Chapter 1. About the Lenovo Preferred Pro USB Fingerprint Keyboard

This manual provides product description and instructions for installing and using the Lenovo® Preferred Pro USB Fingerprint Keyboard (hereafter called the keyboard).

Product description

This section provides a general description of the keyboard.

The keyboard is equipped with many functions that add convenience and security to your computer. Instead of using a password, the fingerprint reader on the keyboard enables you to swipe your fingerprint to access your computer resources. As multiple unique fingerprints are available at your fingertips and are stored securely on your computer, you can be assured that your personal information is protected.

Your option package includes the following:

- Lenovo Preferred Pro USB Fingerprint Keyboard
- Warranty poster

1 Status indicators

The keyboard has the following three status indicators:

- Numeric Lock indicator:

When the Numeric Lock indicator is illuminated, the numeric keypad on the keyboard is enabled. When the Numeric Lock indicator is not illuminated, only the cursor control on the numeric keypad is enabled. Press the Numeric Lock (NumLk or NmLk) key to switch back and forth between these modes.

- Caps Lock indicator:

When the Caps Lock indicator is illuminated, Caps Lock mode is enabled. In this mode, you can type all alphabetic characters (A-Z) in upper case without pressing the Shift key. When the Caps Lock indicator is not illuminated, Caps Lock mode is disabled. To enable or disable Caps Lock mode, press the Caps Lock (Caps Lock or CapsLk) key.

- Scroll Lock indicator:

When the Scroll Lock indicator is illuminated, Scroll Lock mode is enabled. The arrow keys can be used as screen-scroll function keys and the cursor cannot be moved with the arrow keys. Not all application programs support this function. When the Scroll Lock indicator is not illuminated, the arrow keys can be used for cursor movement, not as screen-scroll function keys. Press the Scroll Lock (ScrLk) key to switch back and forth between these modes.

2 The blue button

For the Microsoft® Windows® 7 operating system, press the blue button to open the Lenovo SimpleTap or Lenovo ThinkVantage® Toolbox program.

The Lenovo SimpleTap program provides a quick way to customize the basic settings and personalized features of the computer. The Lenovo ThinkVantage Toolbox program is an one-stop diagnostic solution. It can quickly identify and resolve system performance and security problems.

For the Microsoft Windows 8, Windows 8.1 or Windows 10 operating system, press the blue button to open the Lenovo PC Experience program.

Note: If you do not have the Lenovo SimpleTap, Lenovo ThinkVantage Toolbox, or Lenovo PC Experience program installed on your computer, pressing the blue button will open the Windows system information window.

3 Fingerprint reader

With the integrated fingerprint reader, you can enroll your fingerprints and associate them with a power-on password, a hard disk drive password, or both beforehand. Thus the fingerprint authentication can replace passwords and enable simple and secure user access.

Attention: Power-on and hard disk drive passwords support *requires* that fingerprint recognition be supported by your computer basic input output system (BIOS). If your computer BIOS supports fingerprint recognition, you can start the computer, log on to the system, and enter the BIOS Setup Utility by swiping your finger over the reader, without typing a password.

For more information about systems that support power-on passwords and hard disk drive passwords, see the following:

- Chapter 4 “Fingerprint reader settings in the BIOS” on page 9.

- “Changing the BIOS settings for the fingerprint reader” on page 9.

Chapter 3. Using the Lenovo Preferred Pro USB Fingerprint Keyboard

This section provides information about using the fingerprint reader on the keyboard.

Creating a passport and enrolling fingerprints

To create a passport and enroll your first fingerprint, do the following:

- For the Windows 7, Windows 8 or Windows 8.1 operating system:
 1. Open the Fingerprint Manager Pro Software window depending on your operating system:
 - For the Windows 7 operating system:

Click **Start** → **All Programs** → **Lenovo ThinkVantage Tools**. Then, double-click **Fingerprint Reader**. The Fingerprint Manager Pro Software window opens.
 - For the Windows 8 or Windows 8.1 operating system:

From the Start screen, double-click the **Lenovo Fingerprint Manager Pro Software** icon. The Fingerprint Manager Pro Software window opens.
 2. Enter your Windows password and click **Submit**.
 3. If your computer is equipped with a fingerprint reader, you need to choose which fingerprint reader you would like to use to enroll your fingerprints. Click **External** to select the fingerprint reader on the keyboard.
 4. When a window with two hands is displayed, select a finger to enroll by clicking the finger. The Enrollment window opens.
 5. Swipe the corresponding finger over the fingerprint reader on your computer. Keep scanning until the progress bar reaches 100%. Then, click **Finish**. It is strongly recommended that you enroll more than one finger in the event of injury.
- For the Windows 10 operating system:

From the desktop, move the pointer to bottom-left corner of the screen, Click **Settings** → **Accounts** → **Sign-in options** → **Windows Hello**, and then follow the instructions on the screen to create a password, a PIN code and enroll your first fingerprint.

Notes:

- If you do not use a Windows password, you will be prompted to define one. This is optional, but a password improves the security of your software.
- For more information about enrolling your fingerprint for power-on and hard disk drive passwords (BIOS passwords), see “Enrolling your fingerprints for BIOS passwords” on page 10.

Swiping your finger over the fingerprint reader

To swipe your finger over the fingerprint reader, do the following:

1. Place your fingertip on the small circular indentation above the reader, as shown below. Ensure that the rest of your finger is flat on the reader.

Figure 4. Placing your fingertip above the reader

2. Apply light pressure, and swipe your finger across the reader in one smooth motion, as shown below.

Figure 5. Swiping your finger across the reader

Chapter 4. Fingerprint reader settings in the BIOS

This section provides information about the fingerprint reader settings in the BIOS.

Setting up the fingerprint reader in the BIOS

To set up the fingerprint reader in your computer BIOS, do the following:

1. Set a power-on password or a hard disk drive password, or both.
2. Turn off the computer and then turn it on.
3. When prompted, swipe your finger over the fingerprint reader.
4. Type your power-on password, your hard disk drive password, or both as requested. The enrolled fingerprint is now associated with your power-on password, your hard disk drive password, or both.

The first time you start the computer, you will need to log on to the system by swiping your finger over the reader once and entering your password to associate the two. The next time you start the computer, you can log on to the system by swiping your finger over the reader once.

Attention: If you always use your fingerprint to log on to the system, you may forget your BIOS password. Write down your password and keep it in a safe place. If you forget your password and cannot swipe your finger, you cannot start the computer or change the password. For optimal performance, enroll more than one fingerprint.

If you forget your power-on password, you must take your computer to a Lenovo service representative to have the password erased.

If you forget your hard disk drive password, Lenovo will not reset your password or recover data from the hard disk drive. You must take your computer to a Lenovo service representative to have the hard disk drive replaced. Proof of purchase is required, and a fee will be charged for parts and service.

What Your Service Provider Will Do to Correct Problems

When you contact a Service Provider, you must follow the specified problem determination and resolution procedures.

The Service Provider will attempt to diagnose and resolve your problem by telephone, e-mail or remote assistance. The Service Provider may direct you to download and install designated software updates.

If required, your Service Provider will provide repair or exchange service depending on the type of warranty service specified for your product and the available service. Scheduling of service will depend upon the time of your call, parts availability, and other factors.

Types of Warranty Service

1. Customer Replaceable Unit (“CRU”) Service

Under CRU Service, the Service Provider will ship CRUs to you at its cost for installation by you. CRU information and replacement instructions are shipped with your product and are available from Lenovo at any time upon request. CRUs that are easily installed by you are called “Self-service CRUs”. “Optional-service CRUs” are CRUs that may require some technical skill and tools. Installation of Self-service CRUs is your responsibility. You may request that a Service Provider install Optional-service CRUs under one of the other types of warranty service designated for your product. An optional service offering may be available for purchase from a Service Provider or Lenovo under which Self-service CRUs would be installed for you. You may find a list of CRUs and their designation in the publication that was shipped with your product or at www.lenovo.com/CRUs. The requirement to return a defective CRU, if any, will be specified in the instructions shipped with a replacement CRU. When return is required: 1) return instructions, a prepaid return shipping label, and a container will be included with the replacement CRU; and 2) you may be charged for the replacement CRU if the Service Provider does not receive the defective CRU from you within thirty (30) days of your receipt of the replacement CRU.

2. On-site Service

Under On-Site Service, a Service Provider will either repair or exchange the product at your location. You must provide a suitable working area to allow disassembly and reassembly of the product. Some repairs

may need to be completed at a service center. If so, the Service Provider will send the product to the service center at its expense.

3. Courier or Depot Service

Under Courier or Depot Service, your product will be repaired or exchanged at a designated service center, with shipping at the expense of the Service Provider. You are responsible for disconnecting the product and packing it in a shipping container provided to you to return your product to a designated service center. A courier will pick up your product and deliver it to the designated service center. The service center will return the product to you at its expense.

4. Customer Carry-In Service

Under Customer Carry-In Service, your product will be repaired or exchanged after you deliver it to a designated service center at your risk and expense. After the product has been repaired or exchanged, it will be made available to you for collection. If you fail to collect the product, the Service Provider may dispose of the product as it sees fit, with no liability to you.

5. Mail-In Service

Under Mail-In Service, your product will be repaired or exchanged at a designated service center after you deliver it at your risk and expense. After the product has been repaired or exchanged, it will be returned to you at Lenovo's risk and expense, unless the Service Provider specifies otherwise.

6. Customer Two-Way Mail-In Service

Under Customer Two-Way Mail-In Service, your product will be repaired or exchanged after you deliver it to a designated service center at your risk and expense. After the product has been repaired or exchanged, it will be made available to you for return shipping at your risk and expense. If you fail to arrange return shipment, the Service Provider may dispose of the product as it sees fit, with no liability to you.

7. Product Exchange Service

Under Product Exchange Service, Lenovo will ship a replacement product to your location. You are responsible for its installation and verification of its operation. The replacement product becomes your property in exchange for the failed product, which becomes the property of Lenovo. You must pack the failed product in the shipping carton in which you received the replacement product and return it to Lenovo. Transportation charges, both ways, shall be at Lenovo's expense. If you fail to use the carton in which the replacement product was received, you may be responsible for any damage to the failed product occurring during shipment. You may be charged for the replacement product if Lenovo does not receive the failed product within thirty (30) days of your receipt of the replacement product.
