

ThinkPad. X1 Yoga

Setup Guide

Lenovo™

Unpack

Standard items

Optional accessories

ThinkPad Ethernet Extension Adapter *

Lenovo HDMI to VGA Adapter *

Lenovo USB-C to DisplayPort Adapter *

Lenovo USB-C to VGA Adapter *

* Available on some models

Initial setup

⋮ Features

Infrared camera *

Securely sign in to your computer with face authentication.

USB-C™ connectors

Both USB-C (Thunderbolt™ 3 compatible) connectors can work as power connectors. The connectors support data-delivery with faster rate, bi-directional power delivery, and video output.

ThinkPad Pen Pro

Use the pen to write and draw in a natural manner. The pen is auto-charged when seated in its slot.

* Available on some models

YOGA Modes

The X1 Yoga has an improved *rise-and-fall* keyboard mechanism that works with the four YOGA Modes – Notebook, Tent, Tablet, and Stand.

Note: Before storing the computer, close the computer lid to protect the display and keyboard.

Overview

[English]

1. Ambient light sensor
2. Infrared camera *
3. Conventional camera (available on models with the infrared camera) *
4. Microphones
5. Conventional camera with ThinkShutter (lens cover) *
6. Security-lock slot
7. HDMI™ connector
8. USB 3.1 connector Gen 1
9. Mini Ethernet connector
10. Audio connector
11. Power button
12. ThinkPad Pen Pro
13. Fingerprint reader
14. Nano-SIM-card slot
15. MicroSD card slot
16. NFC label *
17. Trackpad
18. TrackPoint® buttons
19. TrackPoint pointing stick
20. Always On USB 3.1 connector Gen 1
21. USB-C™ connectors (Thunderbolt™ 3 compatible)
22. Multi-touch screen

* Available on some models

Regulatory labels

Depending on your country or region, you can find the government-required regulatory information through one of the following methods:

- On a physical label attached to the outside of your computer shipping carton
- On a physical label attached to your computer
- Through an electronic-label screen (E-label screen) preinstalled on your computer

To access the E-label screen, do one of the following:

- Restart the computer. When the logo screen is displayed, press F9. The E-label screen is displayed.
- Restart the computer. When the logo screen is displayed, press Enter or tap the prompt to enter the Startup Interrupt menu. Then press F9 or tap the Regulatory Information option. The E-label screen is displayed.

Compliance with the EU Radio Equipment Directive

The following applies to models with a radio device.

Hereby, Lenovo (Singapore) Pte. Ltd., declares that the radio equipment type ThinkPad X1 Yoga is in compliance with Directive 2014/53/EU.

For further information about EU regulatory compliance, refer to the *Safety and Warranty Guide* that comes with your computer.

Specific Absorption Rate (ICNIRP)

YOUR DEVICE MEETS INTERNATIONAL GUIDELINES FOR EXPOSURE TO RADIO WAVES.

Your device is a radio transmitter and receiver. It is designed not to exceed the limits for exposure to radio waves (radio frequency electromagnetic fields) recommended by international guidelines. The guidelines were developed by an independent scientific organization (ICNIRP) and include a substantial safety margin designed to assure the safety of all persons, regardless of age and health.

The radio wave exposure guidelines use a unit of measurement known as the Specific Absorption Rate, or SAR. The Europe 10g SAR limit for mobile devices is 2.0 W/kg. Tests for SAR are conducted using standard operating positions with the device transmitting at its highest certified power level in all tested frequency bands. The highest SAR values under the ICNIRP guidelines for your device are as follows:

Maximum body-worn SAR with 0 mm separation distance: 1.372 W/kg

During use, the actual SAR values for your device are usually well below the values stated. This is because, for purposes of system efficiency and to minimize interference on the network, the operating power of your mobile device is automatically decreased when full power is not needed for the data connection. The lower the power output of the device, the lower its SAR value.

If you are interested in further reducing your RF exposure then you can easily do so by limiting your usage or simply keeping the device away from the body.
