة اغلاق النظام، قم بتنفيذ ما يلي قبل ازالته. قم بإيقاف تشغيل الحاسب ونزع كل أسلاك الطاقة من المخرج الكهربائية وقم أيضا بإزالة حزمة البطارية ثم قم بفصل أي كابلات متصلة.

PERIGO

Antes de ligar o computador após a substituição da FRU, certifique-se de que todos os parafusos, molas e outras peças pequenas estejam no lugar e não estejam soltos dentro do computador. Verifique isso sacudindo o computador e procurando ouvir sons de peças soltas. Peças metálicas ou lascas de metal podem causar curto-circuito.

PERIGO

Algumas baterias reserva contêm uma pequena quantidade de níquel e cádmio. Não desmonte uma bateria reserva, recarregue-a, jogue-a no fogo ou na água, ou deixe-a entrar em curto-circuito. Descarte a bateria conforme requerido pelas leis ou regulamentos locais. Use somente a bateria nas partes listadas apropriadas. O uso de uma bateria incorreta pode resultar em combustão ou explosão da bateria.

PERIGO

O pacote da bateria contém uma pequena quantidade de níquel. Não o desmonte, jogue-o no fogo ou na água, ou deixe-o entrar em curto-circuito. Descarte o pacote da bateria conforme requerido pelas leis ou regulamentos locais. Use somente a bateria nas partes listadas apropriadas ao substituir o pacote da bateria. O uso de uma bateria incorreta pode resultar em combustão ou explosão da bateria.

PERIGO

A bateria de lítio pode causar incêndio, explosão ou graves queimaduras. Não a recarregue, remova seu conector polarizado, desmonte-a, aqueça-a acima de 100°C (212°F), incinere-a, ou exponha o conteúdo de sua célula à água. Descarte a bateria conforme requerido pelas leis ou regulamentos locais. Use somente a bateria nas partes listadas apropriadas. O uso de uma bateria incorreta pode resultar em combustão ou explosão da bateria.

PERIGO

Se o LCD quebrar e o fluido de dentro dele entrar em contato com seus olhos ou com suas mãos, lave as áreas afetadas imediatamente com água durante pelo menos 15 minutos. Procure cuidados médicos se algum sintoma causado pelo fluido surgir após a lavagem.

PERIGO

Para evitar choque elétrico, não remova a capa plástica que protege a parte inferior da placa inversora.

PERIGO

Embora as principais baterias possuam baixa voltagem, uma bateria em curto-circuito ou aterrada pode produzir corrente o bastante para queimar materiais de pessoal ou inflamáveis.

PERIGO

A menos que uma hot swap seja permitida para a FRU que está sendo substituída, faça o seguinte antes de removê-la: desligue o computador, desconecte todos os cabos de energia das tomadas, remova o pacote de baterias e desconecte quaisquer cabos de interconexão.

DANGER

Avant de remettre l'ordinateur sous tension après remplacement d'une unité en clientèle, vérifiez que tous les ressorts, vis et autres pièces sont bien en place et bien fixées. Pour ce faire, secouez l'unité et assurez-vous qu'aucun bruit suspect ne se produit. Des pièces métalliques ou des copeaux de métal pourraient causer un court-circuit.

DANGER

Certaines batteries de secours contiennent du nickel et du cadmium. Ne les démontez pas, ne les rechargez pas, ne les exposez ni au feu ni à l'eau. Ne les mettez pas en court-circuit. Pour les mettre au rebut, conformez-vous à la réglementation en vigueur. Lorsque vous remplacez la pile de sauvegarde ou celle de l'horloge temps réel, veillez à n'utiliser que les modèles cités dans la liste de pièces détachées adéquate. Une batterie ou une pile inappropriée risque de prendre feu ou d'exploser.

DANGER

La batterie contient du nickel. Ne la démontez pas, ne l'exposez ni au feu ni à l'eau. Ne la mettez pas en court-circuit. Pour la mettre au rebut, conformez-vous à la réglementation en vigueur. Lorsque vous remplacez la batterie, veillez à n'utiliser que les modèles cités dans la liste de pièces détachées adéquate. En effet, une batterie inappropriée risque de prendre feu ou d'exploser.

DANGER

La pile de sauvegarde contient du lithium. Elle présente des risques d'incendie, d'explosion ou de brûlures graves. Ne la rechargez pas, ne retirez pas son connecteur polarisé et ne la démontez pas. Ne l'exposez pas à une température supérieure à 100°C, ne la faites pas brûler et n'en exposez pas le contenu à l'eau. Mettez la pile au rebut conformément à la réglementation en vigueur. Une pile inappropriée risque de prendre feu ou d'exploser.

DANGER

Si le panneau d'affichage à cristaux liquides se brise et que vous recevez dans les yeux ou sur les mains une partie du fluide, rincez-les abondamment pendant au moins quinze minutes. Consultez un médecin si des symptômes persistent après le lavage.

DANGER

Afin d'éviter tout risque de choc électrique, ne retirez pas le cache en plastique protégeant la partie inférieure de la carte d'alimentation.

DANGER

Bien que le voltage des batteries principales soit peu élevé, le court-circuit ou la mise à la masse d'une batterie peut produire suffisamment de courant pour brûler des matériaux combustibles ou causer des brûlures corporelles graves.

DANGER

Si le remplacement à chaud n'est pas autorisé pour l'unité remplaçable sur site que vous remplacez, procédez comme suit avant de retirer l'unité : mettez l'ordinateur hors tension, débranchez tous les cordons d'alimentation des prises de courant, retirez le bloc de batterie et déconnectez tous les câbles d'interconnexion.

VORSICHT

Bevor nach einem FRU-Austausch der Computer wieder angeschlossen wird, muß sichergestellt werden, daß keine Schrauben, Federn oder andere Kleinteile fehlen oder im Gehäuse vergessen wurden. Der Computer muß geschüttelt und auf Klappergeräusche geprüft werden. Metallteile oder-splitter können Kurzschlüsse erzeugen.

VORSICHT

Die Bereitschaftsbatterie, die sich unter dem Diskettenlaufwerk befindet, kann geringe Mengen Nickel und Cadmium enthalten. Sie darf nur durch die Verkaufsstelle oder den IBM Kundendienst ausgetauscht werden. Sie darf nicht zerlegt, wiederaufgeladen, kurzgeschlossen, oder Feuer oder Wasser ausgesetzt werden. Die Batterie kann schwere Verbrennungen oder Verätzungen verursachen. Bei der Entsorgung die örtlichen Bestimmungen für Sondermüll beachten. Beim Ersetzen der Bereitschafts-oder Systembatterie nur Batterien des Typs verwenden, der in der Ersatzteilliste aufgeführt ist. Der Einsatz falscher Batterien kann zu Entzündung oder Explosion führen.

VORSICHT

Akkus enthalten geringe Mengen von Nickel. Sie dürfen nicht zerlegt, wiederaufgeladen, kurzgeschlossen, oder Feuer oder Wasser ausgesetzt werden. Bei der Entsorgung die örtlichen Bestimmungen für Sondermüll beachten. Beim Ersetzen der Batterie nur Batterien des Typs verwenden, der in der Ersatzteilliste aufgeführt ist. Der Einsatz falscher Batterien kann zu Entzündung oder Explosion führen.

VORSICHT

Die Systembatterie ist eine Lithiumbatterie. Sie kann sich entzünden, explodieren oder schwere Verbrennungen hervorrufen. Batterien dieses Typs dürfen nicht aufgeladen, zerlegt, über 100°C erhitzt oder verbrannt werden. Auch darf ihr Inhalt nicht mit Wasser in Verbindung gebracht oder der zur richtigen Polung angebrachte Verbindungsstecker entfernt werden. Bei der Entsorgung die örtlichen Bestimmungen für Sondermüll beachten. Beim Ersetzen der Batterie nur Batterien des Typs verwenden, der in der Ersatzteilliste aufgeführt ist. Der Einsatz falscher Batterien kann zu Entzündung oder Explosion führen.

VORSICHT

Die Leuchtstoffröhre im LCD-Bildschirm enthält Quecksilber. Bei der Entsorgung die örtlichen Bestimmungen für Sondermüll beachten. Der LCD-Bildschirm besteht aus Glas und kann zerbrechen, wenn er unsachgemäß behandelt wird oder der Computer auf den Boden fällt. Wenn der Bildschirm beschädigt ist und die darin befindliche Flüssigkeit in Kontakt mit Haut und Augen gerät, sollten die betroffenen Stellen mindestens 15 Minuten mit Wasser abgespült und bei Beschwerden anschließend ein Arzt aufgesucht werden.

VORSICHT

Aus Sicherheitsgründen die Kunststoffabdeckung, die den unteren Teil der Spannungswandlerplatine umgibt, nicht entfernen.

VORSICHT

Obwohl Hauptbatterien eine niedrige Spannung haben, können sie doch bei Kurzschluß oder Erdung genug Strom abgeben, um brennbare Materialien zu entzünden oder Verletzungen bei Personen hervorzurufen.

VORSICHT

Wenn ein Austausch der FRU bei laufendem Betrieb nicht erlaubt ist, gehen Sie beim Austausch der FRU wie folgt vor: Schalten Sie den Computer aus, ziehen Sie alle Netzkabel von den Netzsteckdosen ab, entfernen Sie den Akku und ziehen Sie alle miteinander verbundenen Kabel ab.

סכנה

לפני הפעלת המחשב לאחר החלפת FRU יש לוודא שכל חברגים, חקפצים, וחלקים קטנים אחרים נמצאים במקומם ואינם חופשיים לזוז בתוך המחשב. כדי לוודא זאת, יש לטלטל את המחשב ולחשיב לגילוי קולות שקשוק. חלקי או שבבי מתכת עלולים לגרום לקצרים חשמליים.

סכנה

סוללות המתנה מסוימות מכילות כמות קטנה של ניקל וקדמיום. אין לפרק סוללות המתנה, לסעון אותה מחדש, להשליך אותה לאש או למים או לקצר אותה. יש לסלק את הסוללה בזהירות על ידי התקנות והחוקים המקומיים. יש להשתמש רק בסוללה המומינה ברשימת החלקים המתאימה. שימוש בסוללה לא מתאימה עלול לגרום להצתה או התפוצצות של הסוללה.

סכנה

מארו הסוללה מכיל כמות קטנה של ניקל וקדמיום. אין לפרק את מארו הסוללה, להשליך אותו לאש או למים או לקצר אותו. יש לסלק את מארו הסוללה הסוללה בזהירות על ידי התקנות והחוקים המקומיים. יש להשתמש רק בסוללה המומינה ברשימת החלקים המתאימה בזמן החלפת מארו הסוללה. שימוש בסוללה לא מתאימה עלול לגרום להצתה או התפוצצות של הסוללה.

סכנה

סוללת הליתיום עלולה לגרום לשריפה, להתפוצצות או לכוויות קשות. אין לטעון אותה מחדש, לשלף את המחבר המקוטב שלה, לפרק אותה או לחמם אותה לסמפרטורה העולה על 100 מעלות צלזיוס. אין לשרוף את הסוללה ואין לחשוף את תוכן הוצא למים. יש לשלף את הסוללה בנדרש בתקנות ובחוקים המקומיים. יש להשתמש רק בסוללה המופיעה ברשימת החלקים המתאימים. שימוש בסוללה אחרת עלול לגרום לסכנת שריפה או התפוצצות.

סכנה

אם מסך הנביש הנוזלי (LCD) נשבר והנוזל מתוך המסך בא במגע עם עיניים או ידיים, שטפו את האזורים הנגועים מיד במים במשך 15 דקות לפחות. פנו לקבלת עזרה רפואית אם תסמינים הנובעים מחמגע עם הנוזל נמשכים לאחר חטיפה.

סכנה

כדי למנוע התחשמלות, אין להסיר את מכסה הפלסטיק המגן על חלקו התחתון של הכרטיס החמך.

סכנה

אף שהסוללות הראשיות הן בעלות מתח נמוך, סוללה מקוצרת או מוארכת עלולה להפיק זרם מספיק לגרימת כוויות או לחצות חומרים דליקים.

סכנה

אלא אם כן מותרת 'החלפה חמה' של ה-FRU המוחלף, פעלו כדלהלן לפני חסרתו: כבו את המחשב, נתקו את כל כבלי החשמל מחשקעים, הוציאו את מארז הסוללות ונתקו את כל הכבלים המחוברים.

危険

FRUの交換後、コンピューターの電源を入れる前に、ねじ、パネ、その他の小さな部品がすべて正しい位置にあり、コンピューターの内部でそれらが緩んでいないことを確認してください。これを確認するには、コンピューターを振って、カチャカチャと音がしないか確認します。金属部品や金属破片はショートの原因になることがあります。

危険

予備バッテリーの中には少量のニッケルとカドミウムが含まれているものがあります。したがって、予備バッテリーの分解、再充電、火または水の中への投棄、またはショートさせることは決して行わないでください。バッテリーを廃棄する場合は地方自治体の条例に従ってください。適切なパーツ・リストにあるバッテリーだけを使用してください。誤ったバッテリーを使用すると、バッテリーが発火したり、爆発したりすることがあります。

危険

バッテリー・パックには少量のニッケルが含まれています。バッテリー・パックを分解したり、火または水の中に投げ込んだり、ショートさせないでください。バッテリー・パックの廃棄にあたっては、地方自治体の条例または規則に従ってください。バッテリー・パックを交換するときは、適切なパーツ・リストにあるバッテリーだけを使用してください。誤ったバッテリーを使用すると、バッテリーが発火したり、爆発したりすることがあります。

危険

リチウム・バッテリーは、火災、爆発、または重症のやけどを引き起こすことがあります。バックアップ・バッテリーの充電、その極性コネクタの取り外し、バッテリー本体の分解、100 °C (212 °F) 以上の加熱、焼却、電池の中身を水に浸すことはしないでください。バッテリーを廃棄する場合は地方自治体の条例に従ってください。適切なパーツ・リストにあるバッテリーだけを使用してください。誤ったバッテリーを使用すると、バッテリーが発火したり、爆発したりすることがあります。

危険

LCD が破損し、LCD 中の液体が目に入ったり、手に触れたりした場合は、液体が触れた部分を少なくとも 15 分間洗い流してください。洗い流した後に、液体によって何らかの症状が現れた場合は、医師の治療を受けてください。

危険

感電を防ぐため、インバーター・カードの下部を保護しているプラスチック・カバーを外さないでください。

危険

メイン・バッテリーの電圧は低くても、ショートしたり、接地したバッテリーが、作業者にやけどを負わせたり、可燃物を燃やすだけの電流を発生させる場合があります。

危険

交換しようとしている FRU がホット・スワップに対応していない場合、それを取り外す前に、コンピューターの電源をオフにし、すべての電源コードをコンセントから抜き、バッテリー・パックを取り外して、相互接続しているケーブルをすべて切り離してください。

위험

FRU를 교체하고 나서 컴퓨터 전원을 켜기 전에 모든 나사, 스프링 및 기타 작은 부품들이 올바른 위치에 있는지, 컴퓨터 내부에 단단하게 연결되어 있는지 확인하십시오. 컴퓨터를 흔들어 달각거리는 소리가 나지 않는지 확인하십시오. 금속 부품 또는 금속 조각은 누전을 일으킬 수 있습니다.

위험

일부 보조 배터리에는 소량의 니켈 및 카드뮴이 포함되어 있습니다. 보조 배터리를 분해하거나, 다시 충전하거나, 불 또는 물에 던지거나, 단락시키지 마십시오. 배터리 팩을 폐기할 때에는 해당 지역의 법률 규정을 따르십시오. 배터리 팩을 교체할 때에는 올바른 배터리만 사용하십시오. 올바르지 않은 배터리를 사용하면 배터리가 발화되거나 폭발할 수 있습니다.

위험

배터리 팩에는 소량의 니켈이 포함되어 있습니다. 배터리 팩을 분해하거나, 불 또는 물에 던지거나, 단락시키지 마십시오. 배터리 팩을 폐기할 때에는 해당 지역의 법률 규정을 따르십시오. 배터리 팩을 교체할 때에는 올바른 배터리만 사용하십시오. 올바르지 않은 배터리를 사용하면 배터리가 발화되거나 폭발할 수 있습니다.

위험

리튬 배터리는 화재, 폭발 또는 심각한 화상을 일으킬 수 있습니다. 리튬 배터리를 다시 충전하거나, 극성 커넥터를 제거하거나, 분해하거나, 100°C(212°F) 이상으로 가열하거나, 소각하거나, 전지 내용물을 물에 노출시키지 마십시오. 배터리를 폐기할 때에는 해당 지역의 법률 규정을 따르십시오. 올바른 배터리만 사용하십시오. 올바르지 않은 배터리를 사용하면 배터리가 발화되거나 폭발할 수 있습니다.

위험

LCD가 파손되어 LCD 내부의 액체가 눈에 들어가거나 손에 묻으면 즉시 깨끗한 물로 15분 이상 닦아 내십시오. 씻은 후에 조금이라도 이상을 느끼면 즉시 병원에 가서 의사의 진찰을 받아야 합니다.

위험

전기적 위험을 방지하려면 인버터 카드의 아래 부분을 보호하는 플라스틱 덮개를 제거하지 마십시오.

위험

기본 배터리의 전압은 낮지만, 단락되거나 접지된 배터리는 화상을 입히기에 충분한 전류와 가연성 물질을 발생시킬 수 있습니다.

위험

FRU 교체 시 Hot Swap이 지원되지 않는 경우, FRU를 제거하기 전에 컴퓨터의 전원을 끄고, 전기 콘센트에서 전원 코드를 분리하고, 배터리를 제거한 후, 연결된 모든 케이블을 분리하십시오.

PELIGRO

Antes de encender el sistema después de sustituir una FRU, compruebe que todos los tornillos, muelles y demás piezas pequeñas se encuentran en su sitio y no se encuentran sueltas dentro del sistema. Compruébelo agitando el sistema y escuchando los posibles ruidos que provocarían. Las piezas metálicas pueden causar cortocircuitos eléctricos.

PELIGRO

Algunas baterías de reserva contienen una pequeña cantidad de níquel y cadmio. No las desmonte, ni recargue, ni las eche al fuego o al agua ni las cortocircuite. Deséchelas tal como dispone la normativa local. Utilice sólo baterías que se encuentren en la lista de piezas. La utilización de una batería no apropiada puede provocar la ignición o explosión de la misma.

PELIGRO

Las baterías contienen pequeñas cantidades de níquel. No las desmonte, ni recargue, ni las eche al fuego o al agua ni las cortocircuite. Deséchelas tal como dispone la normativa local. Utilice sólo baterías que se encuentren en la lista de piezas al sustituir la batería. La utilización de una batería no apropiada puede provocar la ignición o explosión de la misma.

PELIGRO

La batería de repuesto es una batería de litio y puede provocar incendios, explosiones o quemaduras graves. No la recargue, ni quite el conector polarizado, ni la desmonte, ni caliente por encima de los 100°C (212°F), ni la incinere ni exponga el contenido de sus celdas al agua. Deséchela tal como dispone la normativa local.

PELIGRO

Si la LCD se rompe y el fluido de su interior entra en contacto con sus ojos o sus manos, lave inmediatamente las áreas afectadas con agua durante 15 minutos como mínimo. Obtenga atención médica si se presenta algún síntoma del fluido después de lavarse.

PELIGRO

Para evitar descargas, no quite la cubierta de plástico que rodea la parte baja de la tarjeta invertida.

PELIGRO

Aunque las baterías principales tienen un voltaje bajo, una batería cortocircuitada o con contacto a tierra puede producir la corriente suficiente como para quemar material combustible o provocar quemaduras en el personal.

PELIGRO

Salvo que se permita el intercambio en caliente para la unidad sustituible localmente, realice lo siguiente antes de extraerla: apague el sistema, desconecte todos los cables de alimentación de las tomas de alimentación eléctrica, extraiga la batería y desconecte los cables de interconexión.

危險

完成 FRU 更換之後，在開啟電腦的電源之前，請確定所有螺絲、彈簧及其他小零件都已歸位，沒有遺留在電腦內部。
若要確認這一點，請搖晃電腦，聽聽看是否有卡嗒的聲響。
金屬零件或鐵鏈的火花會造成電線短路。

危險

部分備用電池含有微量的鎳和銅。請勿拆開備用電池、再充電、丟入火或水中，或使其形成短路。請按照當地法令或規定來棄置電池。
僅限使用零件清單中的電池。使用不適當的電池會導致電池起火或爆炸。

危險

電池套件含有微量的鎳。請勿拆開電池套件、丟入火或水中，或使其形成短路。請按照當地法令或規定來棄置電池套件。
更換電池套件時，僅限使用零件清單中的電池。使用不適當的電池會導致電池起火或爆炸。

危險

鋰電池會導致起火、爆炸或嚴重燒傷。請勿再充電、拔除其電極接頭、拆開、加熱超過 100°C (212°F)、焚燒，或讓電池組成物浸到水。請按照當地法令或規定來棄置電池。
僅限使用零件清單中的電池。使用不適當的電池會導致電池起火或爆炸。

危險

如果 LCD 破裂導致 LCD 流出的液體沾到您的眼睛或手，請立即以清水沖洗沾染部位至少 15 分鐘。如果在清洗後出現該液體所造成的任何症狀，請就醫治療。

危險

為避免電擊，請勿拆下轉換卡下面的塑膠護蓋。

危險

雖然主電池的電壓很低，但短路或接地電池所產生的電流，仍足以使人燒傷或使可燃物質起火。

危險

除非 FRU 允許以熱抽換來替換，否則請依下列方式將其移除：將電腦關機，拔除插座上所有電源線，移除電池包，並拔開任何交互連接的線材。

Chapter 2. Important service information

This chapter introduces the following important service information that applies to all machine types supported by this manual:

- “Strategy for replacing FRUs” on page 19
 - “Strategy for replacing a hard disk drive or a solid-state drive” on page 19
 - “Important notice for replacing a system board” on page 20
 - “How to use error codes” on page 20
- “Strategy for replacing FRUs for CTO, special-bid, and standard models” on page 20
 - “Product definition” on page 20
 - “FRU identification” on page 21

Important:

- Advise customers to contact the Lenovo Customer Support Center if they need any assistance in obtaining or installing any software fixes, drivers, and UEFI BIOS downloads. Telephone numbers for Lenovo Support are available at:
<https://pcsupport.lenovo.com/supportphonenumberlist>
- System disassembly and reassembly videos that show the FRU removal or replacement procedures for the Lenovo authorized service technicians are available at:
<http://www.lenovoservicetraining.com/ion/>

Strategy for replacing FRUs

Before replacing parts:

Ensure that all software fixes, drivers, and UEFI BIOS downloads are installed before you replace any FRUs listed in this manual.

After a system board is replaced, ensure that the latest UEFI BIOS is loaded to the system board before you complete the service action.

To download and install software fixes, drivers, and UEFI BIOS, go to <https://support.lenovo.com> and follow the instructions on the screen.

Use the following strategy to prevent unnecessary expense for replacing and servicing FRUs:

- If you are instructed to replace a FRU but the replacement does not correct the problem, reinstall the original FRU before you continue.
- Some computers have both a processor board and a system board. If you are instructed to replace either the processor board or the system board, and replacing one of them does not correct the problem, reinstall that board, and then replace the other one.
- If an adapter or a device consists of more than one FRU, any of the FRUs might be the cause of the error. Before replacing the adapter or device, remove the FRUs, one by one, to see if the symptoms change. Replace only the FRU that changed the symptoms.

Strategy for replacing a hard disk drive or a solid-state drive

Always try to run a low-level format operation before replacing a hard disk drive or a solid-state drive. This will cause all customer data on the drive to be lost. Ensure that the customer has a current backup of the data before you perform this task.

Attention: The drive startup sequence in the computer you are servicing might have been changed. Be extremely careful during write operations such as copying, saving, or formatting. If you select an incorrect drive, data or programs can be overwritten.

Important notice for replacing a system board

Some components mounted on a system board are very sensitive. Improper handling of a system board can cause damage to those components, and may cause a system malfunction.

Attention: When handling a system board:

- Do not drop a system board or apply any excessive force to it.
- Avoid rough handling of any kind.
- Avoid bending a system board and hard pushing to prevent cracking at each Ball Grid Array (BGA) chipset.

How to use error codes

Use the error codes displayed on the screen to diagnose failures. If more than one error code is displayed, begin the diagnosis with the first error code. Whatever causes the first error code might also cause false error codes. If no error code is displayed, see whether the error symptom is listed in the “Symptom-to-FRU Index” section.

Strategy for replacing FRUs for CTO, special-bid, and standard models

This topic provides information about the model types and FRU identification.

Product definition

This topic introduces different model types and how to identify each type.

Dynamic Configure To Order (CTO) model

This model provides the ability for a customer to configure a Lenovo solution from a Web site, and have this configuration sent to fulfillment, where it is built and shipped directly to the customer. The machine label and eSupport will load these products as the 4-character MT, 4-character model, and 2-character country code. The model is “CTO1” and the default country code is “WW” (example: 20AACTO1WW).

Special-bid model

This model is a unique configuration that has been negotiated between Lenovo and the customer. A unique MTM consists of a 4-character MT, a 4-character model, and a numeric 2-character country code is provided to the customer to place orders (example: 20AA000955). The country code assigned is numeric and does not designate a specific country or region. The custom model factsheet for the MTM indicates which country the special-bid MTM is set up for. Special-bid offering is not generally announced.

Standard model

Standard models (fixed configuration) are announced and offered to all customers. The MTM portion of the machine label consists of a 4-character MT, a 4-character model, and an alphabetic 2-character country code. The country code assigned is alphabetic and represents a designated country or region (example: 20AA0009UK).

FRU identification

To identify FRUs for a product, do the following:

1. Go to: <https://support.lenovo.com/partslookup>
2. Type the Machine Type in the corresponding field to get a general FRU list, or type the Serial Number for more detailed FRU information.

Chapter 3. General checkout

This chapter presents following information:

- “What to do first” on page 23
- “Checkout guide” on page 24
- “Power system checkout” on page 26

Some descriptions in this chapter might not apply to your particular computer.

Before you go to the checkout guide, be sure to read the following important notes.

Important notes:

- **Only certified trained personnel should service the computer.**
- **Before replacing any FRU, read the entire page on removing and replacing FRUs.**
- **When you replace FRUs, it is recommended to use new nylon-coated screws.**
- **Be extremely careful during such write operations as copying, saving, or formatting.** Drives in the computer that you are servicing sequence might have been altered. If you select an incorrect drive, data or programs might be overwritten.
- **Replace a FRU only with another FRU of the correct model.** When you replace a FRU, ensure that the model of the machine and the FRU part number are correct.
- **A FRU should not be replaced because of a single, unreproducible failure.** Single failures can occur for a variety of reasons that have nothing to do with a hardware defect, such as cosmic radiation, ESD, or software errors. Consider replacing a FRU only when a problem recurs. If you suspect that a FRU is defective, clear the error log and run the test again. If the error does not recur, do not replace the FRU.
- **Be careful not to replace a nondefective FRU.**

What to do first

When you return a FRU, you must include the following information in the parts exchange form or parts return form that you attach to it:

1. Name and phone number of service technician
2. Date of service
3. Date on which the machine failed
4. Date of purchase
5. Failure symptoms, error codes appearing on the display, and beep symptoms
6. Procedure index and page number in which the failing FRU was detected
7. Failing FRU name and part number
8. Machine type, model number, and serial number
9. Customer's name and address

Note: During the warranty period, the customer may be responsible for repair costs if the computer damage was caused by misuse, accident, modification, unsuitable physical or operating environment, or improper maintenance by the customer. Following is a list of some common items that are not covered under warranty and some symptoms that might indicate that the system was subject to stress beyond normal use.

Before checking problems with the computer, determine whether the damage is covered under the warranty by referring to the following list:

The following are not covered under warranty:

- LCD panel cracked from the application of excessive force or from being dropped
- Scratched (cosmetic) parts

- Distortion, deformation, or discoloration of the cosmetic parts
- Plastic parts, latches, pins, or connectors that have been cracked or broken by excessive force
- Damage caused by liquid spilled into the system
- Damage caused by the improper insertion of a PC Card or the installation of an incompatible card
- Diskette drive damage caused by pressure on the diskette drive cover, foreign material in the drive, or the insertion of a diskette with multiple labels
- Damaged or bent diskette eject button
- Fuses blown by attachment of a nonsupported device
- Forgotten computer password (making the computer unusable)
- Sticky keys caused by spilling a liquid onto the keyboard
- Use of an incorrect ac power adapter on laptop products

The following symptoms might indicate damage caused by nonwarranted activities:

- Missing parts might be a symptom of unauthorized service or modification.
- Check for obvious damage to a hard disk drive. If the spindle of a hard disk drive becomes noisy, the hard disk drive might have been dropped or subject to excessive force.

Checkout guide

Use the following procedures as a guide in identifying and correcting problems with the ThinkPad notebook computer.

Note: The diagnostic tests are intended to test only ThinkPad products. The use of non-ThinkPad products, prototype cards, or modified options can lead to false indications of errors and invalid system responses.

1. Identify the failing symptoms in as much detail as possible.
2. Verify the symptoms. Try to re-create the failure by running the diagnostic test or by repeating the operation.

Diagnosing problems

Many computer problems can be solved without outside assistance. If you experience a problem with your computer, the first place to start is the troubleshooting information in your computer documentation. If you suspect a software problem, see the documentation, including readme files and help information systems, that come with the operating system or program.

Lenovo Vantage is preinstalled on your computer. It supports the hardware scan function. It combines diagnostic tests, system information collection, security status, and support information, along with hints and tips for optimal system performance.

Note: If you are unable to isolate and repair the problem yourself after running the program, save and print the log files created by the program. You need the log files when you speak to a Lenovo technical support representative.

The troubleshooting information or the diagnostic programs might tell you that you need additional or updated device drivers or other software. You can get the latest technical information and download device drivers and updates from the Lenovo Support Web site at:

<https://support.lenovo.com>

For additional information, see the help system of the program.

Quick test programs

Run quick test programs to troubleshoot and resolve computer problems, especially when the computer does not have Lenovo Vantage installed.

To download and install a quick test program, go to <https://www.lenovo.com/diags>, and follow the instructions on the Web site.

To run a test using quick test program, do the following:

1. Go to the C:\SWTOOLS\ldiag directory.
2. Double-click the lsc_lite.exe file.
3. When the **User Account Control** window opens, click **Yes**.
4. Select the device class to be tested.
5. Select the devices to be tested.
6. Select the test to be performed.
7. Follow the instructions on the screen to start the test. When a problem is detected, information messages are displayed. Refer to the messages to troubleshoot the problem.

UEFI diagnostic program

A UEFI diagnostic program is preinstalled on the computer. This program enables you to view system information and test some hardware devices in your computer, such as memory, storage devices, the LCD, and system board buses.

To run the UEFI diagnostic program, do the following:

1. Turn on the computer. If the computer cannot be turned on, go to “Power system checkout” on page 26, and check the power sources. If an error code is displayed, go to “Symptom-to-FRU index” on page 33 for error code descriptions and troubleshooting hints.
2. When the ThinkPad logo is displayed, repeatedly press and release the F10 key. The main screen of the UEFI diagnostic program is displayed.
3. Follow the instructions on the screen to use the program.

The following table displays the main items of the UEFI diagnostic program. Depending on the model, the items might differ slightly.

Table 1. Items on the main screen of the UEFI diagnostic program

Tests	Tools
<ul style="list-style-type: none">• Memory quick test• Memory extended test• Memory bit fade test (180 min)• Quick storage device test• LCD test• PCI-e test• Motherboard buses test• Exit application	<ul style="list-style-type: none">• System information• Generate configuration file• Execute from configuration file• Recover bad sectors tool

Note: The recover bad sectors tool is only available on computers that have hard disk drives installed.

Bootable diagnostic programs

If the computer you are servicing is not installed with the UEFI diagnostic program, you can download a bootable diagnostic program from the Lenovo Support Web site. The bootable diagnostic program enables you to view system information and test some hardware devices in your computer, such as memory, storage devices, the LCD, and system board buses. To use the bootable diagnostic program, you can create a bootable diagnostic medium using a USB device or disc.

To create a bootable diagnostic medium, do the following:

1. Go to <https://www.lenovo.com/diags>.
2. Click **Lenovo Bootable Diagnostics**.
3. Follow the instructions on the Web site to create a bootable diagnostic medium on a USB device or disc.

To use the diagnostic medium you have created, do one of the following:

- If you have created the bootable diagnostic medium on a USB device, do the following:
 1. Attach the USB device to the computer.
 2. Turn on the computer. If the computer cannot be turned on, go to “Power system checkout” on page 26, and check the power sources. If an error code is displayed, go to “Symptom-to-FRU index” on page 33 for error code descriptions and troubleshooting hints.
 3. When the ThinkPad logo is displayed, repeatedly press and release the F12 key. When the Boot Menu window opens, release the F12 key.
 4. Use the arrow keys to select **USB HDD** and then press Enter. The diagnostic program launches.
 5. Follow the instructions on the screen to use the diagnostic program.
- If you have created the bootable diagnostic medium using a disc, do the following:
 1. Turn on the computer. If the computer cannot be turned on, go to “Power system checkout” on page 26, and check the power sources. If an error code is displayed, go to “Symptom-to-FRU index” on page 33 for error code descriptions and troubleshooting hints.
 2. Insert the disc into the optical drive.
 3. Restart the computer.
 4. When the ThinkPad logo is displayed, repeatedly press and release the F12 key. When the Boot Menu window opens, release the F12 key.
 5. Use the arrow keys to select **ATAPI CDx** (x: 0, 1, ...) and then press Enter. The diagnostic program launches.
 6. Follow the instructions on the screen to use the diagnostic program.

Power system checkout

To verify if a battery or an ac power adapter is functional, do the following:

1. Turn off the computer.
2. Connect the ac power adapter.
3. Turn on the computer. If the computer can be turned on, it means that either the battery or the ac power adapter is functional.
4. Insert a straightened paper clip into the emergency-reset hole to reset the computer. If the computer is still powered on, it means that the ac power adapter is functional.
5. Turn off the computer.
6. Disconnect the ac power adapter and turn on the computer. If the computer can be turned on, it means that the battery is functional.

If you suspect a power problem, see the appropriate one of the following power supply checkouts:

- “Checking the ac power adapter” on page 26
- “Checking the built-in battery and operational charging” on page 27
- “Checking the coin-cell battery” on page 27

Checking the ac power adapter

You are here because the computer fails only when the ac power adapter is used.

- If the power problem occurs only when the docking station or the port replicator is used, replace the docking station or the port replicator.

- If the system status indicator does not blink three times when an ac power source is connected, check the power cord of the ac power adapter for correct continuity and installation.
- If the computer does not charge during operation, go to “Checking the built-in battery and operational charging” on page 27.

Note: Noise from the ac power adapter does not always indicate a defect.

Checking the USB-C type ac power adapter

To check the USB-C type ac power adapter, do the following:

1. Connect the computer to a power outlet and turn on the computer.
2. Start Lenovo Vantage program, and then click **Hardware Settings → Power**. The ac power adapter information is displayed.

Ensure that you use the USB-C type ac power adapter that is shipped with the computer to provide enough power to the computer. Otherwise, a message will be displayed, prompting you that the computer will not be charged or will be charged slowly.

Checking the built-in battery and operational charging

This computer supports only batteries specially designed for this specific system and manufactured by Lenovo or an authorized builder. The system does not support unauthorized batteries or batteries designed for other systems. If an unauthorized battery or a battery designed for another systems is installed, the system will not charge.

Attention: Lenovo has no responsibility for the performance or safety of unauthorized batteries, and provides no warranties for failures or damage arising out of their use.

Move your pointer to the battery-status icon in the Windows notification area to check the battery status. The battery-status icon displays the percentage of battery power remaining and how long you can use your computer before you must charge the battery.

To check whether the battery charges properly during operation, do the following:

1. Discharge the battery until the remained battery power is less than 50%.
2. Connect the computer to ac power to charge the battery. If the battery status icon in the Windows notification area indicates that the battery is not charging, remove the battery and let it return to room temperature.
3. Reinstall the battery. If the battery is still not charging, replace the battery.
4. Check the battery status icon again. If the same error still exists, replace the system board.

Checking the coin-cell battery

Do the following:

1. Power off the computer, and unplug the ac power adapter from it.
2. Turn the computer upside down.
3. Remove the built-in battery (see “1090 Built-in battery” on page 78).
4. Remove the coin-cell battery (see “1080 Coin-cell battery” on page 77).
5. Measure the voltage of the battery. See the following figure.

Wire	Voltage (V dc)
Red	+2.5 to +3.2
Black	Ground

- If the voltage is correct, replace the system board.
- If the voltage is not correct, replace the coin-cell battery.
- If the coin-cell battery discharges quickly after replacement, replace the system board.

Chapter 4. Related service information

This chapter presents following information:

- “Reset or restore Windows” on page 29
- “Passwords” on page 29
- “Power management” on page 32
- “Symptom-to-FRU index” on page 33

Service Web site:

When the latest maintenance diskette and the system program service diskette become available, they will be posted on:

<https://support.lenovo.com>

Reset or restore Windows

To reset or restore Windows, refer to the information below :

- Use Lenovo recovery options.
 1. Go to <https://support.lenovo.com/HowToCreateLenovoRecovery>.
 2. Follow the on-screen instructions.
- Use Window recovery options.
 1. Go to <https://pcsupport.lenovo.com>.
 2. Detect your computer or manually select your computer model.
 3. Click **Diagnostics → Operating system Diagnostics** and then follow the on-screen instructions.

Passwords

As many as four passwords might be needed for a ThinkPad notebook computer: the power-on password, the hard disk password, the supervisor password, and the system management password.

If any of these passwords has been set, a prompt for it will be displayed on the screen whenever the computer is turned on. The computer does not start until the password is entered.

Note: If only a supervisor password is set, the password prompt will not be displayed when the operating system is started.

Power-on password

A power-on password protects the system from being turned on by an unauthorized person. The password must be entered before the operating system can be started. For instructions on how to remove the power-on password, see “How to remove the power-on password” on page 31.

Hard disk password

There are two hard disk passwords:

- User hard disk password - for the user
- Master hard disk password - for the system administrator, who can use it to get access to the hard disk even if the user has changed the user hard disk password.

Note: There are two modes for the hard disk password: **User only** and **Master + User**. The **Master + User** mode requires two hard disk passwords; the system administrator enters both in the same operation. The system administrator then provides the user hard disk password to the system user.

Attention: If the user hard disk password has been forgotten, check whether a master hard disk password has been set. If a master hard disk password has been set, it can be used to access the hard disk drive. If no master hard disk password is available, neither Lenovo nor Lenovo authorized service technicians provide any services to reset either the user hard disk password or the master hard disk password, or to recover data from the hard disk drive. The hard disk drive can be replaced for a scheduled fee.

For instructions on how to remove the hard disk password, see “How to remove the hard disk password” on page 31.

Supervisor password

The supervisor password protects the system information stored in the ThinkPad Setup program. It provides the following security features:

- If only a supervisor password is set, a password prompt is displayed when you try to start the ThinkPad Setup program. Unauthorized users cannot change most of the system configuration options in the ThinkPad Setup program without the password.
- The system administrator can use the supervisor password to access a computer even if the user of that computer has set a power-on password. The supervisor password overrides the power-on password.
- The system administrator can set the same supervisor password on many ThinkPad notebook computers to make administration easier.

Attention: If the supervisor password has been forgotten and cannot be made available to the service technician, there is no service procedure to reset the password. The system board must be replaced for a scheduled fee.

System management password

The system management password can also protect the system information stored in UEFI BIOS like a supervisor password, but it has lower authority by default. The system management password can be set through the UEFI BIOS menu or through Windows Management Instrumentation (WMI) with the Lenovo client-management interface.

You can enable the system management password to have the same authority as the supervisor password to control security related features. To customize the authority of the system management password through the UEFI BIOS menu:

1. Enter the UEFI BIOS menu.

Note: When prompted to enter the password, enter the correct supervisor password if a supervisor password has been set, or enter the correct system management password if no supervisor password has been set. Otherwise, you cannot change the configurations in the following steps.

2. Select **Security → Password → System Management Password Access Control**.
3. Follow the on-screen instructions.

If you have set both the supervisor password and the system management password, the supervisor password overrides the system management password. If you have set both the system management password and the power-on password, the system management password overrides the power-on password.

How to remove the power-on password

To remove the power-on password, do one of the following:

If no supervisor password has been set, do the following to remove the power-on password:

1. Turn off the computer.
2. Remove the battery. For instructions on how to remove the battery, see “1090 Built-in battery” on page 78.
3. Remove the coin-cell battery. For instructions on how to remove the coin-cell battery, see “1080 Coin-cell battery” on page 77.
4. Turn on the computer and wait until the POST ends. After the POST ends, the password prompt will not be displayed. The power-on password has been removed.
5. Reinstall the coin-cell battery and the battery.

If a supervisor password or a system management password has been set and is known to the service technician, do the following to remove the power-on password:

1. Turn on the computer.
2. When the ThinkPad logo is displayed, immediately press F1.
3. Type the supervisor password or the system management password to enter the ThinkPad Setup program.
4. Select **Security**.
5. Select **Password**.
6. Select **Power-On Password**.
7. Type the current supervisor password or the system management password in the **Enter Current Password** field. Then, leave the **Enter New Password** field blank, and press Enter twice.
8. In the Changes have been saved window, press Enter.
9. Press F10 to save changes and exit the ThinkPad Setup program.

How to remove the hard disk password

Attention: If **User only** mode is selected and the user hard disk password has been forgotten and cannot be made available to the service technician, neither Lenovo nor Lenovo authorized service technicians provide any services to reset the user hard disk password, or to recover data from the hard disk drive. The hard disk drive can be replaced for a scheduled fee. To put the system back to operational status, the only Lenovo and Lenovo-authorized service solution would be to replace the hard disk drive or solid-state drive with a scheduled fee.

To remove a user hard disk password that has been forgotten, when the supervisor password and the master hard disk password are known, do the following:

1. Turn on the computer.
2. When the ThinkPad logo is displayed, immediately press F1 to enter the ThinkPad Setup program.
3. Select **Security**.
4. Select **Password**.
5. Select **Hard-disk x password** where x is the letter of the hard disk drive. A pop-up window opens.
6. Select **Master HDP**, where HDP stands for hard disk password.
7. Type the current master hard disk password in the **Enter Current Password** field. Then, leave the **Enter New Password** field blank, and press Enter twice.
8. Press F10 to save changes and exit the ThinkPad Setup program. The user hard disk password and the master hard disk password have been removed.

How to remove the system management password

To remove a system management password, do the following:

If no supervisor password has been set, do the following to remove the system management password:

1. Turn off the computer and disconnect ac power.
2. Disable the built-in battery. See “Disabling the built-in battery” on page 68.
3. Remove the base cover assembly. See “1020 Base cover assembly” on page 70.
4. Remove the built-in battery. See “1090 Built-in battery” on page 78.
5. Remove the coin-cell battery. See “1080 Coin-cell battery” on page 77.
6. Reinstall the coin-cell battery.
7. Reinstall the built-in battery.
8. Reinstall the base cover assembly.
9. Reconnect ac power.
10. Turn on the computer and wait until the POST ends. After the POST ends, the password prompt does not appear. The system management password has been removed.

If a supervisor password has been set and is known to the service technician, do the following to remove the system management password:

1. Turn on the computer.
2. When the ThinkPad logo is displayed, immediately press F1.
3. Type the supervisor password to enter the ThinkPad Setup program.
4. Select **Security**.
5. Select **Password**.
6. Select **System Management Password**.
7. Type the current supervisor password in the **Enter Current Password** field. Then leave the **Enter New Password** field blank, and press Enter twice.
8. In the Changes have been saved window, press Enter.
9. Press F10 to save changes and exit the ThinkPad Setup program. The system management password has been removed.

Power management

To reduce power consumption, the computer has two power management modes: sleep and hibernation.

Sleep mode

When the computer enters sleep mode, the following events occur:

- The LCD is powered off.
- The hard disk drive or solid-state drive is powered off.
- The microprocessor stops.

To put your computer into sleep mode, open the Start menu, click  **Power**, and then click **Sleep**.

In certain circumstances, the computer goes into sleep mode automatically:

- After a period of inactivity specified in power plan settings
- When the battery power is low

To cause the computer to return from sleep mode and resume operation, do one of the following:

- Press any key.
- Open the LCD cover.
- Turn on the power button.

Also, in either of the following events, the computer automatically returns from sleep mode and resumes operation:

- The ring indicator (RI) is signaled by a serial device or a PC Card device.
- The time set on the resume timer elapses.

Note: The computer does not accept any input immediately after it enters sleep mode. Wait a few seconds before taking any action to reenter operation mode.

Hibernation mode

In hibernation mode, the following occurs:

- The system status, RAM, VRAM, and setup data are stored on the hard disk drive or solid-state drive.
- The system is powered off.

Note: If the computer enters the hibernation mode while it is connected to the dock, do not disconnect it before resuming normal operation. If you do disconnect it and then try to resume normal operation, you will get an error message, and you will have to restart the system.

If you have defined one of the following actions as the event that causes the system to go into hibernation mode, perform that action.

- Closing the lid.
- Pressing the power button.

Also, the computer goes into hibernation mode automatically after a period of inactivity specified in power plan settings.

When the power is turned on, the computer returns from hibernation mode and resumes operation. The hibernation file in the boot record on the hard disk drive or solid-state drive is read, and system status is restored from the hard disk drive or solid-state drive.

Symptom-to-FRU index

This section contains following information:

- “Numeric error codes” on page 34
- “Error messages” on page 35
- “Beep errors” on page 36
- “No-beep symptoms” on page 38
- “LCD-related symptoms” on page 38
- “Intermittent problems” on page 39
- “Undetermined problems” on page 39

The symptom-to-FRU index in this section lists symptoms and errors and their possible causes. The most likely cause is listed first, in boldface type.

Note: Do the FRU replacement or other actions in the sequence shown in the column headed “FRU or action, in sequence.” If replacing a FRU does not solve the problem, put the original part back in the computer. Do not replace a nondefective FRU.

This index can also help you determine, during regular servicing, what FRUs are likely to need to be replaced next.

A numeric error is displayed for each error detected in POST or system operation. In the displays, **n** can be any number.

If no numeric code is displayed, check the narrative descriptions of symptoms. If the symptom is not described there, go to “Intermittent problems” on page 39.

Note: For a device not supported by diagnostic codes in the ThinkPad notebooks, see the manual for that device.

Numeric error codes

Table 2. Numeric error codes

Symptom or error (beeps, if any)	FRU or action, in sequence
0177 Bad SVP data, stop POST task—The checksum of the supervisor password in the EEPROM is not correct.	Replace the system board.
0183 Bad CRC of Security Settings in EFI Variable. Enter the ThinkPad Setup program. – The checksum of the Security settings in the EFI Variable is not correct.	<ol style="list-style-type: none"> 1. Run the ThinkPad Setup program. The settings will be corrected automatically. Then save the current settings by pressing F10. 2. If step 1 does not work, replace the system board.
0187 EAIA data access error - The access to EEPROM is failed.	Replace the system board.
0188 Invalid RFID Serialization Information Area.	Replace the system board.
0189 Invalid RFID configuration information area - The EEPROM checksum is not correct.	Replace the system board.
0190 Critical low-battery error	<ol style="list-style-type: none"> 1. Charge the battery. 2. If step 1 does not work, replace the battery.
0191 System Security - Invalid Remote Change requested.	<ol style="list-style-type: none"> 1. Run the ThinkPad Setup program, and then save current setting by pressing F10. 2. If step 1 does not work, replace the system board.
0199 System Security - Security password retry count exceeded.	<ol style="list-style-type: none"> 1. Run the ThinkPad Setup program. The retry count will be reset. Then save the current settings by pressing F10. 2. If step 1 does not work, replace the system board.
0251 System CMOS checksum bad - Default configuration used.	<ol style="list-style-type: none"> 1. Charge the coin-cell battery for more than 8 hours by connecting the ac power adapter. 2. If step 1 does not work, replace the coin-cell battery and run the ThinkPad Setup program to reset the time and date.
0271 Real-Time Clock Error. Check Date and Time settings.	<ol style="list-style-type: none"> 1. Run ThinkPad Setup to reset the time and date 2. If step 1 does not work, replace the coin-cell battery and run the ThinkPad Setup program to reset the time and date.
1802 Unauthorized network card is plugged in - Turn off and remove the network card.	<ol style="list-style-type: none"> 1. Remove the network card. 2. If step 1 does not work, replace the system board.

Table 2. Numeric error codes (continued)

Symptom or error (beeps, if any)	FRU or action, in sequence
1820 More than one external fingerprint reader is attached. Power off and remove all but the reader that you set up within your main operating system.	Remove all but the reader that you set up for the authentication
2000 ThinkVantage Active Protection sensor diagnostics failed.	Have the computer serviced.
2100 Detection error on Main HDD (HDD0)	<ol style="list-style-type: none"> 1. Reseat the M.2 solid-state drive. 2. If step 1 does not work, replace the M.2 solid-state drive. 3. If step 2 does not work, replace the system board.
2101 Detection error on Main HDD (HDD0)	<ol style="list-style-type: none"> 1. Reseat the M.2 solid-state drive. 2. If step 1 does not work, replace the M.2 solid-state drive. 3. If step 2 does not work, replace the system board.
2110 Read error on M.2 Main Slot (HDD0)	<ol style="list-style-type: none"> 1. Reseat the M.2 solid-state drive. 2. If step 1 does not work, replace the M.2 solid-state drive. 3. If step 2 does not work, replace the system board.
2111 Read error on M.2 Main Slot (HDD0)	<ol style="list-style-type: none"> 1. Reseat the M.2 solid-state drive. 2. If step 1 does not work, replace the M.2 solid-state drive. 3. If step 2 does not work, replace the system board.
2200 Machine Type and Serial Number are invalid.	Replace the system board.
2201 Machine UUID is invalid	Replace the system board.
2202 Brand Name is invalid.	Have the computer serviced.
2203 System configuration is invalid.	<ol style="list-style-type: none"> 1. Boot to ThinkPad Maintenance Utility. 2. Click Update Configuration Area → Product Function ID. 3. Input the corresponding function ID. <ul style="list-style-type: none"> • ThinkPad P15v Gen 1: 0x40 • ThinkPad T15p Gen 1: 0x00 4. Restart the computer.
2204 System configuration data is invalid.	Have the computer serviced.

Error messages

Table 3. Error messages

Symptom or error (beeps, if any)	FRU or action, in sequence
Fan error. (two short beeps)	<ol style="list-style-type: none"> 1. Replace the fan. 2. Apply thermal grease. 3. Replace the system board.
Thermal sensing error.	Replace the system board.

Table 3. Error messages (continued)

Symptom or error (beeps, if any)	FRU or action, in sequence
The battery installed is not supported by this system and will not charge. Please replace the battery with the correct Lenovo battery for this system. Press the ESC key to continue.	Replace the battery.
This system does not support batteries that are not genuine Lenovo-made or authorized. The system will continue to boot, but may not charge unauthorized batteries. Attention: Lenovo has no responsibility for the performance or safety of unauthorized batteries, and provides no warranties for failures or damage arising out of their use.	Replace the battery.

Beep errors

Lenovo SmartBeep technology enables you to decode beep errors with your smartphone when a black screen occurs with beeps from your computer. To decode the beep error with Lenovo SmartBeep technology, do the following:

1. Go to <https://support.lenovo.com/smartbeep> or scan the following QR Code.

2. Download the proper diagnostic app and install it on your smartphone.
3. Run the diagnostic app and place the smartphone near the computer.
4. Press the Fn key on your computer to emit the beep again. The diagnostic app decodes the beep error and shows possible solutions on the smartphone.

The following section describes some beep errors and the corresponding solutions.

Note: Do not attempt to service a product yourself unless instructed to do so by the Customer Support Center or product documentation. Only use a Lenovo-authorized service provider to repair your product.

Error codes	Solutions
0001: Reset error (platform reset not de-asserted)	<ol style="list-style-type: none"> 1. Remove the ac power adapter and the removable battery if your computer has one. Then, reset the computer by doing one of the following: <ul style="list-style-type: none"> • For models with the emergency-reset hole, insert a straightened paper clip into the emergency-reset hole. Wait for one minute. Then, reconnect all power resources and restart the computer. • For models without the emergency-reset hole, press and hold the power button for about seven seconds. Then, reconnect to all power resources and restart the computer. 2. If step 1 does not work, replace the system board (service provider only).
0002: Internal bus error	Replace the system board (service provider only).
0281: General embedded controller error	Replace the system board (service provider only).
0282: Memory module error	<ol style="list-style-type: none"> 1. Reinstall or replace the memory module. 2. If step 1 does not work, replace the system board (service provider only).
0283: PCI resource error	<ol style="list-style-type: none"> 1. Remove PCIe devices (the M.2 card, PCIe card, and so on) (service provider only). 2. If step 1 does not work, replace the system board (service provider only).
0284: TCG-compliant functionality-related error (might be the BIOS code validation failure)	Replace the system board (service provider only).
0285: TCG-compliant functionality-related error (might be the TPM initialization failure)	Replace the system board (service provider only).
0286: Integrated graphics error	Replace the system board (service provider only).
0287: Discrete graphics error	<ol style="list-style-type: none"> 1. Reinstall or replace the discrete graphics card (service provider only). 2. If step 1 does not work, replace the system board (service provider only).
0288: Computer display error	<ol style="list-style-type: none"> 1. Reconnect the display cable on both the system board side and the computer display side (service provider only) and check the LCD panel. 2. If step 1 does not work, connect an external display to your computer and check the status (customer or service provider). <ul style="list-style-type: none"> • If the external display works, replace the LCD panel (service provider only). • If the external display does not work, replace the system board (service provider only).

No-beep symptoms

Table 4. No-beep symptoms

Symptom or error	FRU or action, in sequence
No beep, power-on indicator on, LCD blank, and no POST.	<ol style="list-style-type: none">1. Run LCD Self Test.2. Ensure that every connector is connected tightly and correctly.3. Reseat memory module.4. Replace the system board.
No beep, power-on indicator on, and LCD blank during POST.	<ol style="list-style-type: none">1. Run LCD Self Test.2. Reseat memory module.3. Replace the system board.
The power-on password prompt appears.	A power-on password or a supervisor password is set. Type the password and press Enter.
The hard-disk password prompt appears.	A hard-disk password is set. Type the password and press Enter.

LCD-related symptoms

Important: The TFT LCD for the notebook computer contains many thin-film transistors (TFTs). The presence of a small number of dots that are missing, discolored, or always lighted is characteristic of TFT LCD technology, but excessive pixel problems can cause viewing concerns.

If the LCD you are servicing has two or less visible defective pixels, it should not be considered faulty. However, if the LCD has three or more visible defective pixels, it will be deemed as defective by Lenovo and it should be replaced.

Notes:

- This policy applies to all ThinkPad Notebooks purchased on 1 January, 2008 or later.
- Lenovo will not provide warranty replacement if the LCD is within specifications because we cannot guarantee that any replacement LCD will have zero pixel defects.
- One pixel consists of R, G, B sub-pixels.

LCD Self Test

When you turn on the computer and the LCD goes black, run LCD Self Test to help you determine whether the LCD functions normally.

To run LCD Self Test:

1. Ensure that the computer is connected to ac power. Then, press the power button for about seven seconds to turn off the computer.
2. Press Fn, left Ctrl, and the power button at the same time. If the computer displays five solid colors in sequence across the entire screen, it indicates that the LCD functions normally.
3. The test lasts for about 20 seconds and then exits automatically. You also can press the power button to exit the test.

Table 5. LCD-related symptoms

Symptom or error	FRU or action, in sequence
No beep, power-on indicator on, and a blank LCD during POST.	<ol style="list-style-type: none"> 1. Run LCD Self Test. 2. Replace the system board.
<ul style="list-style-type: none"> • LCD backlight not working. • LCD too dark. • LCD brightness cannot be adjusted. • LCD contrast cannot be adjusted. 	<ol style="list-style-type: none"> 1. Reseat the LCD connectors. 2. Replace the LCD assembly. 3. Replace the system board.
<ul style="list-style-type: none"> • LCD screen unreadable. • Characters missing pixels. • Screen abnormal. • Wrong color displayed. 	<ol style="list-style-type: none"> 1. See important note for “LCD-related symptoms.” 2. Reseat all LCD connectors. 3. Replace the LCD assembly. 4. Replace the system board.
Horizontal or vertical lines displayed on LCD.	Replace the LCD assembly.

Intermittent problems

Intermittent system hang problems can be due to a variety of causes that have nothing to do with a hardware defect, such as cosmic radiation, ESD, or software errors. FRU replacement should be considered only when a problem recurs.

When analyzing an intermittent problem, do the following:

1. Run the diagnostic test for the system board in loop mode **at least 10 times**.
2. If no error is detected, do not replace any FRUs.
3. If any error is detected, replace the FRU shown by the FRU code. Rerun the test to verify that no more errors exist.

Undetermined problems

If the diagnostic tests did not identify the device that has failed, if wrong devices are installed, or if the system simply is not operating, follow these procedures to isolate the failing FRU (do not isolate FRUs that have no defects).

Verify that all attached devices are supported by the computer.

Verify that the power supply being used at the time of the failure is operating correctly. (See “Power system checkout” on page 26)

1. Turn off the computer.
2. Visually check each FRU for damage. Replace any damaged FRU.
3. Remove or disconnect all of the following devices:
 - a. Non-ThinkPad devices
 - b. Devices attached to the dock
 - c. Printer, mouse, and other external devices
 - d. Battery
 - e. Hard disk drive or solid-state drive
 - f. External diskette drive or optical drive
 - g. Memory module
4. Turn on the computer.
5. Determine whether the problem has been solved.
6. If the problem does not recur, reconnect the removed devices one at a time until you find the failing FRU.
7. If the problem remains, replace the following FRUs one at a time (do not replace a nondefective FRU):
 - a. System board

b. LCD assembly

Chapter 5. Special keys

The following table describes the functions of function keys and key combinations.

Table 6. Special keys

Special key	Description
 + 	<p>Switch the function of the F1–F12 keys between the standard function and special function printed as an icon on each key.</p> <p>When the Fn Lock indicator is on:</p> <ul style="list-style-type: none"> Press F1-F12 to use the standard function. Press Fn+F1-F12 to use the special function. <p>When the Fn Lock indicator is off:</p> <ul style="list-style-type: none"> Press Fn+F1-F12 to use the standard function. Press F1-F12 to use the special function.
	<p>Mute or unmute the speakers.</p> <p>When the key indicator is on, the speakers are muted.</p> <p>If you mute the speakers and turn off your computer, the speakers remain muted when you turn on your computer.</p>
	Decrease the speaker volume.
	Increase the speaker volume.
	<p>Mute or unmute the microphones.</p> <p>When the key indicator is on, the microphones are muted.</p>
	Darken the computer display.
	Brighten the computer display.
	Manage external displays.
	Enable or disable the built-in wireless features.
	Open or collapse the notification center.
	Answer incoming calls on Microsoft Teams.
	Decline incoming calls on Microsoft Teams.
	<p>Invoke the function defined by yourself.</p> <p>Open Lenovo Vantage and you can define different functions for the F12 key.</p>
 + 	Open the Snipping Tool program.

Table 6. Special keys (continued)

Special key	Description
Fn+Spacebar	Switch between different keyboard backlight statuses if your computer supports keyboard backlight.
Fn+B	Equal the Break key on a conventional external keyboard.
Fn+K	Equal the ScrLK or Scroll Lock key on a conventional external keyboard.
Fn+P	Equal the Pause key on a conventional external keyboard.
Fn+S	Equal the SysRq key on a conventional external keyboard.
Fn+4	Put the computer to sleep mode. To wake up the computer, press Fn or the power button.
Fn+D	If your computer supports the PrivacyGuard feature, press Fn+D to enable or disable the feature.
Fn+Left arrow key	Equal the Home key.
Fn+Right arrow key	Equal the End key.

Chapter 6. Locations

Locating computer controls, connectors, and indicators

This topic introduces the locations of the computer controls, connectors, and indicators.

Note: ThinkPad T14 Gen 1 and ThinkPad P14s Gen 1 might be shipped with different microprocessors, namely Intel® and Advanced Micro Devices (AMD). Hereby Intel models and AMD models are used to distinguish computer models with different microprocessors.

Front

Description	Description

Locating FRUs and CRUs

This topic introduces the following service parts:

- “Major FRUs and CRUs” on page 48
- “LCD FRUs” on page 51
- “Miscellaneous parts” on page 53
- “Connector and cable guide” on page 53

Notes:

- Each FRU is available for all types or models, unless otherwise specified.
- **CRU statement for customers:**

You can resolve some problems with your product with a replacement part you can install yourself, called a “Customer Replaceable Unit” or “CRU.” Some CRUs are designated as self-service CRUs and others are designated as optional-service CRUs. *Installation of self-service CRUs is your responsibility. For optional-service CRUs, you can either install the CRU yourself or you can request that a Service Provider install the CRU according to the warranty service for your product.* If you intend on installing the CRU, Lenovo will ship the CRU to you. CRU information and replacement instructions are shipped with your product and are available from Lenovo at any time upon request. You can find a list of CRUs for your product in this *Hardware Maintenance Manual*. An electronic version of this manual can be found at <https://support.lenovo.com>. Click **Documentation** and then follow the on-screen instructions to find the manual for your product. You might be required to return the defective CRU. When return is required: (1) return instructions, a prepaid shipping label, and a container will be included with the replacement CRU; and (2) you might be charged for the replacement CRU if Lenovo does not receive the defective CRU within thirty (30) days of your receipt of the replacement CRU. See your Lenovo Limited Warranty documentation for full details.

ThinkPad computers contain the following types of CRUs and FRUs:

- **Self-service CRUs:** Refer to parts that can be installed or replaced easily by customer themselves or by trained service technicians at an additional cost.
- **Optional-service CRUs:** Refer to parts that can be installed or replaced by customers with a greater skill level. Trained service technicians can also provide service to install or replace the parts under the type of warranty designated for the customer’s machine.

- **FRUs:** Refer to parts that must be installed or replaced only by trained service technicians. If customers choose to replace the FRUs by themselves, the product warranty might be affected.

Major FRUs and CRUs

Note: Depending on the computer model, your computer might look different from the illustration above.

Table 7. Major FRUs and CRUs

No.	FRU description	Self-service CRU	Optional-service CRU
1	LCD unit	No	No

Connector and cable guide

This topic provides information to help Lenovo authorized service technicians identify connectors and cables for replacement purpose. To view each FRU and the exploded illustration of the computer, see “Major FRUs and CRUs” on page 48 and “LCD FRUs” on page 51.

Note: Depending on your computer model, some connectors or cables might not be available.

System board connectors and cables (for Intel models without RFID)

Table 10. System board connector and cable guide

Item	Connector (location)	Internal cable required	Cable connection
1	Camera/LED connector (internal)	Camera/LED cable	Connect one end of the cable to the camera/mic combo board and the other end to this connector.
2	Power button board connector (internal)	Power button board cable	The power button board comes with the cable. Connect the cable to this connector.
3	Ethernet card connector (internal)	Ethernet card cable	Connect one end of the Ethernet card cable to the Ethernet card board and the other end to this connector.
4	Speaker assembly connector (internal)	Speaker assembly cable	The speaker assembly comes with a cable. Connect the cable to this connector.
5	LCD connector (internal)	LCD cable	Connect one end of the LCD cable to the LCD panel and the other end to this connector.
6	USB-C connector (external)	No	Connect USB-C compatible devices or a USB-C power adapter to this connector.

Table 10. System board connector and cable guide (continued)

Item	Connector (location)	Internal cable required	Cable connection
7	Wireless-WAN-card slot (internal)	No	Insert the wireless WAN card into this slot.
8	Thunderbolt 3 connector (USB-C) (external)	No	Connect a USB-C compatible device or a Thunderbolt 3 compatible device to this connector.
9	Docking-station connector (external)	No	Connect a supported docking station to your computer through this connector.
10	M.2 solid-state drive connector (internal)	No	Insert the M.2 solid-state drive into this slot.
11	USB 3.2 connector Gen 1 (external)	No	Connect USB-compatible devices to this connector.
12	HDMI connector (external)	No	Connect a compatible digital audio device or video monitor to this connector.
13	Audio connector (external)	No	Connect headphones or a headset with 3.5-mm (0.14-inch) 4-pole plug to this connector.
14	Coin-cell battery connector (internal)	Coin-cell battery cable	The coin-cell battery comes with a cable. Connect the cable to this connector.
15	NFC connector (internal)	NFC cable	Connect one end of the cable to the NFC module and the other end to this connector.
16	Hall sensor board connector (internal)	Hall sensor board cable	The hall sensor board comes with a cable. Connect the cable to this connector.
17	Built-in battery connector (internal)	Built-in battery cable	The built-in battery comes with a cable. Connect the cable to this connector.
18	Trackpad connector (internal)	Trackpad cable	Connect one end of the cable to the trackpad and the other end to this connector.
19	Fingerprint reader connector (internal)	Fingerprint reader cable	Connect one end of the cable to the fingerprint reader and the other end to this connector.
20	Memory module slot (internal)	No	Insert the memory module into this slot.
21	Smart card reader connector (internal)	Smart card reader cable	Connect one end of the cable to the smart card reader and the other end to this connector.
22	Always On USB 3.2 connector Gen 1 board connector (internal)	Always On USB 3.2 connector Gen 1 board cable	Connect one end of the cable to the Always On USB 3.2 connector Gen 1 board and the other end to this connector.

Table 10. System board connector and cable guide (continued)

Item	Connector (location)	Internal cable required	Cable connection
23	Thermal fan connector (internal)	Thermal fan assembly cable	The thermal fan assembly comes with a cable. Connect the cable to this connector.
24 25	Keyboard connectors (internal)	Keyboard assembly cables	The keyboard assembly comes with the cables. Connect the cables to these connectors.
26	Nano-SIM-card slot (external)	No	Install a nano-SIM card into the nano-SIM card tray. Then, insert the tray with the card into this slot.

System board connectors and cables (for Intel models with RFID)

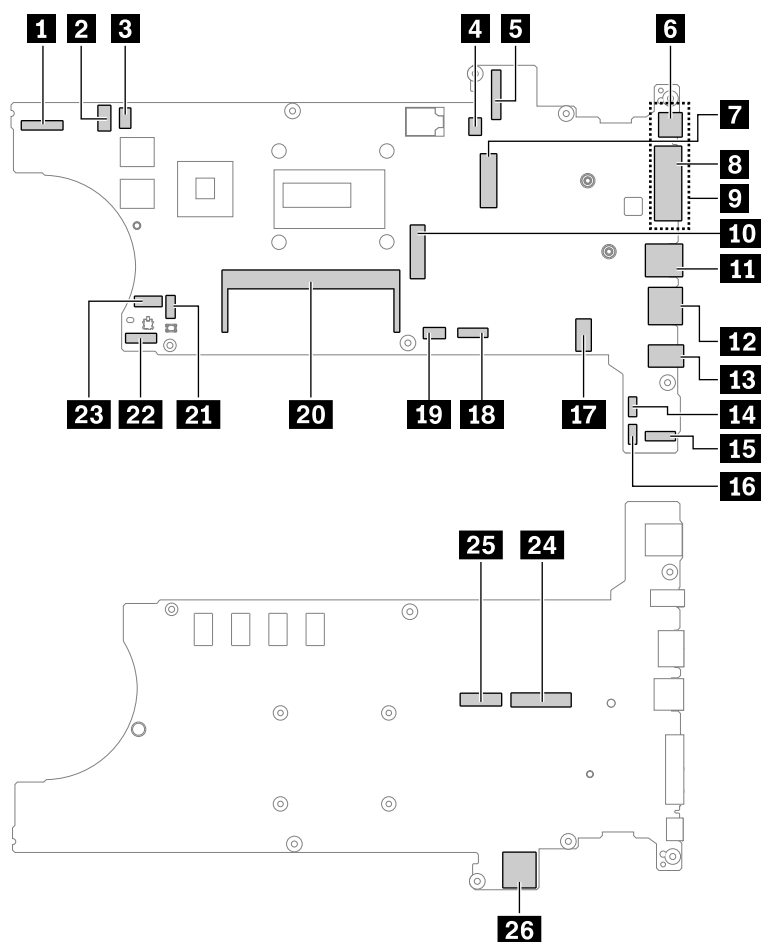

Table 11. System board connector and cable guide

Item	Connector (location)	Internal cable required	Cable connection
1	Camera/LED connector (internal)	Camera/LED cable	Connect one end of the cable to the camera/mic combo board and the other end to this connector.
2	Power button board connector (internal)	Power button board cable	The power button board comes with a cable. Connect the cable to this connector.

Table 11. System board connector and cable guide (continued)

Item	Connector (location)	Internal cable required	Cable connection
3	Ethernet card board connector (internal)	Ethernet card cable	Connect one end of the Ethernet card cable to the Ethernet card and the other end to this connector.
4	Speaker assembly connector (internal)	Speaker assembly cable	The speaker assembly comes with a cable. Connect the cable to this connector.
5	LCD connector (internal)	LCD cable	Connect one end of the LCD cable to the LCD panel and the other end to this connector.
6	USB-C connector (external)	No	Connect USB-C compatible devices or a USB-C power adapter to this connector.
7	Wireless-WAN-card slot (internal)	No	Insert the wireless WAN card into this slot.
8	Thunderbolt 3 connector (USB-C) (external)	No	Connect a USB-C compatible device or a Thunderbolt 3 compatible device to this connector.
9	Docking-station connector (external)	No	Connect a supported docking station to your computer through this connector.
10	M.2 solid-state drive connector (internal)	No	Insert the M.2 solid-state drive into this slot.
11	USB 3.2 connector Gen 1 (external)	No	Connect USB-compatible devices to this connector.
12	HDMI connector (external)	No	Connect a compatible digital audio device or video monitor to this connector.
13	Audio connector (external)	No	Connect headphones or a headset with 3.5-mm (0.14-inch) 4-pole plug to this connector.
14	Coin-cell battery connector (internal)	Coin-cell battery cable	The coin-cell battery comes with a cable. Connect the cable to this connector.
15	RFID reader connector (internal)	RFID reader cable	Connect one end of the cable to the system board, one end to connector 21 , and the other end to this connector.
16	Hall sensor board connector (internal)	Hall sensor board cable	The hall sensor board comes with a cable. Connect the cable to this connector.
17	Built-in battery connector (internal)	Built-in battery cable	The built-in battery comes with a cable. Connect the cable to this connector.
18	Trackpad connector (internal)	Trackpad cable	Connect one end of the cable to the trackpad and the other end to this connector.

Table 11. System board connector and cable guide (continued)

Item	Connector (location)	Internal cable required	Cable connection
19	Fingerprint reader connector (internal)	Fingerprint reader cable	Connect one end of the cable to the fingerprint reader and the other end to this connector.
20	Memory module slot (internal)	No	Insert the memory module into this slot.
21	RFID reader connector (internal)	RFID reader cable	Connect one end of the cable to the system board, one end to connector 15 , and the other end to this connector.
22	Always On USB 3.2 connector Gen 1 board connector (internal)	Always On USB 3.2 connector Gen 1 board cable	Connect one end of the cable to the Always On USB 3.2 connector Gen 1 board and the other end to this connector.
23	Thermal fan connector (internal)	Thermal fan assembly cable	The thermal fan assembly comes with a cable. Connect the cable to this connector.
24 25	Keyboard connectors (internal)	Keyboard assembly cables	The keyboard assembly comes with the cables. Connect the cables to these connectors.
26	Nano-SIM-card slot (external)	No	Install a nano-SIM card into the nano-SIM card tray. Then, insert the tray with the card into this slot.

System board connectors and cables (for AMD models)

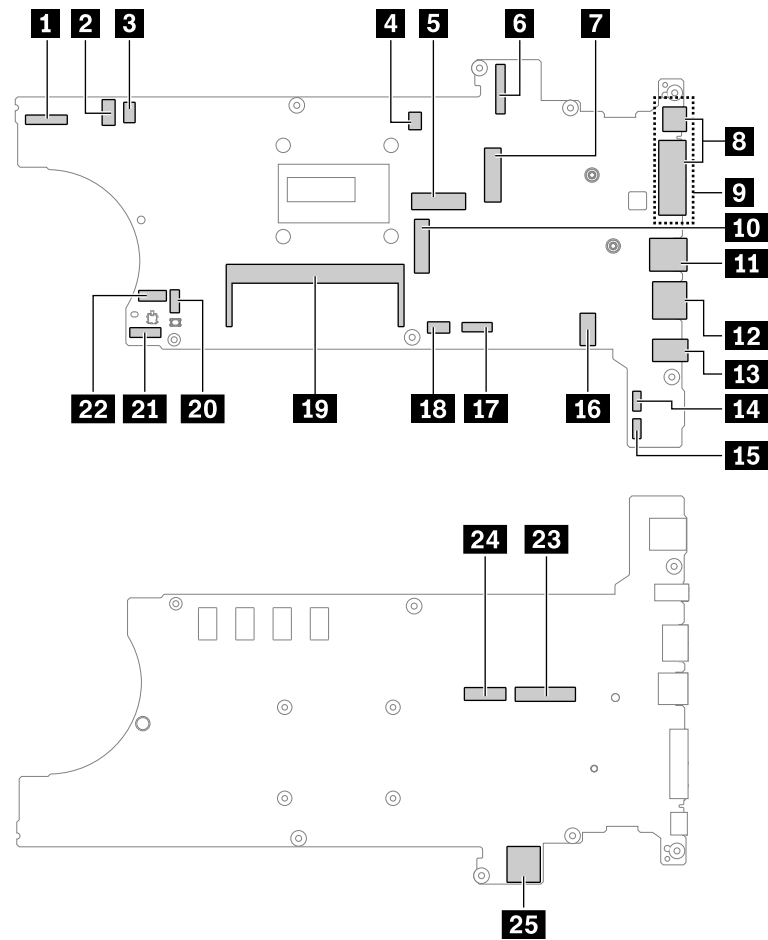

Table 12. System board connector and cable guide

Item	Connector (location)	Internal cable required	Cable connection
1	Camera/LED connector (internal)	Camera/LED cable	Connect one end of the cable to the camera/mic combo board and the other end to this connector.
2	Power button board connector (internal)	Power button board cable	The power button board comes with a cable. Connect the cable to this connector.
3	Ethernet card connector (internal)	Ethernet card cable	Connect one end of the Ethernet card cable to the Ethernet card and the other end to this connector.
4	Speaker assembly connector (internal)	Speaker assembly cable	The speaker assembly comes with cable. Connect the cable to this connector.
5	Wireless-LAN-card slot (internal)	No	Insert the wireless LAN card into this slot.
6	LCD connector (internal)	LCD cable	Connect one end of the LCD cable to the LCD panel and the other end to this connector.

Table 12. System board connector and cable guide (continued)

Item	Connector (location)	Internal cable required	Cable connection
7	Wireless-WAN-card slot (internal)	No	Insert the wireless WAN card into this slot.
8	USB-C connector (external)	No	Connect USB-C compatible devices or a USB-C power adapter to this connector.
9	Docking-station connector (external)	No	Connect a supported docking station to your computer through this connector.
10	M.2 solid-state drive connector (internal)	No	Insert the M.2 solid-state drive into this slot.
11	USB 3.2 connector Gen 2 (external)	No	Connect USB-compatible devices to this connector.
12	HDMI connector (external)	No	Connect a compatible digital audio device or video monitor to this connector.
13	Audio connector (external)	No	Connect headphones or a headset with 3.5-mm (0.14-inch) 4-pole plug to this connector.
14	Coin-cell battery connector (internal)	Coin-cell battery cable	The coin-cell battery comes with a cable. Connect the cable to this connector.
15	Hall sensor board connector (internal)	Hall sensor board cable	The hall sensor board comes with a cable. Connect the cable to this connector.
16	Built-in battery connector (internal)	Built-in battery cable	The built-in battery comes with a cable. Connect the cable to this connector.
17	Trackpad connector (internal)	Trackpad cable	Connect one end of the cable to the trackpad and the other end to this connector.
18	Fingerprint reader connector (internal)	Fingerprint reader cable	Connect one end of the cable to the fingerprint reader and the other end to this connector.
19	Memory module slot (internal)	No	Insert the memory module into this slot.
20	Smart card reader connector (internal)	Smart card reader cable	Connect one end of the cable to the smart card reader and the other end to this connector.
21	Always On USB 3.2 connector Gen 1 board connector (internal)	Always On USB 3.2 connector Gen 1 board cable	Connect one end of the cable to the Always On USB 3.2 connector Gen 1 board and the other end to this connector.
22	Thermal fan connector (internal)	Thermal fan assembly cable	The thermal fan assembly comes with a cable. Connect the cable to this connector.

Table 12. System board connector and cable guide (continued)

Item	Connector (location)	Internal cable required	Cable connection
23 24	Keyboard connectors (internal)	Keyboard assembly cables	The keyboard assembly comes with the cables. Connect the cables to these connectors.
25	Nano-SIM-card slot (external)	No	Install a nano-SIM card into the nano-SIM-card tray. Then, insert the tray with the card into this slot.

Looking up FRU information

For detailed FRU information, including part numbers, descriptions, and substitution part numbers, go to:
<https://support.lenovo.com/partslookup>.

Chapter 7. FRU replacement notices

This chapter presents notices related to removing and replacing parts. Read this chapter carefully before replacing any FRU.

CRU statement for customers:

You can resolve some problems with your product with a replacement part you can install yourself, called a “Customer Replaceable Unit” or “CRU.” Some CRUs are designated as self-service CRUs and others are designated as optional-service CRUs. *Installation of self-service CRUs is your responsibility. For optional-service CRUs, you can either install the CRU yourself or you can request that a Service Provider install the CRU according to the warranty service for your product.* If you intend on installing the CRU, Lenovo will ship the CRU to you. CRU information and replacement instructions are shipped with your product and are available from Lenovo at any time upon request. You can find a list of CRUs for your product in this *Hardware Maintenance Manual*. An electronic version of this manual can be found at <https://support.lenovo.com>. Click **Documentation** and then follow the on-screen instructions to find the manual for your product. You might be required to return the defective CRU. When return is required: (1) return instructions, a prepaid shipping label, and a container will be included with the replacement CRU; and (2) you might be charged for the replacement CRU if Lenovo does not receive the defective CRU within thirty (30) days of your receipt of the replacement CRU. See your Lenovo Limited Warranty documentation for full details.

Service tool kit

Ensure that the following service tool kit is prepared before you service a ThinkPad notebook computer.

No.	Tool name	Tool type
1	Phillips-head screwdriver	Common tool
2	Torx-head screwdriver	Common tool
3	Conductive tweezers	Common tool
4	Hexagonal socket	Common tool
5	Silicone grease	Consumable tool
6	Polyamide tape	Consumable tool
7	Mylar tape	Consumable tool
8	Eraser	Consumable tool
9	Electrical tape	Consumable tool
10	Double-sided tape	Consumable tool
11	Conductive tape	Consumable tool

Note: The silicone grease can be applied to the surfaces of the microprocessor and heatsink to eliminate air gaps. The hexagonal socket is used to pick up the antenna connectors.

Screw notices

Loose screws can cause a reliability problem. In the ThinkPad notebook computer, this problem is addressed with special nylon-coated screws that have the following characteristics:

- They maintain tight connections.

- They do not easily come loose, even with shock or vibration.
- They are harder to tighten.

Do the following when you service the computer:

- Keep the screw kit in your tool bag. For the part number of the screw kit, go to: <https://support.lenovo.com/partslookup>
- It is recommended to use new screws.
- It is recommended to use each screw only once.

Tighten screws as follows:

- **Plastic to plastic**

Turn an additional angle of 90 degrees after the screw head touches the surface of the plastic part.

- **Logic card to plastic**

Turn an additional angle of 180 degrees after the screw head touches the surface of the logic card.

Notes:

- Ensure that you use the correct screw. It is recommended to use new screws for replacements. If you have a torque screwdriver, tighten all screws firmly to the torque specified in the screw information table for each step.
- Ensure torque screwdrivers are calibrated correctly following country specifications.

Retaining serial numbers

This topic provides instructions on the following:

- “Restoring the serial number of the system unit” on page 64
- “Retaining the UUID” on page 65

Restoring the serial number of the system unit

When the computer was manufactured, the EEPROM on the system board was loaded with the serial numbers of the system and all major components. These numbers need to remain the same throughout the life of the computer.

If you replace the system board, you must restore the serial number of the system unit to its original value.

The serial number of the system unit is written on the label attached to the bottom of the computer.

If you can not find the serial number of the system unit on the bottom of the computer, try the following method to get the number:

Note: For Intel models, before you perform the operation, ensure that the UEFI/Legacy setting within the **Startup** menu in the ThinkPad Setup program is set to **UEFI Only**.

1. Connect a USB memory key to the computer.
2. Go to <https://www.lenovo.com/maintenanceutilities> and follow the instructions on the screen to create a Maintenance key.

Note: Only an authorized Lenovo service technician can access the above Web site.

3. Restart the computer.
4. When the logo is displayed, press Esc. The ThinkPad Config Information Update Utility interface is displayed.
5. Type 1 under **Enter the action desired**, then press Enter. The ThinkPad Serial Number Update Utility for Asset ID screen is displayed.
6. Type 2 under **Enter the action desired**, then press Enter. The serial number of each device in your computer is displayed; the serial number of the system unit is listed as follow:
20- Serial number
7. Record the serial number of the system unit.

After you replace the system board, do the following to restore the serial number of the system unit:

1. Connect the Maintenance key to the computer.
2. When the logo is displayed, press Esc. The ThinkPad Config Information Update Utility interface is displayed.
3. Type 1 under **Enter the action desired**, then press Enter. The ThinkPad Serial Number Update Utility for Asset ID screen is displayed.
4. Type 1 under **Enter the action desired**, then press Enter. Then follow the instructions on the screen to restore the serial number of the system unit.

Retaining the UUID

The Universally Unique Identifier (UUID) is a 128-bit number uniquely assigned to your computer at production and stored in the EEPROM of your system board.

The algorithm that generates the number is designed to provide unique IDs until the year A.D. 3400. No two computers in the world have the same number.

When you replace the system board, perform the following steps to create a new UUID for the system board if the system board does not have a UUID:

Note: For Intel models, before you perform the operation, ensure that the UEFI/Legacy setting within the **Startup** menu in the ThinkPad Setup program is set to **UEFI Only**.

1. Connect a USB memory key to the computer.
2. Go to <https://www.lenovo.com/maintenanceutilities> and follow the instructions on the screen to create a Maintenance key.

Note: Only an authorized Lenovo service technician can access the above Web site.

3. Restart the computer.
4. When the logo screen is displayed, press Esc. The ThinkPad Config Information Update Utility interface is displayed.

5. Type 2 under **Enter the action desired**, then press Enter. The Auto UUID generation utility interface is displayed.
6. Type y under **Change UUID. OK? [Y/N]**, then press Enter. A new UUID is created and written. If a valid UUID already exists, it is not overwritten.

Chapter 8. Removing or replacing a FRU

This chapter provides instructions on how to remove or replace a FRU.

CRU statement for customers:

You can resolve some problems with your product with a replacement part you can install yourself, called a “Customer Replaceable Unit” or “CRU.” Some CRUs are designated as self-service CRUs and others are designated as optional-service CRUs. *Installation of self-service CRUs is your responsibility. For optional-service CRUs, you can either install the CRU yourself or you can request that a Service Provider install the CRU according to the warranty service for your product.* If you intend on installing the CRU, Lenovo will ship the CRU to you. CRU information and replacement instructions are shipped with your product and are available from Lenovo at any time upon request. You can find a list of CRUs for your product in this *Hardware Maintenance Manual*. An electronic version of this manual can be found at <https://support.lenovo.com>. Click **Documentation** and then follow the on-screen instructions to find the manual for your product. You might be required to return the defective CRU. When return is required: (1) return instructions, a prepaid shipping label, and a container will be included with the replacement CRU; and (2) you might be charged for the replacement CRU if Lenovo does not receive the defective CRU within thirty (30) days of your receipt of the replacement CRU. See your Lenovo Limited Warranty documentation for full details.

General guidelines

When removing or replacing a FRU, be sure to observe the following general guidelines:

1. Do not try to service any computer unless you have been trained and certified. An untrained person runs the risk of damaging parts.
2. Before replacing any FRU, review Chapter 7 “FRU replacement notices” on page 63.
3. Begin by removing any FRUs that have to be removed before replacing the failing FRU. Any such FRUs are listed at the beginning of each FRU replacement procedure. Remove them in the order in which they are listed.
4. Follow the correct sequence in the steps for removing a FRU, as given in the drawings by the numbers in square callouts.
5. When turning a screw, turn it in the direction as given by the arrow in the drawing.
6. When removing a FRU, move it in the direction as given by the arrow in the drawing.
7. To put the new FRU in place, reverse the removal procedure and follow any notes that pertain to replacement. For information about connecting and arranging internal cables, see Chapter 6 “Locations” on page 43.
8. When replacing a FRU, use the correct screws as shown in the replacement procedure.

Before removing any FRU, turn off the computer, unplug all power cords from electrical outlets, remove the battery, and then disconnect any interconnecting cables.
--

Attention:

- After replacing a FRU, do not turn on the computer until you have made sure that all screws, springs, and other small parts are in place and none are loose inside the computer. Verify this by shaking the computer gently and listening for rattling sounds. Metallic parts or metal flakes can cause electrical short circuits.
- The system board is sensitive to, and can be damaged by, ESD. Before touching it, establish personal grounding by touching a ground point with one hand or by using an ESD strap.

Before servicing the computer

Carefully read this topic before servicing the computer.

Disabling the built-in battery

Before replacing any CRU, ensure that you disable Fast Startup first and then disable the built-in battery.

To disable Fast Startup, do the following:

1. Go to Control Panel, and then change the view of Control Panel from Category to Large icons or Small icons.
2. Click **Power Options**, and then click **Choose what the power buttons do** on the left pane.
3. Click **Change settings that are currently unavailable** at the top.
4. If prompted by User Account Control (UAC), click **Yes**.
5. Clear the **Turn on fast startup** check box, and then click **Save changes**.

To disable the built-in battery, do the following:

1. Restart your computer. When the logo screen is displayed, immediately press F1 to enter ThinkPad Setup.
2. Select **Config → Power**. The **Power** submenu is displayed.
3. Select **Disable built-in battery** and press Enter.
4. Select **Yes** in the Setup Confirmation window. The built-in battery is disabled and the computer turns off automatically. Wait three to five minutes to let the computer cool.

Removing the nano-SIM card and the nano-SIM-card tray

Some models you are servicing might have a nano-SIM card installed. If the computer you are servicing has a nano-SIM card installed, remove the nano-SIM card and the nano-SIM-card tray before you start the servicing.

After you finish the servicing, ensure that you install the card and the tray back into the slot firmly.

1010 Keyboard

Removal steps of the keyboard

Note: If your replacement keyboard is not shipped with the special tool shown in the following illustrations, you may use alternative pry tools to remove it.

When installing:

- Ensure that the connectors are attached firmly.
- Configure the keyboard language in UEFI BIOS:
 1. Enter the UEFI BIOS menu.
 2. Click **Config** → **Keyboard/Mouse** → **Keyboard Layout**, and then select the keyboard language.

1020 Base cover assembly

For access, remove this FRU:

- “Removing the nano-SIM card and the nano-SIM-card tray” on page 68

Removal steps of the base cover assembly

Applying labels to the base cover assembly

Note: Depending on the country or region of delivery, the labels might be slightly different from the ones in the following illustration.

The new base cover assembly FRU is shipped with a kit containing labels of several kinds. Apply those labels when you replace the base cover assembly. For the labels that are not shipped with the new base cover assembly, peel them from the old base cover assembly, and adhere them to the new one.

Item

- 1** CMIIT label
- 2** SVT label
- 3** GEO label
- 4** Win10 GML label

Item

- 5** Serial number label
- 6** Win10 COA label
- 7** Country label
- 8** IMEI label

1030 M.2 solid-state drive

For access, remove these FRUs in order:

- “Removing the nano-SIM card and the nano-SIM-card tray” on page 68
- “1020 Base cover assembly” on page 70

Attention:

- If your computer is installed with a hybrid solid-state drive (with Intel Optane memory), go to https://support.lenovo.com/docs/tg_ssd to know the details on how to replace it.
- The M.2 solid-state drive is sensitive. Inappropriate handling might cause damage and permanent loss of data.

When handling the M.2 solid-state drive, observe the following guidelines:

- Replace the M.2 solid-state drive only for upgrade or repair. The M.2 solid-state drive is not designed for frequent changes or replacement.
- Before replacing the M.2 solid-state drive, make a backup copy of all the data that you want to keep.
- Do not apply pressure to the M.2 solid-state drive.
- Do not touch the contact edge or circuit board of the M.2 solid-state drive. Otherwise the M.2 solid-state drive might get damaged.
- Do not make the M.2 solid-state drive subject to physical shocks or vibration. Put the M.2 solid-state drive on a soft material, such as cloth, to absorb physical shocks.

Removal steps of the M.2 2280 solid-state drive

Step	Screw (quantity)	Color	Torque
1	M2 × 0.5 + 2.5 mm, big-head, nylon-coated (1)	Black	0.181 Nm (1.85 kgf-cm)

Removal steps of the M.2 2242 solid-state drive and its bracket

Step	Screw (quantity)	Color	Torque
1	M2 × 2.5 mm, big-head, nylon-coated (1)	Black	0.181 Nm (1.85 kgf-cm)

1040 Memory module (for selected models)

For access, remove these FRUs in order:

- “Removing the nano-SIM card and the nano-SIM-card tray” on page 68
- “1020 Base cover assembly” on page 70

Removal steps of the memory module

When installing:

Insert the notched end of the memory module into the slot at an angle of about 20 degrees. Press the memory module firmly, and pivot it downwards until it snaps into place. Ensure that the memory module is firmly installed in the slot and does not move easily.

1050 Speaker assembly

For access, remove these FRUs in order:

- “Removing the nano-SIM card and the nano-SIM-card tray” on page 68
- “1020 Base cover assembly” on page 70

Removal steps of the speaker assembly

Step	Screw (quantity)	Color	Torque
2	M2.2 × 2.2 + 2.3 mm, flat-head, nylon-coated (2)	Black	0.181 Nm (1.85 kgf-cm)

When installing: Ensure that the connector is attached firmly.

1060 Wireless WAN card (for selected models)

For access, remove these FRUs in order:

- “Removing the nano-SIM card and the nano-SIM-card tray” on page 68
- “1020 Base cover assembly” on page 70

Removal steps of the wireless WAN card

Step	Screw (quantity)	Color	Torque
3	M2 × 2.5 mm, big-head, nylon-coated (1)	Black	0.181 Nm (1.85 kgf-cm)

When installing:

- For WWAN card with two antenna cables: ensure that you connect the orange cable to the main connector, and the blue cable to the auxiliary connector.
- For WWAN card with four antenna cables: ensure that you connect the orange cable to the main connector, the blue cable to the auxiliary connector, the white and grey cable to the M1 connector, and the black and grey cable to the M2 connector.

1070 Wireless LAN card (for AMD models)

For access, remove these FRUs in order:

- “Removing the nano-SIM card and the nano-SIM-card tray” on page 68
- “1020 Base cover assembly” on page 70

Removal steps of the wireless LAN card

Step	Screw (quantity)	Color	Torque
2	M2 × 2.5 mm, big-head, nylon-coated (1)	Black	0.181 Nm (1.85 kgf-cm)

When installing: Plug the gray cable into the main connector and the black cable into the auxiliary connector.

1080 Coin-cell battery

For access, remove these FRUs in order:

- “Removing the nano-SIM card and the nano-SIM-card tray” on page 68
- “1020 Base cover assembly” on page 70

Removal steps of the coin-cell battery

DANGER

Use only the authorized battery specified for your computer. Any other battery could ignite or explode.

When installing: Ensure that the connector is attached firmly.

1090 Built-in battery

For access, remove these FRUs in order:

- “Removing the nano-SIM card and the nano-SIM-card tray” on page 68
- “1020 Base cover assembly” on page 70

Important notices for replacing a built-in battery

Attention: Lenovo has no responsibility for the performance or safety of unauthorized batteries, and provides no warranties for failures or damage arising out of their use.

The Lenovo Vantage program provides an automatic battery diagnostic test that determines if the built-in battery is defective. A built-in battery FRU should not be replaced unless this diagnostic test shows that the battery is defective. The only exception to this is if the built-in battery is physically damaged or a customer is reporting a possible safety issue.

If the Lenovo Vantage program is not installed on the computer, the customer should download and install the program to diagnose the built-in battery, before getting a non-physically damaged built-in battery replaced. Note that the replacement of a physically damaged built-in battery is not covered by the warranty.

Removal steps of the built-in battery

Use only the authorized battery specified for your computer. Any other battery could ignite or explode.

Step	Screw (quantity)	Color	Torque
2	M2 × 4 mm, small-head, nylon-coated (4)	Silver	0.181 Nm (1.85 kgf-cm)

When installing:

- Ensure that the battery connector is attached firmly.
- Ensure that the base cover assembly is attached firmly; otherwise, battery connection may fail.

1100 Thermal fan assembly

For access, remove these FRUs in order:

- “Removing the nano-SIM card and the nano-SIM-card tray” on page 68
- “1020 Base cover assembly” on page 70

Removal steps of the thermal fan assembly (for Intel models)

When installing:

- Ensure that the connector is attached firmly.
- Do not press the top of the fan cover and the fan hub.
- Before you attach the fan assembly to the computer, apply thermal grease, at an amount of 0.2 grams, on the parts marked **a** and **b** as shown in the following illustrations. Either too much or too less application of grease can cause a thermal problem due to imperfect contact with a component.

For models with discrete thermal pipes:

For models with an integrated thermal pipe (for T14 Gen 1 only):

Removal steps of the thermal fan assembly (for AMD models)

When installing:

- Ensure that the connector is attached firmly.
- Do not press the top of the fan cover and the fan hub.
- Before you attach the fan assembly to the computer, apply thermal grease, at an amount of 0.2 grams, on the parts marked **a** as shown in the following illustrations. Either too much or too less application of grease can cause a thermal problem due to imperfect contact with a component.

1110 Ethernet card cable, bracket and board

For access, remove these FRUs in order:

- “Removing the nano-SIM card and the nano-SIM-card tray” on page 68
- “1020 Base cover assembly” on page 70
- “1100 Thermal fan assembly” on page 79

Removal steps of the Ethernet card cable, bracket and board

Step	Screw (quantity)	Color	Torque
3	M2 × 4 mm, wafer-head, nylon-coated (3)	Black	0.181 Nm (1.85 kgf-cm)

When installing: Ensure that the connector is attached firmly.

1120 Always On USB 3.2 connector Gen 1 cable, bracket and board

For access, remove these FRUs in order:

- “Removing the nano-SIM card and the nano-SIM-card tray” on page 68
- “1020 Base cover assembly” on page 70
- “1090 Built-in battery” on page 78

Removal steps of the Always On USB 3.2 connector Gen 1 cable, bracket and board

Step	Screw (quantity)	Color	Torque
4	M2 × 4 mm, wafer-head, nylon-coated (2)	Black	0.181 Nm (1.85 kgf-cm)

When installing: Ensure that the connector is attached firmly.

1130 Fingerprint reader cable, bracket and board

For access, remove these FRUs in order:

- “Removing the nano-SIM card and the nano-SIM-card tray” on page 68
- “1020 Base cover assembly” on page 70
- “1090 Built-in battery” on page 78

Removal steps of the fingerprint reader cable, bracket and board (for models without RFID)

Step	Screw (quantity)	Color	Torque
4	M2 × 2.5 mm, big-head, nylon-coated (1)	Black	0.181 Nm (1.85 kgf-cm)

When installing: Ensure that the connector is attached firmly.

Removal steps of the fingerprint reader cable, bracket and board (for models with RFID)

Step	Screw (quantity)	Color	Torque
3	M2 × 2.5 mm, big-head, nylon-coated (1)	Black	0.181 Nm (1.85 kgf-cm)

When installing: Ensure that the connector is attached firmly.

1140 Smart card reader module and cable (for selected models)

For access, remove these FRUs in order:

- “Removing the nano-SIM card and the nano-SIM-card tray” on page 68
- “1020 Base cover assembly” on page 70
- “1090 Built-in battery” on page 78

Removal steps of the smart card reader module and cable

Step	Screw (quantity)	Color	Torque
7	M2 × 2.5 mm, big-head, nylon-coated (2)	Black	0.181 Nm (1.85 kgf-cm)

When installing: Ensure that the connector is attached firmly.

1150 Trackpad and cable

For access, remove these FRUs in order:

- “Removing the nano-SIM card and the nano-SIM-card tray” on page 68
- “1020 Base cover assembly” on page 70
- “1090 Built-in battery” on page 78

Removal steps of the trackpad and cable

Step	Screw (quantity)	Color	Torque
4	M2 × 2 mm, wafer-head, nylon-coated (4)	Black	0.127 Nm (1.3 kgf-cm)

When installing: Ensure that the connector is attached firmly.

1160 Hall sensor board with cable

For access, remove these FRUs:

- “Removing the nano-SIM card and the nano-SIM-card tray” on page 68
- “1020 Base cover assembly” on page 70
- “1090 Built-in battery” on page 78

Removal steps of the hall sensor board with cable

When installing: Ensure that the connector is attached firmly.

1170 NFC module, cable and antenna (for selected Intel models)

For access, remove these FRUs in order:

- “Removing the nano-SIM card and the nano-SIM-card tray” on page 68
- “1020 Base cover assembly” on page 70
- “1090 Built-in battery” on page 78

Removal steps of the NFC module, cable and antenna

When installing: Ensure that the connectors are attached firmly.

1180 RFID reader cable and reader (for models with RFID)

For access, remove these FRUs in order:

- “Removing the nano-SIM card and the nano-SIM-card tray” on page 68
- “1020 Base cover assembly” on page 70
- “1090 Built-in battery” on page 78
- “1130 Fingerprint reader cable, bracket and board” on page 84

Removal steps of the RFID reader cable and reader

When installing: Ensure that the connector is attached firmly.

1190 Power button board and cable

For access, remove these FRUs in order:

- “Removing the nano-SIM card and the nano-SIM-card tray” on page 68
- “1020 Base cover assembly” on page 70

Removal steps of the power button board and cable

Step	Screw (quantity)	Color	Torque
4	M2 × 3 mm, wafer-head, nylon-coated (1)	Silver	0.181 Nm (1.85 kgf-cm)

When installing: Ensure that the connector is attached firmly.

1200 System board

Important notices for handling the system board:

When handling the system board, read the following:

- The system board has an accelerometer, which can be broken when several thousands of G-forces are applied.

Note: Dropping a system board from a height of as little as 6 inches so that it falls flat on a hard bench can subject the accelerometer to as much as 6000 G's of shock.

- Be careful not to drop the system board on a bench top that has a hard surface, such as metal, wood, or composite.
- Avoid rough handling of any kind.
- At every point in the process, be sure not to drop or stack the system board.
- If you put a system board down, be sure to put it only on a padded surface such as an ESD mat or a corrugated conductive surface.

Note: If the new system board does not come with a new M.2 solid-state drive thermal pad, it is suggested that you order an extra thermal pad in case the old thermal pad is damaged during replacement.

For access, remove these FRUs in order:

- “Removing the nano-SIM card and the nano-SIM-card tray” on page 68
- “1010 Keyboard” on page 68
- “1020 Base cover assembly” on page 70
- “1030 M.2 solid-state drive” on page 72
- “1040 Memory module (for selected models)” on page 73
- “1060 Wireless WAN card (for selected models)” on page 75
- “1070 Wireless LAN card (for AMD models)” on page 76
- “1090 Built-in battery” on page 78
- “1100 Thermal fan assembly” on page 79

Removal steps of the system board (for Intel models)

This computer shares a common system board with another computer. After replacing the system board, you will be prompted to input a brand name to correctly identify the machine type. The following table contains the brand name required to complete this step.

Note: Input the exact brand name as shown in this table.

Brand name	Machine types	Shared with
ThinkPad T14 Gen 1 (for Intel models)	20S0, 20S1, 20S2 and 20S3	ThinkPad T15 Gen 1 or ThinkPad P15s Gen 1
ThinkPad P14s Gen 1 (for Intel models)	20S4 and 20S5	ThinkPad T15 Gen 1 or ThinkPad P15s Gen 1

Step	Screw (quantity)	Color	Torque
8	M2 × 4 mm, flat-head, nylon-coated (4)	Black	0.181 Nm (1.85 kgf-cm)
9	M2 × 2.5 mm, big-head, nylon-coated (1)	Black	0.181 Nm (1.85 kgf-cm)

Step	Screw (quantity)	Color	Torque
11	M2 × 3 mm, flat-head, nylon-coated (3)	Silver	0.181 Nm (1.85 kgf-cm)

When installing:

- Ensure that the connectors are attached firmly.
- Configure the keyboard language in UEFI BIOS:
 1. Enter the UEFI BIOS menu.
 2. Click **Config → Keyboard/Mouse → Keyboard Layout**, and then select the keyboard language.

Attention: The following components soldered on the top side of the system board are extremely sensitive. When you service the system board, avoid any kind of rough handling.

For models with a discrete graphics card

- a** Graphics Processing Unit (GPU)
- b** Central Processing Unit (CPU)

For models with an integrated graphics card

- a** Central Processing Unit (CPU)

Removal steps of the system board (for AMD models)

Note: If you want to install a system board with the Linux operating system, you need to configure Sleep State in UEFI BIOS to ensure that the system works correctly:

1. Enter the UEFI BIOS menu.
2. Select **Config → Power** using the arrow keys.
3. Locate the **Sleep State** section and then select **Linux**.

Step	Screw (quantity)	Color	Torque
7	M2 × 4 mm, flat-head, nylon-coated (4)	Black	0.181 Nm (1.85 kgf-cm)
8	M2 × 2.5 mm, big-head, nylon-coated (1)	Black	0.181 Nm (1.85 kgf-cm)

Step	Screw (quantity)	Color	Torque
10	M2 × 3 mm, flat-head, nylon-coated (3)	Silver	0.181 Nm (1.85 kgf-cm)

When installing:

- Ensure that the connectors are attached firmly.
- Configure the keyboard language in UEFI BIOS:
 1. Enter the UEFI BIOS menu.
 2. Click **Config** → **Keyboard/Mouse** → **Keyboard Layout**, and then select the keyboard language.

1210 MIMO wireless-WAN antenna assembly (for selected Intel models)

For access, remove these FRUs in order:

- “Removing the nano-SIM card and the nano-SIM-card tray” on page 68
- “1010 Keyboard” on page 68
- “1020 Base cover assembly” on page 70
- “1030 M.2 solid-state drive” on page 72
- “1040 Memory module (for selected models)” on page 73
- “1060 Wireless WAN card (for selected models)” on page 75

- “1090 Built-in battery” on page 78
- “1100 Thermal fan assembly” on page 79
- “1200 System board” on page 93

Removal steps of the MIMO wireless-WAN antenna assembly

Antenna locations

- a** 4x4 MIMO Wireless-WAN antenna (auxiliary)
- b** 4x4 MIMO Wireless-WAN antenna (main)

1220 LCD unit

For access, remove these FRUs in order:

- “Removing the nano-SIM card and the nano-SIM-card tray” on page 68
- “1020 Base cover assembly” on page 70

Removal steps of the LCD unit (for Intel models)

Step	Screw (quantity)	Color	Torque
6	M2.5 × 4 mm, flat-head, nylon-coated (4)	Silver	0.294 Nm (3 kgf-cm)

When installing: Ensure that all the connectors are attached firmly and all the cables are inserted back into place properly.

Removal steps of the LCD unit (for AMD models)

Step	Screw (quantity)	Color	Torque
5	M2.5 × 4 mm, flat-head, nylon-coated (4)	Silver	0.294 Nm (3 kgf-cm)

When installing: Ensure that all the connectors are attached firmly and all the cables are inserted back into place properly.

1240 Keyboard bezel assembly

For access, remove these FRUs in order:

- “Removing the nano-SIM card and the nano-SIM-card tray” on page 68
- “1010 Keyboard” on page 68
- “1020 Base cover assembly” on page 70
- “1030 M.2 solid-state drive” on page 72
- “1040 Memory module (for selected models)” on page 73
- “1050 Speaker assembly” on page 74
- “1060 Wireless WAN card (for selected models)” on page 75
- “1070 Wireless LAN card (for AMD models)” on page 76
- “1080 Coin-cell battery” on page 77
- “1090 Built-in battery” on page 78
- “1100 Thermal fan assembly” on page 79
- “1110 Ethernet card cable, bracket and board” on page 81
- “1120 Always On USB 3.2 connector Gen 1 cable, bracket and board” on page 83
- “1130 Fingerprint reader cable, bracket and board” on page 84
- “1140 Smart card reader module and cable (for selected models)” on page 86
- “1150 Trackpad and cable” on page 88
- “1160 Hall sensor board with cable” on page 89
- “1170 NFC module, cable and antenna (for selected Intel models)” on page 89
- “1180 RFID reader cable and reader (for models with RFID)” on page 90
- “1190 Power button board and cable” on page 91
- “1200 System board” on page 93
- “1210 MIMO wireless-WAN antenna assembly (for selected Intel models)” on page 98
- “1220 LCD unit” on page 99

2010 LCD bezel sheet and LCD bezel

For access, remove this FRU:

- “1220 LCD unit” on page 99

Removal steps of the LCD bezel sheet and LCD bezel

When installing: After the LCD bezel sheet is removed, it cannot be used anymore. A new LCD bezel sheet is required for replacement.

2020 LCD panel and LCD elastic adhesive tapes

For access, remove these FRUs in order:

- “1220 LCD unit” on page 99
- “2010 LCD bezel sheet and LCD bezel” on page 104

Removal and installation steps of the LCD panel and the LCD elastic adhesive tapes (for computer models with the HD and FHD panels)

Removal steps of the LCD panel and the LCD elastic adhesive tapes

1. Grasp the end of three elastic adhesive tapes with tweezers. Pull out each tape slowly in the direction as shown until three elastic adhesive tapes are all released from LCD unit **1**.

Note: Do not pull the tapes too fast, otherwise, the tapes might snap.

2. Lift up the LCD panel.

3. Turn over the LCD panel **3** and detach the LCD cable from the LCD panel as shown.

When installing: After the LCD elastic adhesive tapes are removed, they cannot be used anymore. New LCD elastic adhesive tapes are required for replacement.

Installation steps of the LCD panel and the LCD elastic adhesive tapes

1. Peel off the release liners from one side of the new elastic adhesive tapes. Apply the tapes to the correct locations. Peel off the release liners from the other side of the tapes. Ensure that the three tapes are applied correctly as shown.

2. Attach the LCD cable to the LCD panel as shown. Turn over the LCD panel to secure the LCD panel with tapes.

Removal and installation steps of the LCD panel and the LCD elastic adhesive tapes (for computer models with the UHD panel)

Removal steps of the LCD panel and the LCD elastic adhesive tapes

1. Grasp the end of five elastic adhesive tapes with tweezers. Pull out each tape slowly in the direction as shown until five elastic adhesive tapes are all released from LCD unit **1** and **2**.

Note: Do not pull the tapes too fast, otherwise, the tapes might snap.

2. Lift up the LCD panel.

3. Turn over the LCD panel **5** and detach the LCD cable from the LCD panel as shown.

When installing: After the LCD elastic adhesive tapes are removed, they cannot be used anymore. New LCD elastic adhesive tapes are required for replacement.

Installation steps of the LCD panel and the LCD elastic adhesive tapes

1. Peel off the release liners from one side of the new elastic adhesive tapes. Apply the tapes to the correct locations. Peel off the release liners from the other side of the tapes. Ensure that the five tapes are applied correctly as shown.

2. Attach the LCD cable to the LCD panel as shown. Turn over the LCD panel to secure the LCD panel with tapes.

Note: For LCD panel with the factory color calibration feature, do the following to install new color profiles:

1. Connect your computer to the network and close the X-Rite Color Assistant program.
2. Go to C:\Program files (x86)\X-Rite Color Assistant and locate the ProfileUpdaterForDisplayReplacement.exe file.
3. Double-click the EXE file. Follow the on-screen instructions to input the display serial number and click **Submit**. You can find the display serial number and instructions on a sticker fixed to the front of the new LCD part. When the new color profiles are installed successfully, a prompted window will be displayed.

2030 Camera/microphone module

For access, remove these FRUs in order:

- “1220 LCD unit” on page 99
- “2010 LCD bezel sheet and LCD bezel” on page 104
- “2020 LCD panel and LCD elastic adhesive tapes” on page 105

Removal steps of the infrared camera/microphone module

When installing: Ensure that the connector is attached firmly.

Removal steps of the conventional camera/microphone module

When installing: Ensure that the connector is attached firmly.

2040 LCD hinges

For access, remove these FRUs in order:

- “1220 LCD unit” on page 99
- “2010 LCD bezel sheet and LCD bezel” on page 104

Removal steps of the LCD hinges

Step	Screw (quantity)	Color	Torque
1	M2.5 × 2.5 mm, big-head, nylon-coated (4)	Silver	0.294 Nm (3 kgf-cm)

2050 Camera/LED cable

For access, remove these FRUs in order:

- “1220 LCD unit” on page 99
- “2010 LCD bezel sheet and LCD bezel” on page 104
- “2020 LCD panel and LCD elastic adhesive tapes” on page 105
- “2040 LCD hinges” on page 114

Removal steps of the infrared camera/LED cable

When installing: Ensure that the connector is attached firmly.

Removal steps of the conventional camera/LED cable

When installing: Ensure that the connector is attached firmly.

Removal steps of the LED cable

When installing: Ensure that the connector is attached firmly.

2060 LCD cable

For access, remove these FRUs in order:

- “1220 LCD unit” on page 99
- “2010 LCD bezel sheet and LCD bezel” on page 104
- “2020 LCD panel and LCD elastic adhesive tapes” on page 105
- “2040 LCD hinges” on page 114

Removal steps of the LCD cable

When installing: Ensure that the connector is attached firmly.

2070 Wireless antenna assembly

For access, remove these FRUs in order:

- “1220 LCD unit” on page 99
- “2010 LCD bezel sheet and LCD bezel” on page 104
- “2020 LCD panel and LCD elastic adhesive tapes” on page 105
- “2040 LCD hinges” on page 114

Removal steps of the wireless-LAN antenna assembly

Release the antenna cables from the cable guides on the LCD cover assembly.

Attention: When you route the cables, ensure that they are not subject to any tension. Tension could cause the cables to be damaged by the cable guides, or a wire to be broken.

Removal steps of the wireless-LAN/WAN antenna assembly

Attention: When you route the cables, ensure that they are not subject to any tension. Tension could cause the cables to be damaged by the cable guides, or a wire to be broken.

Antenna locations

- a** Wireless-LAN antenna (main)
- b** Wireless-WAN antenna (main)*
- c** Wireless-WAN antenna (auxiliary)*
- d** Wireless-LAN antenna (auxiliary)

* for selected models

2080 LCD cover assembly

For access, remove these FRUs in order:

- “1220 LCD unit” on page 99
- “2010 LCD bezel sheet and LCD bezel” on page 104
- “2020 LCD panel and LCD elastic adhesive tapes” on page 105
- “2030 Camera/microphone module” on page 113
- “2040 LCD hinges” on page 114
- “2050 Camera/LED cable” on page 115
- “2060 LCD cable” on page 117
- “2070 Wireless antenna assembly” on page 117

Appendix A. Notices

Lenovo may not offer the products, services, or features discussed in this document in all countries. Consult your local Lenovo representative for information on the products and services currently available in your area. Any reference to a Lenovo product, program, or service is not intended to state or imply that only that Lenovo product, program, or service may be used. Any functionally equivalent product, program, or service that does not infringe any Lenovo intellectual property right may be used instead. However, it is the user's responsibility to evaluate and verify the operation of any other product, program, or service.

Lenovo may have patents or pending patent applications covering subject matter described in this document. The furnishing of this document does not give you any license to these patents. You can send license inquiries, in writing, to:

Furthermore, some measurements may have been estimated through extrapolation. Actual results may vary. Users of this document should verify the applicable data for their specific environment.

Trademarks

LENOVO, LENOVO logo, THINKPAD, THINKPAD logo and TRACKPOINT are trademarks of Lenovo. Microsoft and Windows are trademarks of the Microsoft group of companies. Intel and Optane are trademarks of Intel Corporation or its subsidiaries in the U.S. and/or other countries. The terms HDMI and HDMI High-Definition Multimedia Interface are trademarks or registered trademarks of HDMI Licensing LLC in the United States and other countries. USB-C is a trademark of USB Implementers Forum. All other trademarks are the property of their respective owners.

Appendix B. Abbreviation and acronym table

The following table lists some abbreviations and acronyms which might be used in this manual.

Abbreviation	Term
BGA	Ball Grid Array
BIOS	basic input/output system
CMOS	complementary metal-oxide semiconductor
COA	Certificate of Authentication
CPU	Central processing unit
CRC	cyclic redundancy check
CRT	cathode ray tube
CRU	customer-replaceable unit
CTO	Configure To Order
EAIA	Enhanced Asset Information Area
ECA	Engineering Change Announcements
EEPROM	Electrically Erasable Programmable Read-Only Memory
EFI	Extensible Firmware Interface
EPO	emergency power-off
ESD	electrostatic discharge
EU	European Union
FCC	Federal Communications Commission
FRU	Field Replaceable Unit
GAV	General Announce Variant
GPU	graphics processing unit
HDD	hard disk drive
HDMI	high-definition multimedia interface
ICs	integrated circuits
ICCID	integrate circuit card identity
ISO	International Standardization Organization
LAN	local area network
LCD	liquid crystal display
MAC	media access control
MIMO	multiple-input and multiple-output
MT	machine type
MTM	machine type and model
PC	personal computer

Abbreviation	Term
PCH	Platform Controller Hub
POST	power-on self-test
RAM	random-access memory
RF	radio frequency
RFID	radio-frequency identification
RI	ring indicator
RJ	registered jack
SATA	Serial Advanced Technology Attachment
SIM	subscriber identity module
SVP	supervisor password
TFTs	thin-film transistors
UEFI	Unified Extensible Firmware Interface
USB	Universal Serial Bus
UUID	universally unique identifier
VGA	video graphics array
VRAM	video random-access memory
WAN	wide area network

The image shows the Lenovo logo, which consists of the word "Lenovo" in a white, sans-serif font, centered within a solid black rectangular background.

Part Number: SP40W87605_01

Printed in China

(1P) P/N: SP40W87605_01
